ALBERT PICK & COMPANY

208-224 WEST RANDOLPH ST. ~ CHICAGO

and L. Barth & Company Inc., New York

The Men Who Built the Great Pick and Barth Businesses Will Continue to Direct the New Combined Organization

MR. ALBERT PICK

MR. HARRY BARTH

The customers of Albert Pick & Company and L. Barth & Company, Inc., will be glad to know that the management of the new consolidated company will be in the hands of the same men who have brought the Pick and Barth businesses through their many years of successful operation. This means that the entire managing personnel, the officers of the companies and their many other experienced men, now form a greater and stronger organization which is better than ever able to carry out their progressive policies, with increased resources, and greater manufacturing and operating facilities at their command.

Announcing~

the CONSOLIDATION of ALBERT PICK & COMPANY, Chicago, and L. BARTH & COMPANY, Inc., New York, the Two Leading Hotel, Club, Restaurant and Institution Outfitters of the East and West—NOW ONE GREAT NATIONAL ORGANIZATION!

*No Change in Management, Policy
Personnel or Organization*

The two companies will continue to do business as before, each operating in its present territory. Albert Pick & Company will operate as the western division and L. Barth & Company, Inc., as the eastern division of the parent concern to be known as Albert Pick, Barth & Company, Inc.

This catalog is sent to you by Albert Pick & Company, Chicago, the western division, and all merchandise herein is quoted and will be shipped F. O. B. Chicago, unless otherwise stated. For terms, how to order and similar information concerning orders see page 368 of this catalog.

How This Greater Brings Direct

NEVER in the history of the Hotel, Restaurant and Institution supply business has a development occurred that brings greater prospects for direct benefits to the trade than the uniting of the great Pick and Barth businesses. This joining of forces, with its resulting increase in Volume, Buying Power, Resources and Facilities, is affecting thousands of products used constantly by our customers—improving quality, bettering construction, beautifying design, hammering down costs, developing new products, widening varieties to choose from—and doing a hundred and one things to render bigger service to the people who buy from us. In every merchandise, manufacturing and operating division of the combined businesses, there is now on foot the most determined drive to take the fullest advantage of our greater opportunities, with results that are favorably affecting all parts of our business. Many of these results may be seen in the improved and enlarged lines of merchandise listed in this catalog. Many more will appear as time goes on. And now, with the issuance of this first great consolidated catalog of our lines we want to give this message to you—that we pledge ourselves to devote every man and every force in our business to the constant betterment of the quality, value and service of the products we offer to our trade.

NEW YORK OFFICES, DISPLAY ROOMS AND OPERATING PLANT

The headquarters of L. Barth & Co., Inc., the eastern division of Albert Pick, Barth & Co., Inc.

FACTORY, WAREHOUSE AND ASSEMBLY BUILDING

This great building is situated in the famous Central Manufacturing District of Chicago, and contains over 13 acres of floor space. The building is provided with private docks, a large motor truck shipping section, and private switch tracks capable of handling 16 freight cars within the building.

WOOD WORKING AND REFRIGERATOR FACTORY

Located at Kingston, New York. Here are made all varieties of high grade Hotel and Restaurant Refrigerators and Wood Fixtures.

Organization Benefits to You~

Greater Resources! Greater Volume! Greater Buying Power! Greater Organization! Greater Factories! Greater Lines of Merchandise! Greater Values!—and Greater Service to our Customers! Albert Pick & Company, Chicago and L. Barth & Company, Inc., New York for years have been steadily growing along exactly the same lines, each in its own part of the country. They have the same type of customers, the same lines of products, the same organizations and the same objectives. What is more natural, therefore, than for these two companies—each unquestioned leader in its field—to unite in a single organization of far greater size and strength and of national scope? Such a move was more than merely natural—it was well nigh inevitable, and in harmony with the best principles of modern business. We are therefore pleased to announce this consolidation—a great step in the march of progress!

**CHICAGO OFFICES AND
DISPLAY ROOMS**

The headquarters of Albert Pick & Company, the western division of Albert Pick, Barth & Company, Inc.

SILVERWARE FACTORY

Located at Bridgeport, Conn. The only factory in America devoted exclusively to the manufacture of Public Service Silverware.

WOODWORKING PLANT

At Chicago. Makes Store Fixtures, Restaurant Fixtures and Built-in Kitchenette Equipment.

GENERAL OPERATING PLANT

A model of merchandise warehousing, containing miles of perfectly laid out stock bins and a multitude of devices for the speedy handling of orders—including chutes, lowerators, moving belts, etc. One floor contains the greatest public service kitchen manufacturing plant in the country, and on others are model workrooms devoted to linen sewing, drapery manufacturing, carpet sewing and similar work.

The Solid Foundations *Hotel, Restaurant and*

of the World's Largest Institution Supply Business

A BACKGROUND of over half a century of merchandising to Hotels, Restaurants, Clubs, Hospitals, Institutions and similar establishments stands behind the businesses of Albert Pick & Company and L. Barth & Company, Inc., now united as Albert Pick, Barth & Company, Inc. For over half a century both concerns have been continuously growing and developing along similar lines, steady forging to a leading position in the field, until today **there is no other organization in our line in the world** which can equal Albert Pick, Barth & Company, Inc., in actual experience, practical results, cumulative knowledge and facilities which it places at the disposal of public service institutions. These are broad statements, but they have a foundation in facts.

Our business is the equipping, furnishing and supplying public service establishments. This is not a sideline with us,—it is our sole and only business. To it we have devoted a lifetime of practical study and research. To solve all the problems arising in our contacts with the hundreds of establishments we have equipped and supplied, we have developed a planning and merchandising organization that is absolutely without an equal.

We have experienced decorators, skilled in the planning and designing of decorative treatments. We have a large technical staff of trained equipment engineers, the soundness of whose recommendations has been proven in hundreds of cases and whose judgment, therefore, is that of an authority. We own or control factories where a large share of the merchandise we sell is manufactured. We have research laboratories where new items and better methods are being perfected, and which have contributed many important improvements to the field of public service kitchen engineering. Our methods of operation

have been developed through years of intensive management and are, therefore, economical and sound. Our financial standing and responsibility give us unlimited resources in obtaining both merchandise and service.

We have spent years in building up a specialized organization, to help you organize, equip and carry on your business by giving you always maximum value at the lowest possible price.

We **know**, through practical experience, what can be done and what can not be done. We have grown with the public service industry and it is our pride that we have contributed no small part to the growth of the industry.

Our entire organization expends all its energies in only one direction:—the equipping, furnishing and supplying of hotels, restaurants and other public service establishments. Is it any wonder, therefore, that Albert Pick, Barth & Company, Inc., stands today the foremost organization of its kind in the world?

Why We Manufacture Our Own Silverware

THERE are two kinds of silverware on the market—domestic ware for home use, and hotel ware for public service. One is lighter, less durable; the other is created for the constant trials of hotel use. Albert Pick & Company manufacture only one kind—hotel ware. Some of the features which mark Albert Pick Silverware as superior are outlined below.

OUR Silverware Factory in Bridgeport, Conn., is the only factory whose entire output is hotel ware. It maintains one high standard of production. It represents more than a quarter century's experience and success! Its sole aim is to produce better public service silverware—more durable, more economical and more beautiful.

Albert Pick & Company Silverware Factory, Bridgeport, Conn.—the only factory devoted exclusively to hotel silverware.

Extra Heavy Hinges! They are half again as heavy as ordinary hinges. Can't bend or snap off.

Inner Ring on Coffee Pot Covers. A strong reinforcement that prevents bending. Also prevents steaming and boiling over of coffee.

Metal Covered Insulators. More attractive in appearance. More durable, being strongly reinforced. Prevent rotting of insulators.

Heavy Flat Base. A new, exclusive feature of several of our lines. Pot stands firm. Cannot be dented or bent out of shape.

Reinforced at Every Point of Strain

Extra heavy nickel silver base, containing 18% nickel. All seams, joints, mounts, hinges, spouts and handles are silver soldered throughout—making one piece of silver. Note streamline inner body, without crevices. All parts that might dent or weaken are reinforced:

- | | |
|---------------|---------------|
| 1. Spout | 6. Base |
| 2. Shoulder | 7. Lip |
| 3. Knob | 8. Inner Ring |
| 4. Hinge | 9. Outer Ring |
| 5. Insulators | |

Heavier Fork Tines. Points are tapered at an acute angle, with more metal in the tines. No hooking or bending!

Extra Heavy Shanks. Extreme thickness of forks and spoons provided at shanks, where most strain must be met. Serves as a heavy reinforcement.

Reinforced Knife Handles. Guaranteed against loosening of blades. Handles made of nickel silver shells, silver soldered—with extra weight at end of handle to prevent denting. Blades are best quality stainless cutlery steel.

Extra Plating. Bowls of spoons and backs of forks extra heavily plated where wear is greatest.

ALBERT PICK

Made in Our Own Factory at Bridgeport, Conn.

Hotel, Chicago*

Silver Treasure

Silver retains through the centuries its recognition and preferment. Emperors and princes have graven their family pride upon it; barque and brigantine have set sail for far places to search it out. Inherent grace and nobility of line have marked it as the most favored of the metals. And it is enduring. Witness the family silver which has been the heritage of generations; and consider too the silverware which, created for sterner use, serves the hotels and institutions of our day. Its beauty must be lasting, its endurance sure. Such is Albert Pick Silverware. It is itself a treasure of fine silver—not less because easily obtained and universally preferred.

Albert Pick & Company

Fashioned in Our Factory at Bridgeport, Conn.

Extra Heavy Blanks—New Extra Sectional Reinforced Plate. For Many Years the Standard for Public Service and Now Improved.

The famous Albert Pick & Company Brand spoons and forks have now been improved still further by a step forward in the method of applying the silver plate—an extra re-inforcing deposit of silver is put on the sections subjected to the hardest wear—the backs of the bowls and the backs of the handles. In addition, the blanks are the heaviest practicable, and are of highest grade 18% nickel-silver (excepting the knife blanks, which are of best quality highly tempered cutlery steel). Extra heavy blanks, unusual strength. Extra Plate quality silver plate, and the sectional reinforcing deposit make this grade without doubt the best plain ware that can be bought for restaurant and institutional purposes.

We Guarantee "ALBERT PICK & COMPANY BRAND" knife blanks to be made of best quality highly tempered cutlery steel; the fork and spoon blanks to be best quality 18% nickel-silver (white metal) and exceptionally heavy weight.

We Guarantee that each dozen of these "ALBERT PICK & COMPANY BRAND" solid handle dinner knives (3E110) and dinner forks (3E111) will actually strip 12 pennyweights of pure silver; that each 12 dozen tea spoons (3E102) will strip more than 50 pennyweights of pure silver, and that each 12 dozen dessert spoons (3E103) will strip more than 80 pennyweights; other items in proportion.

STAMPING FREE of Charge—SEE PAGE 33

5%

DISCOUNT allowed on items bought in 12 dozen lots. We cannot give this discount on assorted orders, as for 6 dozen knives and 6 dozen forks. A full 12 dozen of each number must be ordered for shipment at one time.

The Biggest Selling Restaurant Spoon on the Market!

"ACORN~COOPER"^{Brand} TEASPOONS

Formerly PIX "ACORN" BRAND and BARTH'S "COOPER" BRAND
Same in Quality Same in Design

Over 2,500,000
"ACORN~COOPER"
Spoons Sold

Millions of pieces of this brand of silverware have been bought by the customers of Albert Pick & Company as "ACORN" BRAND and by the customers of L. Barth & Company as "COOPER" BRAND. The wonderful value these customers received for their money is best demonstrated by the large number who send in repeat orders again and again. Due to the merger of Albert Pick & Company and L. Barth & Company, we are combining the two brands, which were identically the same in quality and design, under the name of "ACORN~COOPER" Brand Silverware.

Durable Silver
Plate On 18% Nickel
Silver Base

This silverware is guaranteed to be durably silver plated on a white metal base that is made of the best grade of 18% nickel silver, and is additionally guaranteed against blistering or any other defect. If your silver is becoming worn out—if you are using brass base spoons, or if you lose many tea spoons and require a low-priced spoon for regular service, "Acorn-Cooper" Tea Spoons are ideal for your needs. And this is a good time to discard your worn out pieces and replace them at a great saving in cost. Send us your order today.

Something New! HANDLE-RITE Silverware

PATENTS PENDING

Spoons and Forks Have Clearly Indicated Handles

A distinct shoulder or bolster clearly separates the handle portion from the bowl or tine part which comes into contact with the food. The importance of this cannot be over-estimated when it is considered that there is nothing so distasteful to the restaurant patron as the careless handling of the silverware by the waiter. "Handle-Rite" Silverware has been specially designed to do away with this abuse. The careless waiter cannot help but handle the silverware correctly when the handles are so clearly indicated.

Handle-Rite Offers A Distinctive And Unusual Service

"Handle-Rite" Silverware in your establishment will prove of great publicity value to you.

The use of "Handle-Rite" Silverware is your assurance to your patrons that from kitchen to table the silver with which they eat is handled in a careful and cleanly manner.

The Greatest Improvement In Table Silver Made In Years

Handle-Rite is a distinct step forward in the improvement of table service for more sanitary and efficient usage. Your customers will appreciate the use of this new silverware because it will impress them that you are taking every precaution to assure them a hygienic and attractive service.

"Handle-Rite" is a new idea. Your patrons will notice it, talk about it. It will create attention. It will draw trade. We will furnish you with attractive table cards, announcing your new type of service. We will also provide instruction cards for the waiters, explaining the purpose and correct use of "Handle-Rite" Silverware.

High Point, N. C.

Albert Pick & Co.

We are glad to advise you that we are more than pleased with your new "HANDLE-RITE" Silver Flatware Service. We tried this line out in our Vanderbilt, and John Sevier Hotels, and it met with such a hearty reception on the part of our patrons that we have now adopted it as the standard for our entire chain. Our patrons frequently comment favorably on the use of "HANDLE-RITE" and seem to appreciate our desire to give them a truly sanitary service such as this. We like it and gladly recommend its use.

Yours very truly,
FOOR-ROBINSON HOTELS
William Foor, President.

The "HANDLE-RITE" Colonial Pattern

The "HANDLE-RITE" Windsor Pattern

"Roosevelt" Pattern

Extra or 5 oz. Plate. Reinforced by Sectional Overlay

The latest creation of our designing staff. The attractiveness of this new pattern combined with its individual design enables it to meet the exacting requirements of the most exclusive service.

The "Roosevelt" Pattern was created to meet an especial need—to give to Public Service establishments a distinctive design on a blank scientifically proportioned to stand up under unusually hard wear.

The blanks are made of the best grade nickel-silver containing not less than 18% pure nickel, except the knives, which are made of the highest grade cutlery steel. Plated in extra or 5 oz. plate, and in addition, reinforced on all staple items by a sectional overlay or double plate, at the points of greatest wear.

The extra heavy blanks with the weight properly distributed insures satisfactory and long wear. The base metal is of the best grade 18% Nickel Silver, heavily plated. The tines of the forks are of special construction. The knives can be purchased in both hollow handle and solid handle styles with plated blade or stainless steel blade as listed in the panel to the right.

NOTE—All items preceded by a star (★) have overlay plate of pure silver at points of greatest wear.

"Kenilworth" Pattern

"Franklin" Pattern

Guarantee—The patterns on this page are "Extra Sectional or 5 oz. Reinforced Plate" and are warranted to be plated with 5 ounces (or 100 dwts.) of pure silver per gross of tablespoons; forks and other spoons in proportion.

STAMPING FREE

See Page 33 for Information

Guarantee—Dinner knives in these patterns, both hollow and solid handle, are warranted plated with 16 dwts. of pure silver per dozen, other knives in proportion. All are warranted carefully finished and free from defects. Handles of hollow handle knives are made of extra heavy gauge 18% nickel silver fully hard soldered and guaranteed against loosening of blades.

"SHERMAN" PATTERN

Extra or 5 oz. Plate
BUTLER FINISH

"SHERMAN" PATTERN, AT THESE EXTREMELY FAVORABLE prices, is the best flatware value on the market, quality considered. It is a distinctive and exclusive pattern that will add dignity to any service and can be bought without a greater expenditure than would be necessary for perfectly plain ware. Nor have the requirements for public service silverware been sacrificed in order to make the price appealing. The spoons and forks are made of the best grade of nickel silver blanks of substantial weight, containing not less than 18% nickel silver and are plated in 5 ounce or Extra Plate quality, which is 25% heavier than A1 plate. The knives are made on the best cutlery steel blanks and are silver plated full 12 dwts. to the dozen. All finished in the lustrous Butler finish.

5%

special discount allowed on "Sherman" Pattern items bought in lots of 12 dozen or more of one item.

"PORTIA" PATTERN

(Formerly "Pix New Model" Flatware)

EXTRA OR 5 OZ. PLATE

Sectionally Reinforced

BRIGHT FINISH

SIMPLICITY OF DESIGN IS THE KEYNOTE OF THIS distinguished pattern. Its ability to withstand the hardest and of wear makes the "Portia" Pattern an economical and appropriate service for the Restaurant, Coffee Shop and Cafeteria. The extra heavy blanks of the spoons and forks are made of the best grade of 18% nickel silver, specially reinforced at points of strain. The knives are plated in "extra sectional" or 5 ounce reinforced plate, which is 25% heavier than A1 plate, and in addition with an overlay of pure Silver at the points of greatest wear on spoons and forks. The base metal of the knives is of the best grade cutlery steel, heat treated full 12 dwts. to the dozen.

NOTE—All items marked by a (★) have the sectional overlay or reinforcing silver deposit on the bowls of the spoons and tines of the forks.

5% Special Discount allowed on "Portia" Pattern items bought in lots of 12 dozen (or more) of one item.

"COLONIAL" PATTERN

Silver Plated in Extra or 5 Oz. Quality

Sectionally Reinforced—Butler Finish

THE "COLONIAL" PATTERN IS REPRESENTATIVE OF THE HIGHEST type of Hotel Quality flatware made. It is a typical example of what modern manufacturing methods and machinery can produce in high grade silverware at an economical price. The pattern is a simple thread-line border which will match most types of hollowware. The base metal or blanks are made of 18% nickel-silver of the heaviest weight practicable, specially reinforced at all points of wear. Silver plated in extra sectional quality, all staple items being sectionally reinforced at the points of greatest wear by an additional overlay plate of pure silver. Knives are made of the best cutlery steel, plated full 16 dwt. to the dozen. **NOTE**—All items preceded by a star (★) have the sectional overlay or reinforcing silver deposit at the points of greatest wear.

5%

Special discount allowed from these prices on "Colonial" Pattern items bought in lots of 12 dozen or more of one item.

"LINCOLN" PATTERN

Extra or 5 Oz. Plate

Butler Finish

"Lincoln" Pattern Flatware is especially designed to supply the demand for a reliable pattern, at a remarkably low price. It is very pleasing in appearance and has a reinforced border with scroll design tip. The "Lincoln" is used in establishments that subject their silver to the hardest wear and has become exceedingly popular both for service and satisfaction. Spoon and fork blanks made of high quality 18% nickel-silver, with a heavy deposit of pure silver. The silver plating is guaranteed 5 ounce or "Extra Plate" quality, 25% heavier than standard "A1" plate. Knife blanks are of best cutlery steel and silver plated full 12 dwts. to the dozen. Beautiful lustrous Butler finish.

The NEW "ALTON" PATTERN

Fashioned in Our Own Factory at Bridgeport, Conn.

THE CRAFTSMANSHIP OF THE old timesilversmith wins the admiration of everyone. In the New "Alton" Pattern is found the beauty of the craftsman's handiwork and the pride of finished workmanship made possible only by present day manufacturing equipment. The "Alton" is a new distinctive pattern for use especially where requirements demand low-priced, substantial silver.

A quality of design and weight superior to that ordinarily found in a pattern of silver at this price marks the "Alton" pattern. It is designed, like our other patterns, for Public Service. The design is simple and easy to keep clean.

5% EXTRA DISCOUNT

allowed from these prices on items bought in lots of 12 dozen or more of a number.

SPOONS AND FORKS ARE MADE on substantial 18% nickel-silver blanks and knives of good quality cutlery steel. The silver plating is durable, of medium quality, and finished in lustrous Butler finish.

We recommend the use of "Alton" pattern in place of plain pattern ware, its dignity of design providing a nicety of service not possible with ordinary plain silver. Especially suitable for kitchenette apartment equipment, summer and winter resorts and any other establishments not requiring the heaviest grades of silver.

The New "Alton" Pattern has found favor with discriminating users because of the beauty and simplicity of design and the universal satisfaction it gives under strenuous public service.

FLATWARE STAMPED WITHOUT CHARGE

We stamp any flat silverware purchased of us free of charge. If we have never stamped silverware for you, we make a nominal charge on first order to cover the cost of a steel die for this purpose. We keep this die on file so that no loss of time is occasioned in stamping and forwarding future orders. Charges for making die are as follows:

- 3E98** Block Letter Die. **\$3.00**
 Five letters or less in name.
 Extra charge of 50c for each additional letter.

- 3E99** Script Letter Die. **\$4.00**
 Five letters or less in name.
 Extra charge of 75c for each additional letter.

Prices for old English letters, monograms, crests, etc., upon application. About 4 days required to make die and stamp silverware. If we have your die, orders are stamped and shipped within 48 hours after order is received.

Hotel Quality Silver Soldered Hollow

Our Hotel Quality Silverware is made in our own factory at Bridgeport, Conn., which has made an enviable reputation during its 20 years spent in the manufacture of fine silverware. It is unique in that it is the only silverware factory whose sole output is devoted to hotel quality silver soldered hollowware, exclusively for public service. Silverware for use in establishments catering to the public is of a distinct class and must be extremely durable because of the strenuous usage it receives.

The Famous Stanley All-Steel Vacuum Bottles

"NO BREAKAGE." Keeps Liquids Hot or

Cold same as Ordinary Glass-lined Thermos Bottles. Made of two steel

shells electrically welded and separated by a vacuum space filled with insulating material. The inner shell is lined with a flexible enamel (Amalite) which will not chip or crack and is as sanitary as glass. No filler to break or to be replaced, no repair to be made, no up-keep charges. All openings are sealed. Will keep liquids hot from 16 to 18 hours or cold from 20 to 24 hours.

STANLEY ROOM SERVICE COFFEE POT

\$8⁰⁰ Single Portion In Lots of 6

A new and important item for good hotel service. Made with the famous Stanley all-metal, unbreakable construction. Does away forever with the cost of renewals of glass liners in other types of coffee pots. Keeps coffee or other beverages hot for at least 3 hours after being drawn from the urn. The body is made of brass, heavily nickel plated, with hinged cover, lined with perfected heat-resistant enamel, non-breakable and sanitary. Very attractive and useful. Made in two sizes.

MENU, CARD AND TICKET HOLDERS SELECTED NUMBERS

"VERTI" CLIP CARD HOLDER

Strong steel spring clip mounted in mahogany finished metal base. Will hold show card or menu card of any size. Made in three sizes.

3E1839 Small size. Ht. 1½ in. Shpg. wt. doz. 2 lbs. (Each, 20c) Doz. **\$2.00**

3E1837 Medium size. Ht. 4 in. Shpg. wt. doz. 2½ lbs. (Ea., 30c) Doz. **\$3.00**

3E1838 Large size. Ht. 7 in. Shpg. wt. doz. 4 lbs. (Each, 45c) Doz. **\$4.75**

CARD AND TICKET HOLDER

Convenient for announcing special prices, holding menus, table numbers, etc. Nickel plated and polished.

3E5196 4 in. high, 2 in. base. Wt. not pkd. per doz. 1 lb. Doz. **\$2.50** (Each, 25c)

3E5197 8 in. high, 3 in. base. Wt. not pkd. per doz. 6 lbs. (Each, 30c) Doz. **\$3.00**

MENU HOLDER

A neatly designed holder for menus, display cards, etc. Holds card up in readable position. Very strongly constructed, all parts riveted together. Heavily nickel plated and highly polished. Base 2 in. square, stand 4 in. high. Shpg. wt. per doz. 3 lbs.

3E1829 Doz. **\$3.75** (Each, 35c)

SILVER PLATED MENU HOLDER

This attractively designed menu holder makes an unusually neat table ornament as well as keeping the menu clean and out of the way. It is made of high grade cast Britannia metal, silver plated. The solid casting makes it heavy enough to keep its position on the table without tipping over. Holds any size card. Ht. 2 in. Width of base 2¼ in. Shpg. wt. 5 oz.

3E1836 Doz. **\$8.75** (Each, 75c)

CARD OR TICKET HOLDER

An inexpensive price card or small ticket holder. Strongly constructed, nicely nickel plated and polished. Does not allow card to shift from one side to other. Ht. 2 in. Base 1¾ in. in diam. Shpg. wt. per doz. 1 lb.

3E1830 Doz. **\$1.65** (Each, 15c)

We Show Here Only A Very Small Part Of Our Comprehensive Line Of Merchandise. If You Do Not Find What You Want Here Write Us Fully Your Needs—We Will Be Glad To Furnish You Full Information.

"PERFECTION" MENU HOLDERS

The Popular "Perfection" Used Everywhere

One of the most popular menu card holders ever marketed. The hundreds of establishments now using it testify to this. Plain in design, practical and of strong construction. Will hold one or two menu cards. Base weighted to prevent tipping. Carefully made in our own factory and warranted to give satisfaction. Choice of three finishes, as stated below. Shpg. wt. doz. 5½ lbs.

3E1833 Oxidized finish. Each, **45c** (Doz. \$5.00)

3E1834 Nickel plated. Each, **45c** (Doz. \$5.00)

3E1835 Silver plated. Each, **55c** (Doz. \$6.00)

5 IN. HIGH CARD HOLDER

Will hold any size card. Made of steel, all strongly riveted together. Base is 2¼ in. in diam. Finished in statutory bronze. Ht. 5 in. Shpg. wt. per doz. 1½ lbs.

3E5200 (Each, 45c) .. Doz. **\$4.75**

7 IN. HIGH CARD HOLDER

For use on tables to "Reserved" signs or waiters' numbers. Statically constructed, neat in appearance. Base is 2¼ in. in diam. Finished in statutory bronze. Ht. 7 in. Shpg. wt. doz. 2 lbs.

3E5201 (Each, 50c) .. Doz. **\$5.00**

9 IN. HIGH CARD HOLDER

A tall card holder by many because it holds the card above the table. It is high and has a cast 3½ in. in diam. Finished in statutory bronze. Very neatly and statically constructed. Holds cards 4½ in. or w. Shpg. wt. per doz. 3 lbs.

3E5202 Doz. **\$5.00** (Each, 75c)

CREST and MONOGRAM GLASSWARE SERVICE

NOTHING will add so much to the tone of your establishment as a glassware service crested with your own individual design. The crest can be carried out in one of several processes throughout your entire service at but a fraction over the cost of plain glassware, and it will go very far to place the stamp of distinctiveness on your entire establishment. We specialize in the supplying of artistically designed crested glassware and have rendered this service for many of the finest Hotels, Clubs, Restaurants and Institutions in the entire United States.

We illustrate on this page but a few glassware items selected from the many complete crested services we have executed in the past.

Hotel Plaza
New York City

Drake Hotel
Chicago, Ill.

Hotel King Cole
Miami Beach, Fla.

Hotel Roosevelt
New Orleans, La.

Congress Hotel
Chicago, Ill.

Hotel La Salle
Chicago, Ill.

Blackstone Hotel
Chicago, Ill.

Write us and we will submit samples and prices on your requirements.

We will be pleased to submit samples of crested glassware executed by us.

We also execute glassware services in white enamel glass decoration or in a combination of two or three harmonious colors. Write for prices.

Washington, D. C.

Denver Club
Denver, Colo.

Habana Yacht Club
Havana, Cuba

Hotel Book-Cadillac
Detroit, Mich.

Everglades Club
Palm Beach, Fla.

NONIK

Thin Blown Water Glasses Further Improved by Safedge!

GUARANTEED FOR SIX MONTHS AGAINST CHIPPAGE

2E4335

2E3780

"No Nik" Glassware, with the famous shock absorbing bulge, has been demonstrated during the past ten years to be the strongest thin blown glassware made. Ever anxious to give our customers the best we can in any of the lines we carry, we have now further improved "No Nik" glassware with "Safedge"—a reinforcing bead on the edge of the glass which positively prevents chipping from contact with faucets or from direct blows upon a hard surface. This combination of the two great principles—"No Nik" and "Safedge"—produces the strongest and finest line of glassware that can be procured. They last longer and look better and are, therefore, the glasses you should buy.

One dozen "No Nik-Safedge" glasses will outlast two dozen regulation glasses of the same quality.

OUR UNUSUAL 6 MONTHS GUARANTEE

All "No Nik-Safedge" Glassware sold by us is guaranteed for six months against chippage. This does not include cracking or breakage which is usually caused by extreme carelessness in handling. In case of claims for chippage make a report of the number of pieces chipped and we will either replace them with new glasses or credit your account.

PLAIN LIME BLOWN GLASSES

Best quality plain thin lime blown glass. Superior to the ordinary lime blown glass. Possesses all the famous "No Nik" features and further improved by having the smooth melted "Safedge."

2E4335 10 oz. Ht. 3 $\frac{1}{8}$ in.Doz.
Packed 6 doz. to carton. Wt. 22 lbs. 5% discount in lots of 4 cartons or more.

75c DOZ.

LIME BLOWN "NONEST" GLASSES

A new and beautiful shape water glass, possessing all the famous "No Nik" features and further improved by having the smooth melted "Safedge." Made of the best quality thin lime blown glass, highly fire polished all over.

2E3780 10 oz. Ht. 3 $\frac{3}{8}$ in.Doz.
Pkd. 6 doz. to carton. Wt. 22 lbs. 5% discount in lots of 4 cartons or more.

\$1⁰⁰ DOZ.

BANDED TUMBLERS

These beautiful engraved banded "No Nik" tumblers are further improved by "Safedge." The cleverly applied engraved bands which are placed on the "No Nik" bulge, makes a decoration that is beautiful in its simplicity. Decoration will not wear off. In addition to the decoration the tumbler has the "No Nik" bulge feature which gives it a much greater life in your service than the ordinary styles of Tumblers offered. Made of best clear quality thin lime blown glass, highly fire polished all over. Smooth melted edges and bottoms.

2E3619 Cap'y 10 oz. Ht. 3 $\frac{1}{8}$ in.Doz.
Pkd. 6 doz. to carton. Wt. 22 lbs. 5% discount in lots of 4 cartons or more.

\$1¹⁰

ETCHED WATER GLASSES

A beautifully etched thin lime blown water glass, with an attractive etching makes the glass one of exceptional beauty and selling at a moderate price. This glass also has the "No Nik" features, chief of which is the shock-absorbing bulge, further improved by "Safedge." Made of best quality thin lime blown glass.

2E4559 10 oz. Lime blown etched water glass. Ht. 3 $\frac{1}{8}$ in.Doz.
Pkd. 6 doz. to carton. Wt. 22 lbs. 5% discount in lots of 4 cartons or more.

"NO NIK"-Safedge Glassware

Thin Blown Service

"No Nik" Glassware—the only notable improvement ever made in modern thin blown glassware—has now been further improved by the addition of "Safedge," a reinforcing bead which prevents chipping from direct blows on the edge by faucets, etc. The famous patented bulge absorbs all shocks

and protects the edge in handling, thus materially reducing breakage. It has been proven because of this feature one "No Nik-Safedge" glass will outwear two ordinary glasses of the same quality. "No Nik-Safedge" Glassware can be had in a variety of graceful shapes to meet every need.

"THE BANNER"

HOTEL, RESTAURANT AND CLUB ROOM GLASSWARE

Here is a splendid, high class, medium weight pressed glassware set suitable for Hotels, Clubs, Apartment Hotels, and Restaurants. Made of highest quality pressed glass, wide optical effect and with a pressed border design around the body of bowl. Highly fire polished all over with smooth edges and bottoms. Makes a very good substitute for the higher priced acid etched patterns and is more serviceable. Tumblers are finished with ground and polished bottoms.

5% discount in bbl. of 25 doz. Wt. 100 lbs.

We offer here a set of beautifully etched glassware of unusual merit. Each piece is made of the finest quality lead blown glass. The scroll design is executed by a process of lasting acid etching and is brought out in a strikingly attractive manner. For banquet or regular hotel service you couldn't choose a more beautiful or more serviceable line of glassware than these items.

Acid etchings should not be confused with the cheaper and inferior enamel decorations. Acid etching is imbedded right in the glass and is everlasting. The glasses themselves are well made, being highly fire polished with smooth melted edges

SAVE MONEY ON FACTORY DIRECT SHIPMENTS

Note that we quote special net prices on many items listed where goods are shipped direct from factory to you in barrel lots only. These offer a material saving to you. All orders shipped promptly. No package charges, we guarantee against breakage in transit.

NOTICE: The 5% discount we allow on orders for barrel lots shipped from Chicago stock does not apply on factory direct shipments. All items not otherwise marked are shipped from Chicago stock.

SIX MONTHS GUARANTEE!

Against chippage on
"No Nik-Safedge" Glassware

All "No Nik-Safedge" Glassware sold by us is guaranteed for six months against chippage. This does not include cracking or breakage which is usually caused by extreme carelessness in handling.

In case of claims for chippage make a report of the number of pieces chipped and we will either replace them with new glasses or credit your account.

NEW COMBINATION MILK OR WATER TUMBLER

Here is a combination milk and water glass of large appearance, yet only the regulation 8 ounces in capacity. The tall style with the fluted bottom makes the glass very attractive looking. The smooth rounded inside bottom makes it easy to clean. The no-nest style prevents nesting thereby reducing breakage. Popularly known as the "2 in 1" glass because it eliminates the necessity of having separate glasses for serving milk and water. Made of good quality heavy pressed glass of clear crystal color. Smooth edges and bottoms.

Pressed Glass Inside Cup Grapefruit Liner

This new improved Grapefruit liner was designed by us especially to improve the method of serving Cocktails. The flanged edge fits over the top of any of our grapefruit glasses. The rim on the edge holds liner firmly in one position so that it will not move when contents are being removed with a spoon. Will save you money by eliminating the silver frame. The heavy reinforced edge will prevent breakage. You can with this new improved liner prepare your cocktail in advance and it will remain as fresh as when prepared. The liner covers the Entire top of the grapefruit preventing the air from melting the ice, thus keeping contents cool and fresh. Made of best quality pressed glass, fire polished all over. **Inside cup only.**

SILVER PLATED NON-CORROSIVE METAL TOP

Per Doz. The metal top on this bottle will not corrode or turn black, and is easy to keep clean by just rubbing very lightly. Silver plating always looks new and fresh. Top is made of Britannia metal, the base of which is block tin, the highest grade white metal known. Not affected by the chemical action of salt. Heavily silver plated with lacquered finish. Bottle is made of best quality pressed glass, highly fire polished. Ht. 3 1/2 in. Wt. doz. 3 1/2 lbs.

FRENCH EDGE DISHLETS OR CAKE SOUFFLET CASES

Exceptionally popular and used by all the better class Hotels and restaurants. They are especially prepared and adapted for quiet service as dishes can be prepared early in the morning without cases becoming soggy.

French Edge Dishlets are absolutely pure in manufacture. They are poured, moulded and baked a golden brown under perfect sanitary conditions. They are sturdy and well and uniform in size, stacking much more easily than china. Cartons of 500 care-packed, make handling very convenient.

Appetizing, wholesome pastry dishes add zest and appreciation to any meal—overhead by doing away with dish washing, dish drying, and loss of china.

ANITARY PAPER SERVICE—CUPS AND HOLDERS PLATES AND SODA STRAWS

Plain Style

PAPER FINGER BOWL LINERS OR SUNDAE CUPS

Cost Less and More Sanitary Than Glass or Metal Dishes
They are Priced as Low as 8 for 1 Cent

An essential in every hotel, club or restaurant. Paper Finger Bowls need no introduction to the hotel or restaurant keeper. They are in universal use. Quality considered, this is the lowest priced finger bowl liner on the market. An economical service—no washing of finger bowls and no breakage. More attractive than the old style method, and far more sanitary. Used once and thrown away.

PLAIN STYLE Made of fine quality white paper, not paraffined, but specially treated so it will not leak. Diam. at top 5 in. These paper dishes are also used as sundae cups at soda fountains. Packed 1,000 to box. Shpg. wt. 8 lbs.

"Eight-Ninety" Paper Napkins Save Waste!

The Fold's the Thing -

Only One Napkin At A Time Can Be Taken

Reduces Wastage 25% to 40%

It has been proved by actual comparative tests that "Eight-Ninety" paper napkins when dispensed from this dispenser really cut down the amount of paper napkins used in an establishment from 25% to 40%. The "Eight-Ninety" napkin is a patented eight fold napkin which allows only one napkin to be taken at a time because of the manner in which it is folded. When dispensed from the special white enamel steel dispenser (illustrated below) it stops the patron's customary habit of taking 3 or 4 napkins at one time. Napkins also may be dispensed from napkin stand or tumbler as desired. **Pure White, full size 13½ in. square.** Put 250 napkins in a package, and in shipping cartons containing 40 packages or 10,000 napkins. Wt. per carton 65 lbs. No less than 10,000 napkins sold.

EMBOSSSED PAPER NAPKINS

These Embossed Paper Napkins are Designed and Feel Like Linen. Suitable for Highest Class Service. Notice the Very Low Prices!

The "Sayford" Embossed Napkins are made of a fine, strong, absorbent paper and are put through an unusual process of embossing that creates the impression of specially designed linen. Where the highest quality paper napkins are desired, we recommend them in either the Tea or the Dinner size.

PAPERLIN NAPKINS

Made of Paper, Feels Like Linen. A Perfect Paper Imitation of a Linen Napkin Produced by a Special Patented Process.

This is a great improvement over the ordinary tissue napkin. It is made of soft, pure white tissue with a linen finish texture not a bit "crinkly." Paperlin Napkins are unusually absorbent and are a refined table accessory. Strictly high quality. Three sizes for various needs. No less than one carton sold. **Samples sent upon request.**

"RUSHWORTH" PATTERN HOTEL PORCELAIN

J. & G. Meakin's Hard English Porcelain. Artistically decorated with dealcomania border under a hard fired glaze. Has turquoise panels flecked with gray, with burnt orange border and scrolls. Between the panels are sprays of brightly colored flowers consisting of a large red rose flanked by two smaller wild roses and blue forget-me-nots, all with leaves and burnt orange centers. A beautiful and attractive design but not gaudy. Flat pieces have welded edges.

Expert Handling of Specially

We specialize in supplying artistically designed and manufactured chinaware for public service. We have rendered this service for many of the finest Hotels, Clubs and Restaurants in the country and illustrate here a few of the designs we have executed.

Decorated and Crested Chinaware

An individually decorated or crested service in your dining room will do much to add prestige to your entire establishment. If you are interested, write us and we will be very glad to submit samples of work we have done, special designs and prices.

"COLONIAL" PATTERN TRANSLUCENT CHINA

Green Band and Two-Line Decoration. Genuine translucent vitrified china, that will give long service. Decoration put on under the glaze and will not wear off. Edges are rolled to prevent chipping. We recommend "Colonial" as one of the best values on the market. It is a winner in design, decoration and quality.

Celery Trays—</

"MILDRED" PATTERN TRANSLUCENT CHINA

Bavarian China in green band and line decoration. Famous for its fine body, velvety whiteness and wonderful translucency. Has green band and line on edges and green line on shoulders. Rolled edges, medium weight, underglaze colors. A standard decoration. We carry large stocks of this popular pattern, but occasionally find it necessary to supplement our stock with domestic china of equal quality which we reserve the right to supply.

"LUCILLE" PATTERN TRANSLUCENT CHINA

Another handsome pattern in Bavarian China, the finest and most exclusive Bavarian china produced. The decoration comprises two uniform size green pin lines. A pattern always in demand. All pieces are medium weight with rolled edges and underglaze colors. We carry large stocks of this popular pattern, but occasionally we find it necessary to supplement our stock with domestic china of equal quality which we reserve the right to supply.

"CORONADO" PATTERN LIGHT WEIGHT SEMI-PORCELAIN

A new shape with a distinctive decoration. Burnt orange line at edge with burnt orange line on shoulder, and around floral decoration of gray vase with large yellow roses flanked with sprays of black leaves and stems in center. Between shoulder and center line there is a fluted or ribbed effect. The cup is tapered from the bottom, and has a strong serviceable handle. An exceptionally beautiful spray pattern, and is recommended for high grade establishments.

"LEONORA" PATTERN LIGHT SEMI-PORCELAIN

Egyptian border design in sepia brown with pink roses in dark blue panels. A high grade production. Gold line edge and gold striped handles. A very handsome design particularly adaptable for family hotels, institutions, schools, or for use in the home. Overglaze decoration is carefully applied and hard fired, giving long wear and service.

PIX VITRIFIED HOTEL AND CHINA RESTAURANT

True vitrified china of this type is the best of any ware made for Hotel and Restaurant use. It is most economic because of its long life. It is absolutely non-porous and will not absorb dirt, grease or moisture. It will remain white even when chipped and is guaranteed not to craze. We **guarantee quality**—a guarantee that must prove and fulfill every one of our claims. Made in standard sizes, shapes and weights. Compare prices with those asked by other dealers for a genuine (non-absorbent) vitrified china.

"GREENWOOD" VITRIFIED HOTEL CHINA

Values unusual in genuine vitrified china. It is a real economy to buy "Greenwood" vitrified china, as it is superior in service to any other American productions. Because of its vitrification, it is non-porous and will not absorb dirt, grease or moisture. It will not craze and remain white when chipped. These superior qualities and the greater strength of "Greenwood" vitrified china insure a longer life to the ware. You are taking no chances in buying ware of this character. Can be had in all the various standard sizes, shapes and weights.

5% discount on all numbers listed in bbl. lots when ordered in bbl. lots of a number. Barrel quantities and weights given are approximately correct.

POPULAR SHAPED STONE MUGS

Values You Will Not Match Elsewhere

"Flagon" Stone Mugs—A particularly popular style and is splendidly made. It is recognized as the standard shape mug. The glaze and the edges are finished smooth. The color is light yellow outside, and white inside.

	Cap'y	Wt.	Doz. in	Wt.	Doz.

IX "ECONOMY" HOTEL WARE

is fired, vitreous earthenware modeled after the well known "English" vitrified hotel wares. Has an excellent glaze that will stand up under usage. Even though this ware is not genuine vitrified china, it will stand up under severe handling because of the construction of the various parts. This line is of medium weight rolled edge, and thick. We recommend this line where the cost of our regular vitrified china is beyond means, and guarantee every item to give the most satisfactory service. **Barrel quantities and weights given are approximately correct.**

COMPARTMENT LUNCH TRAYS THE IDEAL TRAY FOR PLATE SERVICE

The popularity of these trays has been assured. They are for dinners or luncheons, and are designed for serving combination meals. By a series of slight elevations, or ridges, plate or tray is divided into compartments, by which means several articles of food may be served on the same dish and still be kept separated. They come plain white or decorated.

WHAT IS QUALITY

Quality in merchandise is that which represents excellence in workmanship and durability in materials, and which indicates the degree of their worth. It is the one thing, and the **only** thing, by which you should judge the merchandise you buy.

The shrewd buyer of today does not buy on price alone because he knows that a low price in itself is not a correct indicator of the value he is receiving. He knows that true value in merchandise is based on how much he gets for the money he pays—not on how little he pays for what he gets. It is service, **actual service**, which finally proves which is the cheapest merchandise to buy. Quality merchandise is always cheaper because it gives more satisfactory service, because it looks better, and, what is most important, because it lasts longer.

Use this thought as your yardstick when you are buying and bear it in mind when you look through the pages of this catalog.

*Our Merchandise Is
Quality Merchandise*

"Fraunfelter-Ohio" Cooking China represents the highest achievement of American endeavor to produce an unrivaled line of cooking china. It is a high grade product built for hard service and made to withstand the intense heat to which cooking wares are subjected. It is a true hard china cooking ware, finished on the outside with a rich brown or green mirror-like glaze that is exceedingly attractive, and will appeal to the most discriminating. This leadless glaze will not craze, and the body is absolutely non-absorbent. The inside of the ware is pure white.

Our Guarantee Backs Up "Fraunfelter-Ohio" China in every way—we guarantee its quality, durability and service.

"Fraunfelter-Ohio" Ware is made in all articles necessary for high class cooking and serving. Items listed here are shipped from Chicago stock. Any other items desired are shipped direct from factory in Ohio. Write for prices.

UNBLEACHED LINEN DAMASK

Popular dice pattern all linen damask, woven from a heavy grade of flax in a firm hard body. Will become white after a few washings. A very good quality for institutions and restaurants.

	Yd.	30 Yds.
5E1212 60 in. wide.	\$1.80	\$1.75
5E1214 70 in. wide.	2.10	2.05

NOTE: As tops and cloths shrink when washing, we quote both square and extra length sizes. Extra length sizes will be about square after washing.

RENAISSANCE TABLE DAMASK LINENIZED FINISH

TABLE CLOTHS
TOPS and NAPKINS

This cloth has without question the best finish that has ever been applied to a cotton cloth. After it has been washed, it is difficult for the average person to distinguish it from linen. Write for a sample and put it through the laundry one to fifty times and be convinced. A real severe test of the goods made at the mill showed that the finish held after an eight-hour bath in caustic soda—a record of strength and toughness. Woven from good weight, long fibered cotton threads, brought out in our exclusive "Renaissance," pattern. Unsurpassed for long, service and will give complete satisfaction. Each piece comes neatly hemmed, ready for use.

RENAISSANCE TABLE DAMASK (LINENIZED FINISH) WITH YOUR NAME OR CREST WOVEN IN

Your NAME or CREST can be woven in our Renaissance pattern table coverings, in the center design, or, we can eliminate the center design and weave in your crest or name, or weave your name only along the selvedge. See illustrations below of various up-to-the-minute Hotels and Restaurants who have adopted name-woven Renaissance.

ADDS DISTINCTION AND EXCLUSIVE-NESS to your establishment and REDUCES YOUR LOSSES considerably.

Send us a copy of your crest and advise us the quantities of each size you will use within one year, and we will submit samples and an attractive proposition whereby we make it easy for you to adopt name-woven or crested Renaissance.

Butcher Linen (muslin) Napkins

WITH NAME EMBROIDERED

WITH NAME STAMPED

50c

Per Doz. Embroidered.
In Lots of 250 Doz.

The fact that hundreds of busy hotels and restaurants all over the country are using these special grade Butcher Linen Napkins for lunch room trade is ample proof that they are giving dependable wear for restaurants, cafeterias, grills and all public service. They are cotton muslin napkins of good weight and quality. (Butcher Linen is the special name of the fabric.) These napkins will positively outwear the cheap grades of cotton napkins and are very much lower in cost. They meet the demands of those requiring a good wearing napkin at a low price. We recommend this napkin for the lunch room, cafeteria and popular priced restaurants.

45c

Per Doz. Stamped.
In Lots of 250 Doz.

SOUP STRAINING CLOTH

Fine mesh cotton muslin for straining soup, etc. Used in the best hotels and restaurants and found very satisfactory. We quote two qualities both 36 in. wide.

Medium Weight
5E9010 Yd. **11c**
(Bolt of 60 yds. Yd. **10½c**)

Heavy Weight
5E9021 Yd. **14½c**
(Bolt of 60 yds. Yd. **14c**)

Y. M. C. A. TOWELING Cotton Toweling

Hand looking heavy cotton toweling will stand all kinds of hard wear. One of the biggest values in toweling ever offered. Lettered Y. M. C. A. in red or blue. Width 17 in. Yd. **24c**
(50 yd. bolt. Yd. **23½c**)

"PIX" Double Strength Brand Sheets, Sheeting and Pillow Cases.

THE BEST HOTEL AND INSTITUTION SHEETS, SHEETING, AND PILLOW CASES TO BE HAD

For withstanding the hard wear that sheets, sheeting, and pillow cases must endure, "PIX" DOUBLE STRENGTH BRAND cannot be excelled. Uniformly and closely woven from the best selected yarns in a firm heavy body, strong and durably made for long satisfactory service, and will stand repeated washings. We quote a complete line of sizes of sheets, pillow cases and sheetings by the yard.

Measurements of sheets and pillow cases are taken **before** goods have been hemmed. After hemming, sheets will measure about 5 in. shorter—and pillow cases nearly 4 in. shorter. We recommend the use of 99 and 108 in. length sheets—63 in. width for single beds; 72 in. width for twin beds, and 81 in. width for 4 ft. 6 in. beds.

Names consisting of three words or less may be embroidered on sheets or pillow cases for 20c per dozen extra; in red, blue or white. Fast colors. **All sheets are torn, not cut.** Will not ravel. Hemmed right, laundered right, ready for use.

Add Life to Mattresses and Save Money

Mattress Covers protect your mattresses from soiling, thereby adding to their life and saving you money on cleaning costs. They are made of a thick, soft pad, covered with heavy bleached or unbleached muslin. Filled with new cotton, securely quilted. Zig-zag stitching on top, so covers will not lump up in washing. A necessary item in every home, Hospital or Institution.

SUNFAST.

Mohair Bed Covers are made of full width, long wearing material—no unsightly seams, no waste in matching pattern. 4 in. borders are woven to come along sides of bed and 2 in. border along selvage. We can also supply drapery materials to harmonize with these covers. See page 281.

Mohair Bed Covers are not easily soiled and do not wrinkle like a white spread. Can be washed when necessary. Made extra long to cover pillows. Ends securely stitched. Carried in stock in three colors, and two sizes. Specify color wanted when ordering. Special colors to order.

Accepted by up-to-date hotel keepers as a solution to the difficulties presented by the old style comforters. They are strictly sanitary—can be laundered repeatedly. Woven like a blanket, of fine quality cotton yarns with soft downy nap on both sides, light and fluffy. Thick enough to be warm and comfortable. When soiled they can be easily washed without fear of shrinking. Absolutely guaranteed. They cost no more than a medium grade comforter. If you desire a name or crest to be woven in, add 40c each to case lot mill price. (Minimum 100 of a size). We illustrate a few crests recently woven in these comfortables. We can duplicate any crest or monogram, and it can be woven in center or at both ends.

Eppley Hotel Company Crest

Book-Cadillac Hotel Crest

Y. M. C. A. PATTERN

Each comfortable is made with the official Y. M. C. A. crest woven in the center. Two colors: blue body with white border or tan body with brown border and crest to match. Appropriate for Y. M. C. A. HOTEL, or a member of "Y" Camp. Can be laundered as often as necessary.

Our Most Popular Duck Coat and Vest

You men who run Soda Parlors, Cafeterias, Restaurants, etc., can figure costs and profits just as well as large business institutions. You know your rent and light and other fixed expenses are just about the same when you serve a thousand customers a day as when you serve three thousand. And you know that if you serve three thousand a day you can not only buy your products cheaper, but you are perfectly satisfied with a smaller profit on every sale. It works exactly the same with us. Our tremendous volume of sales in Duck Coats and Vests—selling thousands every year—not only cuts the original cost to us, but it also cuts our cost of doing business, so that we need but a very small margin on each garment. That is the whole reason why we are able to sell you better Duck Coats and Vests at most attractive prices.

White Duck Dispenser's Coat

This is a military style, good quality white duck coat. It is well fashioned and carefully sewed, with double cuffs, 3 pockets, and has detachable buttons. Sizes carried in stock, 34 to 44 in. chest.

SANITARY NAPKINS and VENDING MACHINES

A Necessity
in Every
Women's
Rest Room

Each
Packed in a
Carton

Invaluable
To
Women
Traveling

Compressed
For
Emergency
Use

Every women's retiring room, modern hotel and cafe should provide these sanitary napkins. They are distinctly an emergency proposition and as such are almost indispensable. Emergency Sanitary Napkins are made of fine absorbent cotton, covered with gauze, with two strong ribbed loops at the two ends, together with two safety pins. Each napkin is about 10 in. long, 2½ in. wide and about ½ in. thick. It is compressed into a neat individual pasteboard carton, size 2½x1½x½ in. They will not clog the closet flush when discarded, thus eliminating a troublesome nuisance. A supply of them for ready distribution will pay distinct dividends in popular approval. For use with Vending Machine.

(In case lots of 200 doz. Doz. 70c)

SANITARY TOWEL SERVICE

INDIVIDUAL TOWELS

Towels with sewed eyelets or grommets for individual towel service. Can be used on any style holder. Holes in grommets 3/8 in. in diam., those in eyelets 1/2 in. in diam. Eyelet towels are more satisfactory, as they will not cut the roller in ironing.

We can make any towel we advertise or make towels from any toweling advertised on other pages in this catalog with the grommets or with the eyelets. Write for prices. The following towels are carried in stock ready for immediate shipment.

TOWELS WITH SEWED EYELET IN CORNER

(In lots of 100 doz. Doz. \$1.25)

TOWEL FIXTURE—For Above Towels

Shows towel with metal grommet in center.

Shows towel with sewed eyelet in corner.

Towels are reinforced where eyelets or grommets are inserted, as illustrated above.

Rapidly replacing roller service in all public establishments. Made of wood, three finishes—oak, mahogany and white enamel. Ht. 67 1/2 in., width 14 in., depth 14 in. Provided with a locked rod on which towels slip by means of a secure stainless grommet or sewed eyelet in corner. Every patron has a fresh, sanitary towel, which slides into receptacle after being used. Towels cannot be taken off rod and used for other purposes. This means a saving in wear and tear. The prevention of loss by theft means added economy. Soiled towels can be removed and replaced by a fresh supply in a few seconds. Wt. pkd. 70 lbs.

5E5010 Oak finish.....Each, **\$15.50** **5E5012** White enamel.....Each, **\$16.75**
5E5011 Mahogany finish.....Each, **\$15.50**

WHITE WATERPROOF FABRICS

Used in the place of coated rubber sheeting. Absolutely waterproof and will withstand the most severe tests. We guarantee that fabric can be boiled without deterioration and will remain waterproof after this process. Not painted or rubberized, and stronger than rubber sheeting. Will not crack, peel, or deteriorate with age.

EXTRA HEAVY QUALITY

25 Yd. Pcs.

5E1860.....Doz. **60c**

\$15.50

COUNTER TOP WIPERS AND DUST CLOTHS

TURKISH COUNTER TOP WIPER

Very closely woven from the best grade yarn, with good nap. It is hemmed at both ends and has fast selvage edge. The advantages of Turkish cloth in wiping counters or polished surfaces are apparent. Being of a very soft finish it will not scratch and it possesses greater absorbent properties than any other. Size 17x27 in. **5E5002** Wt. not pkd. 2 1/2 lbs. (Lots of 25 doz. Doz. \$1.95) Doz. **\$2.00**

ABSORBENT DUST CLOTH

A very heavy woven cotton cloth, especially designed with a view to securing the greatest absorbent qualities possible, which is attained to such a degree that this cloth will take up water and dry a surface almost as rapidly as a sponge. The fineness of texture and weave renders it so soft and pliable that it is suitable for use on finest woodwork or most expensive mirrors. Size 18x30 in. Wt. not pkd. 2 lbs.

5E5001.....Doz. **\$1.95**
(Lots of 25 doz. Doz. \$1.90)

WHITEHEAD'S THE STEWARD'S HANDBOOK

For many years this was the only book in print that instructed in the steward's duties and outlined the management of the back part of the house; and today there is no other book that occupies the peculiar field that this one does. Several pages are devoted to illustrations of requisition blanks, market sheets, storeroom issue book, storeroom stock book, and sample menus and bills of fare. It tells of the head waiter's duties, of club and party catering, and of catering extraordinary. 250 pages of the book are devoted to "Whitehead's Dictionary of Dishes and Culinary Terms and Specialties," and this dictionary of dishes is today one of the most serviceable works of reference for caterers in the world. 484 pages, size 5½x8½ in. Cloth bound. Wt. not pkd. 1 lb. **\$3.00**

Kitchen Installations

The kitchens of the new Palmer House, Chicago, are without a doubt the largest and best equipped hotel kitchens in the world. Nothing was spared in their planning that would make them better and more efficient in operation. The bulk of the equipment was manufactured of monel metal, over 65 tons of this metal being used. These kitchens were completely designed and equipped by our organization.

The general view below of the main kitchen gives some idea of the spaciousness and size of the kitchens.

Below is shown the bank of eight PIX Gas Broilers in the main kitchen. These broilers are fabricated almost entirely of monel metal.

The Banquet Kitchen shown above is a large well equipped kitchen by itself entirely independent of the main kitchen two floors below.

Representative Kitchen

Above is shown the spacious kitchen of the Concourse Plaza, one of New York's fine residential hotels.

Left, Kitchen of the Illinois Steel Co., Employees' Cafeteria, Chicago. Electrical cooking equipment is used throughout this kitchen which is operated 24 hours a day.

Above, Kitchen of the Misericordia Hospital, New York, N. Y. Hospital kitchens are one of our specialties.

Left, This kitchen is located in the Hotel Benjamin Franklin, Philadelphia, Pa. This is Philadelphia's newest hotel and one of the finest in the east.

Our kitchen equipment is designed and built under the direct supervision of experienced kitchen engineers. This results in the maximum of efficiency and economy and improved construction.

Equipment Installations

Pick-Barth Kitchen Equipment is manufactured in our own factories where the most modern of machines and manufacturing methods build the highest quality into every individual item of equipment. Our equipment is the standard of the world as is shown by a list of representative kitchens we have equipped.

Quality equipment in your kitchen means more economical operation and lower food production cost. Your kitchen is the heart of your establishment and you cannot afford to slight it.

Above, a view of the kitchen of the beautiful new Hotel Mayflower, Washington, D. C.

The New 3000 Room Hotel Stevens Will Have Its Kitchens Equipped By Our Organization

THE selection of our Kitchen Equipment for a hotel of the character and size of the New Hotel Stevens speaks for itself. The management of the hotel, with their many years of high class metropolitan hotel operation, are surely competent judges of quality in culinary equipment, and their awarding of this mammoth contract to our kitchen engineers is surely of great significance

This is only one of many large and high class kitchen equipment contracts awarded us in recent months

PIX HEAVY DUTY ELECTRIC RANGE

The Highest Achievement in Electric Range Building

Pix Heavy Duty Electric Range, under heavy service, has proven itself. Its success is due to superior construction and practical use of the latest type of heating strands. The heating strands are placed in the cooking top in such manner as to throw the heat upward, where it is wanted. The oven is heated separately, separate switches controlling upper and lower sections. An even distribution of heat is had, in low, medium and high heats. Switches and terminals are protected to combat excessive accumulation of grease. Made in 4 ft. sections with or without ovens, each section a complete unit. Section without oven has 4 top plate heating units and 2 open shelves below for pots and pans. (Illustration shows 4 ft. section with oven and 4 ft. section without oven placed together.) Any number of sections can be thus placed end to end. These ranges are clean in operation, and encourage a clean kitchen. They can be used in conjunction with coal or gas ranges of our own manufacture in any combination desired; sections of either type can be placed end to end.

Construction

Range is 4 ft. long, 39 in. deep and 33½ in. high. Heavy black steel **Body**, reinforced, with Wellsville black polished steel exterior. Entire heating **Top** constructed for special heat dissipation, cast in four separate plates. **Plates**, 24x9 in., heating strands inserted so that should a burn-out occur, it is not necessary to replace the whole plate. Simply replace the inexpensive burned-out strand. Plates insulated on under side, throwing heat upward. 3-heat switches of improved, indicating type. Oven 24 in. wide, 14 in. high, 28 in. deep, with 1½ in. Magnesia insulation between door and steel walls. Heating strands above and below, each set controlled by 3-heat switches. Double, non-warping bottom. **Door** is extra heavy, with double air space and strong coil springs. Important fittings of malleable iron. Bottom of range closed with sheet steel. Wellsville steel double **shelf** over range, with polished steel trim. Switches, fuse cut-outs and terminals built into range, making connection to supply line the only installation expense. **We guarantee our ranges for use on voltages for which they are built, standard 220-240 volt current, alternating or direct. We can furnish ranges for special voltages at extra charge.**

14E9410 4 ft. Pix Electric Range with oven. Maximum power required 18 K. W.

Shpg. wt. about 1,200 lbs. Each, **\$675.00**

14E9411 4 ft. Pix Electric Range without oven. Maximum power required 12 K. W.

Shpg. wt. about 750 lbs. Each, **\$450.00**

EACH

\$670.00

EACH

\$460.00

Back shelf of sheet steel and polished trimmings extending across the full length, can be furnished at an extra charge. Price will be quoted on application.

Framework is of heavy angle iron, with the joints welded. The ends and back are formed with No. 16 gauge sheet steel. The **top** surrounding the hot plates is of No. 10 gauge sheet steel with edges turned down and the corners welded. Removable clean-out pan is provided beneath the cooking top. A grease rail extends across the full length of the range.

Top consists of four hot plates mounted on a structural frame extending to the base, entirely independent of surrounding top. **Hot plates** measuring 9x24 in. are cast-in, Calrod type of units with the terminals brought out at the rear at ample distance so as to be fully protected against possible contact with food-stuffs that may be spilled on the cooking top. Each hot plate is of high quality iron.

Oven is heavily insulated with rock wool. Two Calrod heating units, one at the top of the oven and one resting at the bottom. The latter is protected by a cast iron perforated grid. **Oven door** is of very rugged construction, heavily insulated with rock wool. The door is equipped with a heavy duty latching mechanism.

Each unit is protected by a double pole cut-out and controlled by an individual 3-heat reversible snap switch with indicating button only exposed. The switches and cut-outs are fully enclosed within a ventilated switch compartment. A grease guard extends across the face of the switch compartment to protect the switches.

Outside Dimensions: Ht. 31 in., depth 39 in., length 48 in.

Oven size: Ht. 18 in., depth 26½ in., width 21½ in.

Total hot plate surface: Depth 24 in., width 36 in.

Rated wattage hot plates: 4 K. W. each.

Rated wattage oven units: 3 K. W. each.

Total rated wattage: 22 K. W.]

Approx. installed weight 1,250 lbs.

HEAVY DUTY ELECTRIC BROILERS

SINGLE AND DOUBLE ELECTRIC BROILERS

Broilers of the highest grade construction that will give continued satisfactory service. Have capacity for rapid broiling of a large number of steaks, chops, fish, etc., in the most savory and palatable manner.

Details of Construction

Body of heavy Wellsville black polished steel, polished steel trim. **Hardware** heavy steel and brass, polished. Standard sizes 30 in. and 36 in. wide, with single deck, with or without oven above. Depth from front to back 28 in. **Shelf** 13 in. wide at front. **Heating Strands** divided into two units, each unit controlled by an indicating three-heat switch, allowing either half of broiling space or whole space to operate as needed. **Gridiron** controlled by raising and lowering device, operated by counter-weights. Full size **grease drawers** welded and grease-tight. **Switches, cut-out boxes and terminals** built into broiler in a satisfactory cool location. The best insulation is used to conserve heat and give maximum efficiency. 110-120, 220-240 volts, A.C. or D.C. State voltage also current and phase required when ordering.

Single Electric Broiler with Oven Above

Double oven over gridiron. Gridiron on rollers, grease drawers below, heavy shelf well supported. Polished trim and hardware.

14E9505 Width 30 in., ht. 73 in., overall depth 41 in. Max. power required 7½ kwt.

Shpg. wt. 550 lbs. Each,

14E9506 Width 36 in., ht. 73 in., overall depth 41 in. Max. power required 10 kwt.

Shpg. wt. 675 lbs. Each,

Single Electric Broiler without Oven Above

Same as above in general construction, except that it has no oven above.

14E9507 Width 30 in., ht. 62 in., overall depth 41 in. Max. power required 7½ kwt.

Shpg. wt. 520 lbs. Each,

14E9517 Width 36 in., ht. 62 in., overall depth 41 in. Max. power required 10 kwt.

Shpg. wt. 640 lbs. Each,

Double Electric Broiler without Oven Above

Same as above in general construction, except having two broiling grids in place of one.

14E9508 Width 30 in., ht. 84 in., overall depth 41 in. Max. power required 15 kwt.

Shpg. wt. 665 lbs. Each,

14E9509 Width 36 in., ht. 84 in., overall depth 41 in. Max. power required 20 kwt.

Shpg. wt. 750 lbs. Each,

NOTE: Maximum power given is for entire broiler operating on high heat. Low heat requires one-fourth of amounts; medium heat requires one-half of amounts mentioned.

SINGLE DECK ELECTRIC BROILER WITH OVEN

DOUBLE DECK ELECTRIC BROILER WITHOUT OVEN

EDISON ELECTRIC BROILER

Body of broiler made of heavy sheet steel, riveted to a substantial frame work of steel angles.

Two 5 kwt. Calrod units located at top of broiler, each unit controlled by a three-heat indicating switch protected by a double pole cut-out. The two switches are located at a position readily accessible to the operator, well ventilated to prevent overheating. Above the units is an insulating pad, thereby reducing heat losses through the top of broiler to a minimum.

A substantial sliding meat grid with convenient handle located beneath the heating units. Grid can be raised or lowered and locked in any desired position by means of a control bar. A removable drip pan attached to grid to prevent grease from dripping onto control box, body of broiler, or floor when grid is pulled out.

Drip pan is attached to grid and sloped toward the back, causing all grease to drain into funnel shaped sheet metal drain beneath which a bucket can be placed.

The capacity of the broiler is approximately 72 two-pound steaks per hour.

Grid surface: 32 in. wide, 23 in. deep.
Overall dimensions: 57 in. high, 35 in. wide, 35 in. deep. Shpg. 10 lbs.

Black enamel with polished frame and nickel trim.

72E316 Each,

\$425⁰⁰

EDISON CHARCOAL TYPE BROILER

Body rectangular in shape constructed of sheet steel. Mounted on top of body is the grid. Grid is cast iron with a heating unit of the Calrod type cast in the grid and completely enclosed.

Directly beneath grid and located in the bottom of the broiler body, a Monel metal grease pan of the sliding type is placed. On the right hand end on the front of the broiler is a three-heat snap switch. Just above the switch and fastened on the broiler body is a switch cover to protect switch from grease drippings.

A Monel metal cover 4 in. deep and of sufficient size to extend over the entire broiling surface, is hinged to the back of the broiler body. This cover is counter-balanced and has a metal handle.

The complete apparatus is mounted on four nickel plated cast iron "Ball" feet.

FINISH—Highly polished rust-proof "Monel" metal cover and grease pan. Body of high grade black japan with nickel trim.

CAPACITY—Effective broiling area 12x18 in., sufficient to carry at one loading, four 1½ pound steaks or six 1 pound fish or five half-chickens.

Overall Dimensions:

Width 23½ in.
Depth 23½ in.
Ht. cover closed 16 in.

Ht. cover open 28½ in.
Shpg. wt. 175 lbs.
Wattage — Maximum consumption 4 kwt.

72E315 Each,

Standard voltage 110-120 and 220-240

PIX HEAVY DUTY COAL RANGE

FOR HARD OR SOFT COAL

Finest Construction
Throughout

\$202⁵⁰
For
Single
Oven
Black
Finish

The last word in coal ranges. Combines tremendous strength with economy. **Construction:** Body of heavy sheet steel rigidly braced, welded and riveted; insulated with asbestos millboard. 4 in. air space between bottom of range and floor. **Top** of extra heavy fine gray iron. **Top Castings** level and even, rigidly braced with ribs which are part of castings. Top supported by heavy cast bridge over oven which prevents warping. Rings and covers over fire boxes. Front, back and fire box end of body insulated with fire brick. Ends in addition are insulated with asbestos. **Oven Bottoms** non-warping; backs and

sides heavy sheet steel. **Doors** extra strong with double steel air space between. Special vent for smoke and odors. **Ovens** 22 wide, 26 in. deep, 16 in. high. **Fire Box** thoroughly insulated, fire brick, will burn hard or soft coal. Heat circulates over oven, past end and under bottom giving equal distribution. Ash pit box extra heavy and insulated. 4 ft. range has fire box at left; 6 ft. range fire box is between ovens. Double plate shelves 19 in. above work top. Ranges 33½ in. high, 40 in. deep, ht. overall 58 in. **Flue Connections:** for single oven range 8 in., double oven 9 in., square or round.

Polished Trim and Fittings, Black Body

14E2053 6 ft. long. Shpg. wt. about 1,550 lbs. Each, **\$350.00**
14E2153 6 ft. long with C. I. Water Back, inlet and outlet on right end unless otherwise specified. Shpg. wt. about 1,600 lbs. (See note below regarding water backs.) Each, **\$373.00**

WOOD BURNING RANGES: Any of the above ranges can be had with special front and special door for use of wood. Extra cost added to the above price. Per range, **\$19.25**
REGARDING WATER BACKS: The cooking qualities of coal burning and wood burning ranges are not helped by the use of water backs or water coils built into ranges. These devices usually detract from the range, as the running water absorbs much heat. We do not recommend the use of water backs, but are listing them for the guidance of those who want them.

PIX HEAVY DUTY COMBINATION COAL AND GAS RANGE

Same design and construction as Pix Heavy Duty Coal Range. Differences as follows:

- (1.) Ash pit door removed and two heavy duty gas burners placed in ash pit. Burners emit great flame with tremendous heat in such a way that volume and distribution are similar to coal fire. Large burners furnished.
- (2.) Fire clay balls placed on grate above gas burners. Burning gases pass through openings between and around balls, causing the gases to be further broken up and mixed.

Results in greater gas economy and maximum consumption of heat units. Fire balls are brought to a red heat which they hold and transmit through range.

- (3.) To burn coal in the range, remove fire clay balls and burners. Grate and ash pit doors for burning coal are shipped with range.

14E1901 Fire Brick Linings for Fire Box. Set includes two 12x12x2 in. and 8x22½x2 in. bricks. Shpg. wt. 75 lbs. Each, **\$8.50**

'BARTH' HOTEL AND RESTAURANT FRENCH RANGES

The scientific principle of the Barth French Ranges causes the greatest possible oven heat. Perfect roasting, baking and broiling is assured. Top heating surface receives full heat from the fire box, evenly distributed. Ovens fitted with Our Improved Economical Draught Controlling Dampers, readily regulated to give uniform heat circulation all around oven. After oven has been idle for some time, it can be used immediately by opening the damper.

Bottom of oven is extra heavy, secured with strong tempered steel straps.

Oven doors fitted either with spring latch or straight drop latch and have "Barth" improved extra heavy solid Drop Forged Steel hinges.

When door is opened it forms a shelf which we guarantee will easily withstand any weight required of it.

The Linings bordering the top of and along oven flue sides, and where the fire comes in direct contact with the range body are of the best fire blocks and semi-cast steel plates. These linings (being of a special composition) are non-corrosive and will outlast other kinds.

The Body made of the finest black sheet steel. The pieces are all well planished by hand, strongly riveted and bolted together.

The border bands and braces of extra heavy wrought steel, exposed parts highly polished, well riveted and bolted to the body.

The castings are all of the very best extra heavy semi-cast steel, "sharp hammered" by hand to prevent warping.

"Barth" ranges (for burning coal or wood) are equipped with the celebrated Buzzini Patent Horizontal Shaking and Dumping Grate. The grate presents a flat surface to the fire. It can be shaken while in a horizontal position, thus equalizing and preserving the fire, and its heat.

The shaking, dumping and righting of the grate is performed from the front of the range, using only the shaker, and dust cannot escape into the room.

"Buzzini Grate"

STANDARD SINGLE OVEN SECTION

These one-fire, one-oven sections are made in two sizes—3½ and 4 ft. long—the depth and height being the same in all cases. A single section of this size may be joined to other sections at any time to form a larger range and the effect will be that of one continuous construction. Each range is complete with double plate shelf at back, steel enclosed flue channels and first joint of pipe up through the shelf.

14E3250 3½ ft. long, 42 in. deep, 31 in. high. One fire and one oven. Oven 17x28x15 in. with double plate shelf. Each, **\$157.50**

14E3251 Same as the above, but without plate shelf. Each, **\$140.00**

14E3252 4 ft. long, 42 in. deep, 31 in. high. One fire and one oven. Oven 21½x28x16 in. with double plate shelf. Each, **\$180.00**

14E3253 Same as the above, but without plate shelf. Each, **\$160.00**

"BARTH" WOOD BURNING RANGES

with steel enclosed draught flues at the back

constructed exactly the same way as our standard French Burning Ranges, illustrated above and at right, except these ranges have a hinged door at the front for introduction of the fuel. The wood burning ranges also have steel enclosed flues, making it unnecessary to "brick in" the flue inlet at the back, as must be done with the regulation Range. Ranges may be had made up into various sizes by joining the separate sections, as quoted below.

SINGLE OVEN SECTIONS

3295 3½ ft. long, 42 in. deep, 31 in. high. One fire and one oven. 17x28x15 in. Without plate shelf. Each, **\$152.00**

3296 Same as above, but with double plate shelf. Each, **\$169.50**

3297 4 ft. long, 42 in. deep, 31 in. high. One fire and one oven. 21½x28x16 in. Without plate shelf. Each, **\$172.00**

3298 Same as above, but with double plate shelf. Each, **\$192.00**

DOUBLE OVEN SECTIONS

3299 5 ft. long, 42 in. deep, 31 in. high. One fire and two ovens. 17x28x15 in. Without plate shelf. Each, **\$212.00**

3300 Same as above, but with double plate shelf. Each, **\$237.00**

3301 6 ft. long, 42 in. deep, 31 in. high. One fire and two ovens. 21½x28x16 in. Without plate shelf. Each, **\$252.00**

3302 Same as above, but with double plate shelf. Each, **\$282.00**

SMALL DOUBLE OVEN SECTION

This is a two-oven range with one firebox in the center. It is identical in construction and finish with the section shown above and is exactly the same height and depth, so that it may be placed alongside any other section to form a larger range. Our illustration shows the range with plate shelf at the back, and our price includes the shelf, first joint of pipe and steel enclosed flue channels, so that the range is ready for use when received.

14E3254 5 ft. long, 42 in. deep, 31 in. high. One fire and two ovens. Ovens, 17x28x15 in., with double plate shelf. Each, **\$225.00**

14E3255 Same as the above, but without plate shelf. Each, **\$200.00**

REPLACEMENT PARTS FOR BARTH RANGES

NOTE.—In ordering range parts it is absolutely necessary that we know whether you have a No. 2 fire range or a No. 3 fire range. You will be able to determine this by looking inside the oven door casting.

THE "LANG" PATENT HOT-BLAST RANGES

Made In
Our Own
Factory

3-Oven Type

COMBINATION RANGE For Soft Coal or Gas

The "Lang" Patent Combination Range is exactly the same as the "Lang" Patent Hot Blast Coal Range shown above, except that it can burn gas as well as coal. Its small consumption of either gas or coal recommends it for hotel and restaurant use. It is 33 1/2 in. high. The top including the shelf, is 42 in. deep. Finished in black paint. Made with ovens 24 in. wide or 30 in. wide. All combination ranges have back flue connections.

NOTE—Smoke-pipe for 2-oven "Lang" range must be 9 in. in diam. and must be connected to a flue of equal capacity. Smoke-pipe for 3-oven range must be 10 in. in diameter.

2-OVEN RANGES
14E9586 With 24 in. ovens. Range complete, with smooth polished top. Each oven 24x24x14 in. Top surface including shelf 42 in. deep, 82 in. long. Shpg. wt. about 1,550 lbs. Each, **\$425.00**

14E9567 With 30 in. ovens. Otherwise same as above. Top measures 42x94 in. Shpg. wt. about 1,650 lbs. Each, **472.50**

3-OVEN RANGES
14E9569 With 24 in. ovens. Same as No. 14E9566, but with 3 ovens. Top measures 42 in. deep and 106 in. long. Shpg. wt. about 2,050 lbs. Each, **\$520.00**

The "LANG" burns soft coal or wood and gives complete satisfaction with either. If wood is to be burned exclusively a special fire-box will be designed.

ARE DURABLY CONSTRUCTED AND DEPENDABLE

Body: Heavy steel. Bottom, insulated. Ht. of range, 33 1/2 in. Shelf, full length range. Top of 2-oven range has four large plates. Top, securely bolted and braced. Smooth surface, highly polished. No front rim or overhang. Range and trim painted black. Depth including shelf, 42 in.

Ovens: Of 12 gauge steel bottom and 14 gauge steel sides. Tops reinforced with angle plate and protected by asbestos. Doors extra heavy. Between ovens, controlled dampers are vertical flues through which additional heat may be thrown into either 2 ovens. Made with ovens 24 or 30 in. wide, as quoted.

Grate: Separate bar type. Each bar removable; can easily be replaced.

Fire-Box: Cast iron linings. Six pieces placed separately in position without cement or bolts.

Legs: 5 in. high, to permit easy cleaning, and protect floor from damage.

Special Instructions: When ordering, specify whether fire-box is wanted on right or left hand side. State whether smoke-pipe connection is to be on top or back. Otherwise all ranges shipped with left hand fire-box and top pipe connection. Smoke-pipe for 3-oven range must be 10 in. diam.; for 2-oven range, not less than 9 in. diam. for 1-oven range not less than 8 in. diam. Each size should connect with a flue of equal capacity.

"LANG" HOT-BLAST RANGES For Soft Coal or Wood

Heats all ovens with one fire-box. The polished solid top, made principally in four plates, is bolted down solid. Top plates are so applied that they can expand, flat, or be heated. Range is 33 1/2 in. high, the top, including the shelf, is 42 in. deep. Made with ovens either 24 in. wide, or 30 in. wide.

NOTE—Smoke-pipe for 2 oven "Lang" range must be 9 in. in diam. and connect to flue of equal capacity. Smoke-pipe for 3-oven range must be 10 in. in diameter.

2-OVEN RANGES

14E9584 With 24 in. ovens. Range complete with smooth polished top. 24x24x14 in. Top surface including shelf, 42 in. wide and 82 in. long. Shpg. wt. about 1,500 lbs. Each, **\$378**

14E9585 With 30 in. ovens. Otherwise same as above. Top measures 42x94 in. Shpg. wt. about 1,600 lbs. Each, **425**

3-OVEN RANGES

14E9587 With 24 in. ovens. Same as No 14E9584, but with 3 ovens. Top measures 42x106 in. Shpg. wt. about 2,000 lbs. Each, **\$472**

NOTE—If you do not use coal and desire to burn wood exclusively, please advise, and will ship with special fire-box for wood.

REPLACEMENT PARTS FOR "LANG" RANGES

In ordering repair parts for top of "Lang" Ranges, refer to cuts below. Order by number and always state width of oven. If range has fire-box on left hand end, order panels in same rotation as shown below. Panels are numbered from fire-box end of range always.

Prices listed below for range top replacements do not include polishing. If polished parts are desired specify "Polished" when ordering.

We can supply shelf 16 in. over top, 10 in. wide, entire length of range; made of heavy sheet steel, with angle and band binding, painted black. Includes high back and brackets.

14E2079 Shelf attached to Range. Wt. 55 lbs..... Each, **\$17.50**

Note: If wanted for wood burning only, range will be supplied with special pouchfeed doors.

ROILERS AND SHORT ORDER RANGES

Barth's Standard Broilers

STANDARD BROILER—Charcoal

These broilers are of the same construction and same high quality as the Barth French ranges. The design matches that of the range, and they are usually set up at one end of the range, thus giving the appearance of being joined to it. Our broilers are constructed to burn either charcoal or hard coal, the only difference in general appearance being that the charcoal broiler has an open closet for the storage of charcoal in the base, while the same space in the hard coal broiler is used for the ash pit. Broilers are set on heavy wrought steel bases and are fitted with heavy oval wrought iron rolling gridirons that run on heavy guide bars. Has blower, chains, pulleys and counter-weights.

The beds of the broilers are lined with best quality fire brick, 2½ in. thick. Fronts are bound and braced with ½x1½-in. aluminum painted steel bands covering the seams, thus furnishing the most substantial construction.

CHARCOAL		HARD COAL	
	Each		Each
14E3323	\$138.50	14E3331	\$147.50

Width 36 in.		Width 36 in.	

STANDARD BROILER—Hardcoal

PIX CHARCOAL AND GAS BROILERS

HEAVY DUTY CHARCOAL BROILER

PIX Charcoal Broiler gives uniform results, has many features of convenience and is heavily constructed. May also be had in same construction with gas attachment.

Construction

Body of heavy steel. All castings of best gray iron. Fire Surface hand-made fire tile. Gridiron, which moves on rollers, is hand made of oval steel bars. Folding Door has 3 positions. When closed or partly closed, conserves heat. Steaks can be turned at extreme back without moving gridiron. Large Storage Compartment for charcoal. Cast iron legs, ball feet. Height 65 in., depth 45 in. Requires 9 in. flue.

Charcoal Broiler, Black Finish

GARLAND" GAS BROILERS AND GAS RANGES

GARLAND" DOUBLE BROILER AND ROASTER

Double width broiler for use in large kitchens for extra broiling and roasting service is needed. Has two large ovens. 22 in. wide, 14 in. deep, 14 in. high. Burners for either side can be removed easily and quickly without interfering with opposite side of broiler. All heating and maintenance parts such as grid, lever, gas piping and valves, water or oil pans are placed in front. Ovens have 2 fire brick bottoms which absorb and reflect the heat to the Grid ovens.

Construction—Body and front of 16 gauge steel; heavy cast iron parts. Body black. Polished iron.

Burners—Twelve tubular. Providing ample heat for both ovens. Burners easily removable without loosening nut or bolt.

\$228⁰⁰
Each

Two Large Ovens Adjustable Grid

Broiler—Has forward extension of 10 in., which allows chef by means of grid lever to pull out broiler grid, conveniently turn the broil and drop all grease drippings into pan.

Broiler Grid—Extra heavy. Grid lever allows the instant adjustment of grid to any desired position.

Ovens—Each heated by six tubular broiler burners. 2 in. fire brick bottoms which are more durable than iron or steel.

Specifications—Broiler Grid 48 in. wide x 23½ in. deep. Ovens, 22 in. wide x 24 in. deep x 14 in. high. Spread of feet 54 in. wide x 34 in. deep. Height to bottom of broiler 27 in. Extreme height 67½ in. Extreme width 54 in. Shpg. wt. 1,020 lbs.

12E7528....Each, \$228.00

"GARLAND" ROASTING OVENS

Made in units of 2 and 4 ovens any number of sections can be added.

Made from 16 gauge steel. The ovens are controlled by 3 burners under each oven, which are removable from front, each oven has pilot light, lighted from front. Oven bottoms 3 thicknesses of steel with air spaces instead of insulation. Oven bottoms perforated 4 sides to speed heat circulation. Oven size 26x26x16 in. Size of roaster 21 in. wide, 34½ in. deep, 53½ in. high. Shpg. wt. 330 lbs.

12E7520...Each, \$158.00

"GARLAND" SECTIONAL HOTEL BROILER

New Sections—Any number of sections can be added. Each section fits snugly against the other. Only 30 in. are required for each section.

Combustion—Primary air intake located BELOW and IN FRONT of burners. Insures fresh cool air for burners. Cast iron radiating grates placed between burners. Throw heat downward.

Oven—Upper oven has 2 in. fire-brick bottom. Oven door rolls up out of way.

Broiler Grid—Grid turned or placed by patent, adjustable grid lever manipulator. Grid is provided with a stop.

Measurements—Broiler 23½x23½x14½ in. Oven 22x24x14 in. Spread of feet 30x43 in. Ht. to bottom of broiler 27 in. Extreme ht. 66¾ in. Wt. 520 lbs.

Body—Finished in black, polished trim.

12E7527.....Each, \$136.00

"GARLAND" TOASTER, BROILER AND GRIDDLE

Construction—Steel body, cast iron top. **Burners**—Eight tubular, of 4 burners, controlled by 2 valves at left and right sides. **Griddles**, burners and manifold easily removable.

Control—Raises or lowers grid. 8 in. forward position, 6 in. travel up or down. **Toasting and broiling Grid**—Heating surface 16x30 in., slides on adjustable guides, permits grid to be pulled out to its width. Crumb and grease drippings fall into a removable pan. Complete with stand and drip pan. **Griddle Top**—Underlining of brick. Griddle top 36x16 in. Toasting and broiler grid 30x16 in. Extreme height 18 in. Extreme width 18½ in. Extreme ht. less 18 in. Extreme ht. with angle iron legs 42 in. Gas consumption equals 150 cu. ft. per hour. **Body**—Finished in black. **polished trim.** Wt. 270 lbs.

12E7526 Mfg. Gas.....Each, \$66.00

"GARLAND" RESTAURANT RANGE

This range is made for medium heavy work in Restaurants, Churches and Boarding Houses, or places where space will not allow for the regular size Cafe Range.

Has 6 open top burners and large oven with the patented "Garland" oven bottom and extra heavy door. Construction of body and front is of 18-gauge steel. Top surface is 33 in. wide by 21 in. deep; extreme depth 30 in.; ht. from floor to cooking top 33 in.; oven 22x20 in. deep by 14 in. high.

12E7572 With oven. Wt. 265 lbs. \$62.00

12E7573 Without oven. Wt. 165 lbs. \$38.00

Same as above but furnished with high shelf which extends 19 in. above cooking top.

12E7576 With oven and high shelf. Each, \$70.00

12E7577 Without oven but with high shelf.....Each, \$46.00

"GARLAND" HOTEL HOT PLATE

For heavy duty work. Frame of heavy angle iron and durable steel, cast iron removable top grates. High grade efficient burners. May be used in sections or units, in any number desired, by placing them back to back and end to end.

On High Stand. Ht. 33½ in.

12E3642 2 burners. Top size 12x24 in. Shpg. wt. 80 lbs. Each, \$19.25

12E3643 3 burners. Top size 12x36 in. Shpg. wt. 110 lbs. Each, 23.50

On Short Legs. Ht. 9½ in.

12E3640 2 burners. Top size 12x24 in. Shpg. wt. 60 lbs. Each, 14.25

12E3641 3 burners. Top size 12x36 in. Shpg. wt. 85 lbs. Each, 18.75

"Vulcan" Economy Gas Ranges and Equipment

"VULCAN" HOT-TOP HOTEL RANGE WITH HIGH SHELF AT THE BACK

Solid, polished cast iron, French type all-hot-top. Arched construction and heavy rims on removable center rings give additional strength. Top extends over coals, protecting them from grease and breakage. Heavy four-ring burner surrounded by fire-brick. Each ring controlled by a separate cock. Burners are cored castings—no joints—no cement—no leaks.

THE VULCAN COMBINATION BROILER AND ROASTER

Built for Heavy Duty and Hard Service Burners—Heated by two "six-line" burners, each series separately controlled enabling "broil chef" to heat half or all of broiling surface as required. Heavy fire bricks over burners deflect heat downward. This construction gives a blanket of flame producing an intense heat evenly distributed over entire grid.

Broiler Grid and Lowering Device—Broiler grid of large capacity is made of heavy band iron. "Safety dogs" prevent it being accidentally pulled out of position. It is raised and lowered by a lever handle in front. All moving parts are inside. Roller bearings and counter weights make operation smooth and easy. No springs. This raising and lowering device is very simple. **Grease Pan**—A removable grease pan of heavy sheet steel is provided.

Double Walls—Sides are made double, adding strength and retaining the heat. In fact, throughout, the construction is designed to meet the severe service with a minimum of repairs and upkeep.

Roasting Oven—Above broiler. Heavy linings and rack. Counter balanced door strongly braced.

Connection—Manifold is same height as top manifold of Vulcan No. 12E7400 heavy duty hotel ranges so that direct connection can be made. Sockets are also provided for holding spreader plates which, if used, will provide "broil chef" with a handy work table.

Gas consumption per hour at 30/10ths pressure—Each burner 60 cu. ft. Total, 120 cu. ft. Shpg. wt. 660 lbs.

	Width	Depth	Height
Overall Dimensions.....	30½ in.	34 in.	73 in.
Broiler Grid.....	25½ in.	24 in.	
Oven (inside).....	24 in.	24 in.	13½ in.

12E7410F Each, \$147.00

VULCAN WAFFLE GRIDDLE AND ORDER STOVE

Combination Waffle-Stove, Griddle and Short-Order Stove. Has three waffles that can be turned out lifting. Each section is lifted off and burners easily moved for cleaning. No needed. A heavy cast iron, with grease groove 20 wide by 18 inches deep, polished, turns off perfect cakes.

A sturdy appliance that stands the hardest kind of use. Special sizes with griddles 18 inches wide by 18 inches deep as many waffle irons as can be supplied. Full in.

tion upon request. Height, 36 in. Each Waffle section is 10 in. wide. Griddle 18x20 in.

For roll warmers with white enameled steel facings on doors and side, also on necessary, and with nickel plated trimmings, will be quoted on application.

PLATE OR DISH WARMERS

WELLSVILLE BLACK POLISHED STEEL BODY

A handsome plate or dish warming closet designed for fine hotel and club kitchen outfitting. The body is made of heavy Wellsville black polished steel with polished steel facings or trimmings. Perfect rigidity is given the warmer by the strong wrought iron frame around which the body is built. Fitted with three perforated shelves, allowing a free circulation of heat to all parts of the interior, and the sliding doors are fitted with roller bearings and never stick. May be had with hinged doors, if preferred. Mounted on 6-inch polished legs and equipped with gas burners or steam coils.

HEAVY GALVANIZED IRON BODY

The body of this warmer is made of heavy galvanized iron, strongly braced and fitted with ventilating shelves. We make them with hinged or sliding doors (as illustrated) or without doors, as may be preferred. The warmers are mounted on strong legs and are arranged for gas or steam heat.

These kettles are shipped from both New York and Chicago.

NOTE—We can furnish above kettles lined by hand with 1/4-inch thick pure block tin. Write for prices.

ROASTING KETTLE

MADE IN OUR OWN FACTORY

Will roast 100 to 125 lbs. of meat at one time. Made of seamless cast iron. Tested to 90 lbs. hydraulic pressure. Full jacketed around sides. Separate jacket on bottom. Either jacket or both can be connected as desired. Fitted with detachable legs. Heavy steel hinged cover, tinned inside. Brass draw-off faucet. Made in one size: 24 1/2 in. diam., 17 in. deep. Wt. 1,020 lbs.

4E7285 Finished in white porcelain and trimmed with nickel-silver bands. Each, \$302.50

4E7284 Painted plain gray and without trimmings. Each, \$165.00

SEAMLESS CAST IRON STEAMER

MADE IN OUR OWN FACTORY

Made of heavy cast iron, with seamless steam jacket on the bottom for boiling purposes, and with perforated coil under false bottom for cooking with live steam. Can be used either way without change. Cover is made of extra heavy gauge steel and is fitted with brass vent, collar, handle and hinges that have stops to hold cover in position when opened. A deep rim on the cover fits into a groove at the top of steamer, forming a steam-tight joint which prevents the escape of the steam, also any dripping on the floor. Each steamer is furnished with substantial wrought iron stand, brass draw-off faucet and a set of heavy tin baskets with drop handles. Tested to 90 lbs. hydraulic pressure.

Bu.	Cap'y	Dimensions	Shpg. wt.	about	Price

"WEAR-EVER" ALUMINUM STEAM JACKETED KETTLES

(As Illustrated But With One-Piece Cover)

These steam jacketed kettles are made of two-thirds of the way up. Aluminum is very desirable in this style of equipment as it facilitates cleaning and has no effect upon the taste of the food. These kettles are furnished with a one-piece cover. They are also equipped with a safety valve, steam inlet, tank outlet, steam outlet, and stay bolt. Iron stand comes with kettle, making it ready to install in a short time. Steam pressure of these kettles is 40 lbs. Dimensions and specifications are as follows:

4E10100F	Cap'y 10 gal.	Diam. top inside 16 in.	Inside depth 15 in.	Ht. to top of stand 29 1/2 in.	Ht. to top of tank 37 in.	3 legs.	Steam inlet 3/4 in.	Steam outlet, 3/4 in.	Each,	\$92.20

CAST IRON JACKET KETTLE

MADE IN OUR OWN FACTORY

This kettle is splendidly made of heavy cast iron, seamless, with a jacket over the entire bottom and two-thirds of the way up the sides. It is superior to a full jacketed boiler for cooking purposes, as it boils from the bottom, which is essential for cooking soup stock. The boiler has a brass drain-off faucet, copper tinned strainer and brass hinged galvanized iron cover. Inside of kettle unground and unpolished. Tested to 90 lbs. hydraulic pressure.

Cap'y	Shpg. wt.	about	Price

The "Perfect" Steamer

Made in One, Two or Three Section Sizes

THE "Perfect" Steamer does all the things other steamers do—but it does them more efficiently and economically than they have ever been done before. It is a superlative achievement in equipment building, with automatic labor-saving, efficiency and safety features that have never been duplicated. It operates better because it is built better—it is built better because years of development work were devoted to its perfection. Hotels and restaurants where steam cooking was done in a small way or not at all, are today using the "Perfect" Steamer because it provides what they could never find before—a truly safe, durable and thorough steamer of large capacity. Hospitals everywhere prefer it. It handles a maximum amount of work with a minimum upkeep. Built with exceptional strength, its simple, massive lines indicate its great durability.

Made In Our Own Factory

Master-Made Equipment

Satisfied Users Are Found Everywhere!

The "Perfect" Steamer can be found in kitchens the country over, famous or obscure, great or small. The operators have bought it because it was the best and the most economical in operation.

Details of Construction

Automatic Steam Control shuts off steam when door is opened and turns on steam when door is closed. Eliminates danger of scalding.

Patented Sliding Shelves move in and out automatically as doors are opened and closed. Contents of basket can be inspected without touching baskets.

Solid One-Piece Frame. Body is boiler plate steel of great strength. Back and sides are one piece securely welded to front, top and bottom. All sizes built alike; no sections, no cracks to catch grease or dirt.

Tight Doors. Special composition gaskets are vulcanized when steam is first turned on. Special adjustment allows for taking up when gasket becomes worn. Positive door locks.

14E7292 1 section, 24x24x15 in. inside. Includes 1 wide flat basket, perforated; 1 narrow tall basket, perforated; 1 narrow tall basket, not perforated. Shpg. wt. about 600 lbs. **\$165.00** Complete,

14E7293 2 sections, each 24x24x15 in. inside. Includes 1 wide flat basket, perforated; 1 wide flat basket, not perforated; 2 narrow tall baskets, perforated; 1 narrow tall basket, not perforated. Shpg. wt. about 850 lbs. Complete, **\$275.00**

14E7294 3 sections, each 24x24x15 in. inside. Includes 1 wide flat basket, perforated; 1 wide flat basket, not perforated. 4 narrow tall baskets, perforated; 1 narrow tall basket, not perforated. Shpg. wt. about 1,100 lbs. Complete, **\$390.00**

White Enameled Steamers. For hotel, hospitals, cafeterias, etc., with show kitchens. Prices on application.

Vinoy Park Hotel, St. Petersburg, Fla.
Wisconsin General Hospital, University of Wisconsin, Madison, Wisc.

Showing two of the "Petersen" Urns in The Smith Recreation Lunch Room, Cleveland, Ohio.

Showing 3 of the 5 "Petersen" Urns in use in The Hotel Sherman, Chicago, Ill.

The "Petersen" is a combination coffee and water urn. A space saver and a coffee saver. Water jacket is separated from coffee jar by air chamber. Air chamber prevents excess heat or cold from reaching coffee jar, keeping the coffee at an even temperature for long periods of time. Coffee cannot boil and will not chill. Water in jacket must be boiling before coffee brew can be made. This insures proper brewing of coffee and the greatest economy. Turn of valve handle at left side of urn allows only as much boiling water to spray over coffee as coffee jar will hold. No overflow of jar. No re-pouring necessary. All desirable flavor is extracted from coffee by first spray. 3 1/4 gal. of restaurant coffee from the pound is the usual result. Monel metal percolator rests clear, above jar—no chance for coffee grounds to touch brew. Either filter paper or linen bag may be used. Special type water supply valve automatically opens overflow standpipe when water inlet is opened, preventing possible collapse of urn and overfilling of water jacket.

Heavy fine construction. Handsome appearance. Body 40 oz. cold rolled copper, heavily nickel plated. Bottom 48 oz. cold rolled copper. Hinged cover. 100 sheets filter paper and 1 linen bag included with each urn.

For Gas	For Steam	Coffee Cap'y	Diam.	faucets	incl. closed	Height of urn cover open	Shpg.wt.	Price

Wattages given are based on supplying cold water in coffee urn. If hot water supply can be used we can reduce the wattage. Kindly notify us when ordering which you intend to use.

OUR "SPECIAL" TWO-URN BATTERIES

General construction same as for Single Urn described above. Water urn is a pressure urn and when finished for gas has tubes running through it so heat from burner is applied not only at bottom but also through tubes which penetrate the body of water in several places. This greatly increases the heating surface and the speed. Steam heated urns are supplied with retinned copper steam coils. Urns for gas are furnished with gas burners. Electric urns include heating elements and have 3-heat switches. The following prices are for urns only. Stands not included but are priced separately on these pages.

PIX "CHICAGO" TWO-URN BATTERIES

General Construction same as for Single Urn described above. Water Urn is a pressure urn and when furnished for gas has tubes running through it so heat from burner is applied not only at bottom but also through tubes which penetrate the body of water in several places. This greatly increases the heating surface and the speed. Steam heated urns are supplied with retinned copper steam coils. Urns for gas are furnished with gas burners. Electric Urns include heating elements and have three heat switches. The following prices are for urns only. STANDS NOT INCLUDED BUT ARE PRICED SEPARATELY ON THESE PAGES.

Capacity of Coffee Urns	Total Capacity of Hot Water Urns	Capacity of Water Shown on Gauges	For Gas	For Steam	For Electricity

Unless otherwise specified, gas heated urns will be supplied with burners for manufactured gas. Gasoline Heaters. Burners have nickel plated 1 gal. tank. Gasoline heaters are not guaranteed and are recommended for use only if a regular supply of high grade gasoline is available and if burners will be kept very clean. 14E926 Wt. 4 1/2 lbs. Attached to urn, \$13.25. Not attached, \$11.00. In ordering electrical equipment be sure to state your voltage and current, cycle and phase. This information should be secured from your power company.

ELECTRIC PERCOLATING COFFEE URNS

This fixture is for use where a set of coffee and water urns is impracticable. The coffee is made by percolation, resulting in a pure amber brew. Six to eight ounces of ground coffee is sufficient for making 1 gallon of coffee. Body of urn is made of heavy gauge polished copper, highly nickel plated, fitted with nickel-plated brass faucets, legs and gauge glass guard. The coffee interior is pure vitrified china. At top of urn is a Monel Metal leacher and water spreader. The electric heating element is in the center of the urn bottom and is readily accessible. A three-heat indicating snap switch at the lower edge of the urn insures positive control of the heat and a pilot light shows when the current is on. Supplied with 6 feet of flexible cord.

110 or 220 volts. Specify which is wanted.

CHOCOLATE AND COFFEE URNS

The most modern and improved chocolate urn on the market sold at a moderate price. Designed and built in our own factory. Body of cold rolled copper, heavily nickel plated and highly polished. Rolled edges with heavy wire insertion. All connections which come in contact with coffee are plated or tinned, and of sanitary design. Clean-out type faucets with castings made much larger than are used on most other urns. Large opening to fill cups quickly. Faucets are nickel plated. Extra large grip handles of polished wood. Jar base extra strong to support the vitrified stone coffee jar. Tight fitting cover. Made heavy enough to hold its shape after long service. Rolled edge. Gauge glass protected by extra strong guards. Glasses can be easily replaced, if necessary. Agitator for chocolate. Consists of heavy tinned geared dasher and rod for keeping chocolate mixed at uniform consistency.

A WORD ABOUT QUALITY

As you look through the pages in this catalog, bear in mind that our merchandise is made expressly for public service and should under no circumstances be confused with the ordinary grades sold for domestic use. Ours is the biggest concern in the world engaged in supplying Hotels, Restaurants and other Public Service Establishments. Our merchandise must, therefore, be of an extra durable quality to stand the wear and tear of public use. In buying from us you are assured of dependable and proved quality at lowest possible prices.

RANGE CANOPIES, PAN RACKS

"BAIN MARIE" PAN
"BAIN MARIE" OUTFIT

STANDARD CANOPY OR HOOD

These canopies of unequalled value fit any requirements. For use over ranges, kettles, steamers, coffee urns, etc. Collars furnished for flues. Each canopy includes chains for hanging, for 14 ft. ceiling unless otherwise specified. State height of ceiling and whether of wood, tile or concrete.

WITH MITERED ENDS

Made of Black Steel, Finished With Black Japan Paint

	Length	Width	Height	Shpg. Weight	Each
14E1611	5 ft.	4 ft.	2 ft.	120 lbs.	\$46.75
14E1612	6 ft.	4 ft.	2 ft.	135 lbs.	53.00
14E1613	7 ft.	4 ft.	2 ft.	150 lbs.	58.50
14E1614	8 ft.	4 ft.	2 ft.	165 lbs.	65.00

MASTER-MADE" STEAM TABLE OUTFITS

OUR "GEM" STEAM TABLE

Lunchroom or Restaurant Size Has 6 Eight Quart Vegetable or Soup Jars with Covers and Retinned Copper Meat Pan with Revolving Cover

Price **\$74.50**
Each.....

Our special lunchroom or restaurant size steam table, made up and carried in to meet the demand for a standard steam table equipment suitable for lunch and small restaurants, or for use where only a limited space is available for installation.

Frame or stand of the "Gem" Steam Table is made of heavy angle iron, strengthened by a galvanized lower shelf and secured at the top by riveted braces. The top water pan are made of heavy cold rolled copper, reinforced by a heavy band iron support in the center. This water pan is provided with two improved gas burners heating and has a brass waste cock at the end for draining. The table is fitted with 6-8-qt. enameled steel vegetable or soup jars with covers, and a 10 x 20-inch retinned copper meat pan with revolving or telescoping cover. At the front of the table is a heavy, carving board 8 inches wide and running the full length.

Table is 42 in. long, 28 in. wide, including carving board, and 34 in. high. Shpg. wt. about 150 lbs.

8810.....Each \$74.50

SMALL STEAM TABLES

Table is made of heavy cold rolled copper, tinned inside. Has 12x20x2 1/4 in. white porcelain enameled steel meat pan, with copper lift cover, two 8 qt. stone soup or vegetable jars with heavy spun covers. Table is 30 in. long by 22 in. wide. Water pan is 3 1/2 in. deep. Shpg. wt. about 75 lbs.

We recommend copper meat pans and covers.

14E1129 Made of heavy copper, with white porcelain enamel steel meat pan and copper covers. Each, **\$56.50**

14E1120 Made of heavy copper with tin meat pan and covers. Each, **\$43.00**

Table is 42 in. long by 22 in. wide with water pan 3 1/4 in. deep. Equipped with two white porcelain enamel meat pans, each 20 in. long by 12 in. wide by 2 1/4 in. deep and with oblong polished copper lift covers; and two 5 qt. vitrified stone vegetable pots (with polished copper covers). Covers are tinned on inside. Shpg. wt. about 90 lbs.

14E1115 Table and covers of heavy cold rolled copper. Each, **\$72.50**

STEAM TABLE POTS, PANS AND COVER

BROWN ENAMELED VEGETABLE POTS

The most universally used steam table vegetable pot on the market—every chef knows the quality. Made of seamless steel, enameled white inside and a rich brown color outside. This quadruple-coat enamel is baked on under tremendous heat and is impervious to food acids and juices, being, therefore, absolutely sanitary.

PASTRY CASES, DISPLAY STANDS COUNTER PROTECTORS, STEAM TABLE WARE

"SANITARY" PASTRY CASES FOR USE ON BACK COUNTERS

USED FOR COMPLETELY EN-
CLOSING ALL PASTRY GOODS,
PIES, ETC., AND IS MADE
TO SET ON BACK COUNTER.

\$113⁵⁰ AND UP

Very strong construction; made with offset joints, not soldered. Ht. 24 in., depth 16 in. Top is clear plate glass with polished edges, resting on green felt. Ends are heavy plate glass in framework. Interior is equipped with plate glass shelf 12 in. wide, on adjustable nickel plated brackets and standards. Front enclosed with heavy plate glass doors, without wood frames, that slide on rollers set in lower framework, perfect sliding action. All framework, top back, is covered with nickel-silver sheet metal, giving a very rich appearance. Furnished without bottoms so they can be used on counters with white tops or finished wood tops that serve as bottoms. Made to order in about 4 weeks. Shpg. wt. per running ft. about 20 lbs.

Made also with wood framework and back with wood frame, doors on one side, without nickel-silver covering and in other styles and finishes. See list below.

Nickel-Silver, with Doors on One Side
4E1900 5 ft. long. Each, **\$127.50**
4E1901 6 ft. long. Each, **154.00**
4E1902 8 ft. long. Each, **206.75**

Nickel-Silver, with Doors on Both Sides
4E1905 5 ft. long. Each, **\$169.50**
4E1906 6 ft. long. Each, **203.50**
4E1907 8 ft. long. Each, **270.50**

Oak Framework, with Doors on One Side
Made of quarter-sawed oak, golden oak finish.
4E1910 5 ft. long. Each, **\$113.50**
4E1911 6 ft. long. Each, **136.50**
4E1912 8 ft. long. Each, **181.50**

Oak Framework, with Doors on Both Sides
Made of quarter-sawed oak, golden oak finish.
64E1915 5 ft. long. Each, **\$153.00**
64E1916 6 ft. long. Each, **183.50**

Special sizes and widths can be furnished for unusual cafeteria and lunch room arrangements, if required. Prices on application.

COUNTER PROTECTORS

FOR DAIRY
LUNCHEES,
CAFETERIAS AND
CANDY STORES

\$4⁹⁰ AND UP

For use in dairy lunches, cafeterias and candy stores. Prevents customers touching the stock and at the same time puts merchandise in view for inspection. Constructed of 1/4 in. polished plate glass, securely held in polished nickel-plated brackets with clamp attachments to fasten them to the counter top, provided the top overlaps 1 1/2 in. or more. If there is no overlap of counter top, brackets can be furnished to fasten with screws to the top. Can be furnished with full return ends, or with ends that return as far as the rear edge of the top glass. Will ship with brackets that clamp to edge of counter and return ends same width as top glass unless otherwise specified. Shpg. wt. approx. 30 lbs. per run. ft.

Prices quoted per ft. in lengths of 6 ft. and over.

70E523 8x8 in. Run. ft. **\$4.90** 70E526 14x12 in. Run. ft. **\$6.75**

4E9677 Extra Food Pans, 11½x16 in. (See page 150) (Doz. \$14.25) Each, \$14.25

FRUIT AND SALAD PAN WITH GLASS BOWLS

3 Bowl Size

\$ **42.00**

The most practical and economical method of keeping fruits and salads cool. Outside pan is made of heavy nickel-silver with air-tight seams, and the walls are heavily insulated, thus retaining the cold and preventing the rapid melting of the ice. The bowls or containers are heavy crystal glass with glass covers and have a cap'y of 2 qts. each. The bowls and pans set into holes coming in direct contact with the ice. The pan has a waste outlet with drainage.

X "CHALLENGE" COMBINATION COOLER

FOR ICE CREAM, MILK, CREAM AND WATER

Construction—Coolers built of selected wood, painted with gray enamel. Compressed hard insulation. White porcelain enameled steel facing, bound with nickel-silver. Covers and tops of nickel-silver, highly polished. Butter chip drawers and compartment heavy construction with nickel-silver facing, heavy hardware. Plated draft arms, best construction. Ice cream, milk and cream cabinets lined with heavy tinned copper. Large water coil. Milk, cream and water cooled by one compartment provided with overflows and drain connections. Adjustable enameled legs. The coolers illustrated may be had with ends faced with white in enamel, nickel-silver trim, at extra charge.

Made
in Our
Own
Factory

Automatic glass-filling faucets, as illustrated on page 145, may be had on any of these draft stands, if desired

Made in Our Own Factory

FIVE FOOT COOLER

Ice cream compartment and milk compartment each have standard galvanized cylinder can. Cream compartment has 2 gal. tinned copper cream can. Draft arm for with drain under faucet. Two butter drawers to keep butter cool and ready for use. Large storage compartment below for brick butter, etc. Ice cream, milk, cream and water supply all kept cool at same time.

14E1328 Illustrated above. Length 5 ft., width 2 ft., ht. 3 ft. Shpg. wt. 600 lbs. Each, **\$323.50**

MILK PUMP

Heavily made and silver plated. Handsomely designed and with 11 in. round plate to rest on top of cabinet. Total ht. 29 in., 20 in. of which is below top of cabinet. Ht. from top of cabinet to under side of outlet of spout, 7 in. Shpg. wt. 20 lbs.

14E606 Milk Pump complete. Each, **\$35.00**

CREAM PUMP

Made of metal and heavily silver plated. A dash of the plunger causes cream to emit from spout. Total height 22 in. Ht. from top of cabinet to outlet of spout when pump is mounted on collar, 6 1/4 in. Pump extends 13 1/4 in. below top of cabinet.

14E607 Cream Pump only. Shpg. wt., 11 lbs. Each, **\$13.50**

COLLAR FOR CREAM PUMP

14E608 Collar shown in illustration, for use with cream pump. Ht. 5 1/4 in., diam. 7 1/2 in., to fit properly over our 2 gal. cream cans. Shpg. wt. 6 lbs. Each, **\$6.00**

Cream Pump and Collar

FIVE FOOT COOLER WITH WALL SHIELD

14E1329 5 ft. cooler with wall shield and cream pump, as illustrated above. In other details same as No. 14E1328 described at left. Shpg. wt. 675 lbs. Each, **\$332.50**

WALL SHIELDS OR SPLASH BACKS

14E610 Wall shield, as illustrated above, complete with one adjustable shelf. Wall shield, 5 ft. long 3 1/2 ft. high. Shpg. wt. 75 lbs. Each, **\$67.50**
14E611 Wall shield, 6 ft. long, 3 1/2 ft. high. Shpg. wt. 90 lbs. Each, **74.50**
14E612 Wall shield, 7 ft. long, 3 1/2 ft. high. Shpg. wt. 105 lbs. Each, **97.00**
14E613 Wall shield, 8 ft. long, 3 1/2 ft. high. Shpg. wt. 120 lbs. Each, **106.00**
14E614 Wall shield, 10 ft. long, 3 1/2 ft. high. Shpg. wt. 150 lbs. Each, **129.80**

Wall shields longer than 5 ft. may be used back of a 5 ft. or smaller cooler and the adjoining fixture, or back of one of the longer combination coolers shown below. Wall shields also supplied with two or more shelves, if desired. For details of milk pump and cream pump see description at left.

SIX, SEVEN AND EIGHT FOOT COOLERS

Made in Our Own Factory

The larger sizes in the "Challenge" construction are built of the same materials as the 5 ft. size No. 14E1328, but have additional water, ice cream, milk, butter and storage service.

14E600 6 ft. Cooler complete, same as No. 14E1328, but with double ice cream compartment. Shpg. wt. 725 lbs. Each, **\$298.00**

14E602 7 ft. Cooler complete, same as No. 14E600, but with double milk compartment. Shpg. wt. 850 lbs. Each, **\$354.00**

14E604 8 ft. Cooler complete, same as No. 14E602, but with draft stand, storage compartment and set of butter drawers at each end. Shpg. wt. 960 lbs. Each, **\$471.50**

14E605 8 ft. Cooler complete, as illustrated at left. Double draft stands at each end. White porcelain enameled steel, nickel-silver facings, butter drawers and storage compartments both sides. 2 milk pumps and one cream pump. Shpg. wt. 1040 lbs. Each, **\$714.50**

No. 14E605 Eight foot combination cooler complete.

Can also be had with ends faced with white porcelain, nickel-silver trim at an extra charge. Six and seven foot coolers can be had with double draft stands for service on both sides and with white facings on both sides. Prices on application. Wall Shields can be used with all sizes of coolers. See illustration and description above. Milk Pump and Cream Pump shown and priced above.

WATER AND COMBINATION COOLERS

"Buffalo"

COMBINATION CREAM, MILK AND WATER COOLERS

"New York"

This excellent combination cooler is made of heavy cold-rolled copper stock with flanged base and end handles for lifting. The interior is lined with galvanized iron and is divided into three compartments for milk, cream and ice water. The space between the outer and inner wall is filled with charcoal. Each compartment has a heavy cleanout style lever faucet with a metal name plate above, each showing the compartment it reaches, and each compartment has a separate tight-fitting cover, so that one may be cleaned or refilled without opening the others. The entire cooler is heavily nickel plated and polished.

Dimensions: 23 inches long, 15 inches deep, 20 inches high.
 Milk cap'y Cream cap'y Ice Water cap'y Each
 14E8709... 3 gallons... 5 gallons... \$84.50
 Shipped from New York stock

White porcelain enameled cream and milk containers. Body of galvanized steel, hard white painted enamel finish, double walls. Heavy nickel plated clean-out type faucets. Heavy nickel-silver shield. Nickel plated trim, white enamel legs.

14E312 Cap'y 10 gal., divided for 3 gal. milk, 1½ gal. cream, 5½ gal. water. Length 22 in., width 15½ in., ht. 25 in. Shpg. wt. about 80 lbs. Each, \$42.00

14E313 Cap'y 15 gal., divided for 3 gal. cream, 4 gal. milk, 8 gal. water. Length 25½ in., width 15½ in., ht. 26 in. Shpg. wt. about 85 lbs. Each, \$47.00

14E314 Cap'y 20 gal., divided for 4 gal. cream, 5 gal. milk, 11 gal. water. Length 29 in., width 16 in., ht. 28 in. Shpg. wt. about 95 lbs. Each, \$51.75

This beautiful fixture is especially designed for high class restaurants, cafeterias and lunch rooms.

The body is made of opalite white glass, the frame, mountings and covers being heavily nickel plated. The cooler has three inner receptacles for cream, milk and ice water, each compartment having a separate lift cover and a type nickel plated lever handled faucet. The inner receptacles are made of heavy copper thoroughly tinned inside. The space between the outer wall and inner containers is filled with ground charcoal.

THE LYONS SANITARY COLD MILK URN

The cream in milk rises to the top and when milk is served from an ordinary urn, the first servings get only skim-milk from the bottom of the urn. The illustration at the right shows the vital principle of the Lyons Milk Urn. The faucet is located at the bottom and the milk is drawn, of course by gravity. A narrow floating tube leads up to the cream at the top, joined at its lower juncture with the larger aperture through which the bottom (or skimmed) milk flows.

When the faucet is turned, both inlets permit a flowing of the beverage through them—a small but correct percentage of cream being drawn from the top, as a larger percentage of skimmed milk flows from the bottom. Both streams flow into the glass, or receptacle, simultaneously, resulting in a proper mixture of milk and cream at each and every turn of the faucet. As the urn empties, the cream tube sinks correspondingly so that the action repeats, until the last drop is drawn. This arrangement is the important and exclusive feature of all Lyons Urns.

All parts can be disassembled, cleaned, and restored in a few seconds. There are no pockets or crevices to collect germs or to sour the milk. The urns have a double side wall and bottom, heavily insulated with cork. This insulation suffices to keep the contents cold for several hours without ice and prevents sweating on the outer wall. A removable ice chamber is furnished, to be used when desired. The cover has a double shoulder, inside and out, which effectively excludes all dirt, dust, flies, germs, or foul odors.

LYONS COLD MILK URN

Equipped with the removable floating tube. Made of heavy nickel-silver outside, copper, tinned inside. 2-in. cork insulated walls. Removable ice chamber.

Shipped from New York City

4E4802F	40 qt. size.....	Each, 150.00

LYONS CREAM DISPENSERS WITH MEASURING FAUCET

With the Lyons Cream Dispensers in use, you curb all waste, time and labor. Every drop served is measured accurately; for instance, if one ounce of cream is enough for a cup of coffee, you will serve 16 measures out of a pint of cream while with the "guess" method you use twice the quantity of cream.

This saving alone will more than pay for the urn.

Lyons measuring faucets are made with Duplex Measuring Barrels, that measure with just one turn of the handle; by that we mean, one barrel fills while the other barrel is measuring, thus serving cream in one-half the time of other make faucets which are made with a single measuring barrel and require two turns of the handle, one turn to fill and the other to empty.

LYONS COMBINATION DISPENSERS

Shipped from New York City

LYONS CREAM DISPENSER With Measuring Faucet

Shipped from New York City

Its distinctive feature is the measuring faucet, so constructed that a single turn of the handle, either up or down, dispenses an exact portion of cream. Nickel-silver outside, heavy copper interior, thoroughly tinned. 2-in. cork insulated walls. Removable ice chamber. Made to deliver ¼ to 2 ounces of cream—be sure to specify the exact size portion you desire to serve.

64E903 Quarter-sawed oak counter with finished wood top. Per lineal foot, **\$12.50**
64E904 Birch, mahogany finished counter with finished wood top. Per lineal foot, **\$11.50**
64E905 Four compartment silver drawer to fit any of the above counters. Extra each, **\$5.00**
64E906 12 in. single pie compartment to fit any of the above counters. Extra each, **\$15.00**
64E906A 24 in. double pie compartment to fit any of the above counters. 2 doors. Extra each, **\$21.50**
64E906B 36 in. triple pie compartment to fit any of the above counters. 3 doors. Extra each, **\$28.00**

- 64E907** 1/4 in. white glass top, instead of wood, for above counters. Extra per lineal foot, **\$1.00**
64E908 1/4 in. white Carrara glass top, instead of wood, for above counters. Extra per lineal foot, **\$1.00**
64E909 1 in. white Carrara glass top, instead of wood for above counters. Extra per lineal foot, **\$1.00**

Prices Are Figured on Basis of No Less Than 10 Ft. Lengths.

NOTE: When glass top counter is ordered, the wood top is omitted. The special price is only when glass top is ordered with counter. Glass top cannot be furnished alone at this price.

OUR "MODEL" LUNCH COUNTER

A lunch counter, suitable for high class restaurants. Made of the best materials with ends constructed of 5-ply, vertical grained panelwork, 3/4 in. thick, vertical grained. Width of top 1 ft. 10 in., height of counter 3 ft. Rear of counter has two wooden shelves, bottom one being approximately 6 in. from front of counter. Front of counter is furnished to set on 6 in. high white porcelain legs. Where a finished wood top is used, front of same is doubled up to give it the appearance of a 1 1/4 in. thick top. Four-compartment wooden silver drawer to be placed under top as close together as desired. Also pie compartments, with hinged screen can be furnished to go underneath the counter if so desired. Sizes on pie compartments are all lengths. Shpg. wt. per running foot approximately 35 lbs.

GUARD RAILS, POSTS, FOOT RAILINGS BRACKETS and CAPS

GUARD RAIL POSTS

Made of square tapered cast iron with broad flange base. Holes drilled for fastening to floor. Top of post decorated by large brass ball, highly polished. Ht. over all 42 in. Shpg. wt. about 60 lbs.
42E195 White enameled. Each, **\$18.00**
42E196 Verde antique. Each, **\$13.75**

GUARD RAIL ROPE AND CAP ENDS

Mercerized cotton, silky finish, 1 1/4 in. in diam. Green, dark red, brown or dark blue or any other color desired. When measuring, allow 1 in. extra for slack. Made to order and not returnable for credit. Wt. not pkd. about 6 oz. per ft.

- 33E3546** Rope without cap ends. Per ft., **\$0.95**
33E3547 Brass cap ends only. Each, **\$1.40**
33E3548 Crocheted cap ends only. Each, **\$1.25**

GUARD RAILS

Iron Rail—Black iron pipe, 1 1/4 in. outside diam., supported at 6 ft. intervals by up-rights of same material.

Fittings at top and flanges for floor included. Furnished in a variety of finishes, painted. Wt. not pkd. about 4 lbs. per lineal foot.
14E2102 Black painted.
14E2103 Gray enamel painted.
14E2104 Verd green painted.
14E2105 Aluminum painted.

Brass Rail—2 in. outside diam., with 36 in. uprights at intervals of 5 ft.
14E1934 Polished brass. Per lineal ft., **\$3.30**
14E1935 Nickel plated brass. Per lineal ft., **\$4.40**

Brass Rail—Similar to above, only single round post with ball top. (See illustration on page 221). Highly polished. Diam. 2 in., 36 in. high. With 1, 2 or 3 hooks for fastening cord to post. State how many hooks, and on which side they are to be placed, otherwise post with one hook will be shipped.

- 33E3545** Brass finished. Each, **\$7.70**
33E3549 Oxidized and nickel finish. Each, **\$9.40**

Per lineal foot **\$1.20**

Brass Railing. Regulation cross rails, made of 18 gauge brass, brazed and highly polished. Can be furnished in 14 ft. lengths or less.

BRASS HINGED FOOT RAIL BRACKET

- 14E2128** Brass. Opening 1 1/4 in. floor to top of rail 9 1/2 in. wall to inner edge of rail 9 in. Wt. 2 1/4 lbs. Each **\$2.75**
14E2129 Brass. Opening 2 in., floor to top of rail 9 1/2 in., wall to inner edge of rail 9 in. Wt. 2 1/4 lbs. Each, **\$3.20**

NOTE—Prices for brackets do not include bolts or screws.

BRASS FOOT RAILINGS AND CAPS

- 14E2108** 18 Gauge Brass Rails Outside diam. 1 1/4 in. Wt. about 1/2 lb. Running ft. **90c**
14E2109 Outside diam. 2 in. Wt. about 1 lb. Running ft. **95c**
 Extra for curving pipe to fit lunch counters. Each curve, **\$2.75**

Brass Foot-Rail Cap to Fit Above Brass Rails

Made of brass, polished. Fits inside of rail and is driven or pushed into position.
14E2113 Outside diam. of rail which this cap fits 1 1/4 in. Wt. 4 oz. Each, **60c**
14E2114 Outside diam. of rail which this cap fits 2 in. Wt. 5 oz. Each, **70c**

NOTE—In ordering railing state distance from bracket to bracket along the entire section to be fitted, so we will know in what lengths to cut. Railings cut to your special order are not returnable.

Galvanized Iron Railing. Made of iron pipe, galvanized, thickness of metal 3/16 in. Furnished in 20 ft. lengths or less.

GALVANIZED IRON FOOT RAIL OR ARM RAIL BRACKET

- With double shank iron galvanized.
14E2134 Dia. opening 1 1/4 in., distance wall or floor to outer edge of top of rail 7 in. Wt. 1 1/2 lbs. Each, **\$3.20**
14E2139 Dia. opening 2 in., distance wall or floor to outer edge of top of rail 7 in. Each, **\$3.20**

GALVANIZED IRON RAILS

(Read note below)

- 14E2100** Outside diam. 1 1/4 in. Wt. about 1/2 lb. Per lineal ft. **90c**
14E2101 Outside diam. 1 3/4 in. Wt. about 3/4 lb. Per lineal ft. **95c**

GALVANIZED IRON CAPS

To screw onto ends of iron foot rails.
14E2117 For iron rails of 1 1/4 in. diam. Wt. 4 1/2 oz. Each, **60c**
14E2118 For iron rails of 1 3/4 in. diam. Wt. 6 oz. Each, **70c**

NOTE—In ordering railing state distance from bracket to bracket along the entire section to be fitted, so we will know in what lengths to cut. Railings cut to your special order are not returnable.

PIX FAMOUS "CHALLENGE" LUNCH AND CAFETERIA COUNTERS

HUNDREDS of feet of these cafeteria and lunch counters are in construction in our factory at all times, while the number of those in use total **miles** in length. Shipments to various parts of the country are made almost daily. Our mechanics are experts in their trade. Each job is laid out and planned with great skill. Quantity production enables us to carry many parts in stock, ready for use on all standard style jobs. The issue of these parts to the mechanics' benches is planned in advance to reach the proper point at the precisely correct time. In this manner and only in this manner can costs be obtained that make our low selling prices possible for such high grade counters.

Pix "Challenge" Cafeteria and Lunch Counters are constructed of steel, finished in white porcelain enamel, with nickel-silver trim. Counter supplied with 2 galvanized steel shelves (counting the bottom as one), except on Cafeteria counters where steam tables, salad pans, etc., fit in. At these points only bottom shelf will be supplied. Counters made straight or with angle turns.

CAFETERIA COUNTERS

Ht. 36 in. Width 30 in. Complete with 2 bar slide rail of nickel-silver tubing with nickel plated brackets.

4E1347 With ¾ in. Carrara white glass top. Shpg. wt. per running ft. 175 lbs.	Running ft.	\$24.00
4E1348 With 1 in. Carrara white glass top. Shpg. wt. per running ft. 190 lbs.	Running ft.	25.00
4E1353 With ¾ in. Vitrolite or Opalite white glass top. Shpg. wt. per running ft. 170 lbs.	Running ft.	23.00
4E1354 With 1 in. Vitrolite or Opalite white glass top. Shpg. wt. per running ft. 185 lbs.	Running ft.	24.00

Checkers' and Cashiers' Desks to match the above counters are also supplied separately or built on to counter, with or without slide rails at front. Prices on application.

LUNCH COUNTERS

Have standard apron and overhang at front (as on all lunch counters) to allow for knee room. Ht. 36 in. Width 22 in.

14E1350 With ¾ in. Carrara white glass top. Shpg. wt. per running foot 145 lbs.	Running ft.	\$22.00
14E1351 With 1 in. Carrara white glass top. Shpg. wt. per running ft. 180 lbs.	Running ft.	24.00
14E1355 With ¾ in. Vitrolite or Opalite white glass top. Shpg. wt. per running ft. 140 lbs.	Running ft.	20.00
14E1356 With 1 in. Vitrolite or Opalite white glass top. Shpg. wt. per running ft. 175 lbs.	Running ft.	21.00

High Counters, Coffee Shop Counters or counters for similar special usage are also produced in the above style. Usual height 42 in. Prices on application.

COLORED PORCELAIN ENAMEL EQUIPMENT

We can furnish counters and other fixtures with porcelain enameled steel panels of different color combinations. Trim is enameled to match. In the counter illustrated a color scheme of gray has been carried out. The background is light gray with a border design of dark gray, dark gray trimming and gray glass top. Gray and dark blue forms an attractive combination, or two tones of green with white glass top. These combinations will make very handsome pieces of equipment which will add to the appearance of any lunch room. A color chart containing the various color schemes will be sent upon request. A distinctive lunch room or cafeteria can be built at a slightly higher price than that for white enamel work. **PRICES ON APPLICATION.**

HOW TO FIGURE COST OF COUNTERS

Cross Section of Finished End of Cafeteria Counter

Prices for counters are figured by adding the outside dimensions together, thus securing the total distance around from one front corner to another. Then multiply the distance by the price per running foot. This doubles the corner which is correct, to compensate for the extra cost of corner construction. Any obtuse angle adds to the cost an amount equal to the price for two lineal feet of counter.

Cross Section of Finished End of Lunch Counter

PORCELAIN ENAMEL COUNTER SET-UP

Prevent salt and pepper, sugar, catsup, vinegar, etc., from being knocked off counter. Open side faces customer. Two 1½ in. lugs for fastening to wood or san-onyx counters. Made of cast iron. Ht. 3¾ in., width 4½ in., length 12½ in. Wt. 5 lbs.

The beautiful Coffee Shop in the new Hotel Mayfair, St. Louis, Mo.

Representative Installations

THE illustrations on this page show a few of the hundreds of fine cafeterias and lunch rooms throughout the country that we have equipped. This record is due not only to the high quality of our equipment, but also because the size of our manufacturing facilities makes possible quick service and our ability to produce any size or type of counter equipment.

"FASPRAY" ELECTRIC DISHWASHERS

"Faspray" is the result of a practical knowledge of dishwashing operation problems red by years of experience in this important department of the restaurant and hotel less. Its operation, while extremely simple, is entirely efficient and, as the name es, is remarkably speedy. The "Faspray" Dishwasher cuts water and washing- ound bills in half, eliminates rust and corrosion, saves floor-space in the wash-room, ssures the thorough cleansing of dishes.

"Faspray" is a **basket type** machine, the soiled dishes to be washed being placed ecially constructed wooden racks or "baskets," which hold the various pieces firmly sition as they are sent through the machine under the powerful washing and rinsing s.

DURABLE
"Faspray" insures life and freedom from rust and corrosion because it is constructed hroughout of **Copper, Bronze and Brass**. These qualities would be impossible to n if galvanized iron or any similar material were used.

ECONOMICAL
ervation of water and washing compound is accomplished by means of the ex- e, automatic "Faspray" final rinsing control and the special overflow device. It a substantial cut in dishwashing "overhead."

SIMPLE TO OPERATE
operator pushing the basket into the "Faspray" Dishwasher completes the only tion necessary to wash, rinse and final rinse the dishes. The necessity of opening shutting doors, turning off and on wash and rinse valve, starting and stopping yors; is entirely eliminated.

EASILY CLEANED
positive and quick cleaning feature of the "Faspray" machine is the result of the ally designed manifolds located above and below the dish racks and which can be l against the side of the machine. This permits of thorough cleaning of tanks. folds are also provided with swing caps so the spray tubes can be flushed and ed.

SAVES FLOOR SPACE
"Faspray" machines are 24 in. wide and so constructed that they can be placed et the wall. The motor, pump and cleaning door are at the front of machine.

HEAVY DUTY MODEL—CAPACITY 20,000 PIECES PER HOUR

This big heavy-duty "Faspray" model is designed especially for use in the larger hotels, restaurants, industrial feeding plants, etc. Economical and simple in operation, this machine will perform life-long service, due to the fact that it is constructed of materials that are not affected by water, acids or grease. The "Faspray" produces maximum results at a minimum of expense.

SPECIFICATIONS

These Dish Racks are made of selected, clear and dry Maple, free from knots. The corners are reinforced with galvanized iron and the all around strong construction will give entire satisfaction.

Crescent GLASS AND

WASH, RINSE AND DRY SAVE TIME, LABOR AND BREAKAGE

The "Crescent" requires no skill to operate it. The least intelligent type of kitchen girl can use it without supervision. There are no delicate breakable parts or complicated mechanisms to get out of order. The upkeep of the machine is practically nothing—the saving it effects, tremendous. A "Crescent" working for you in your kitchen will save many of the dollars you now lose in broken dishes and unnecessary labor.

MODEL "K"—Capacity 1,500 Dishes or 2,000 Glasses Per Hour

MODEL "K"

MODEL "MM"

ANYONE CAN OPERATE A "CRESCENT"

Here's How It Works: The dishes, cups, glasses and silverware are first packed in specially constructed wooden racks. A filled rack is then placed inside of tank which closes water tight. A pull of the lever at top of the cabinet and under high pressure provided by motor and centrifugal pump, hot soapy water is hurled at the dishes from every possible angle through swiftly revolving wash arms and reflectors. This action strips and melts all grease and food particles from the surface of the dishes. Another pull of the lever and instantly hot, scalding water fresh from the boiler douses and rinses the dishes thoroughly, sterilizes them and heats them so that they dry instantly. The refuse from the dishes is washed onto the screen above the water tank, thus preventing clogging of the drain pipes. The double revolving wash motion is an exclusive, patented feature of the "Crescent" Glass and Dish Washer, found nowhere else. Every inch of every plate, glass and cup is washed perfectly, for as the wash arms revolve above and below the rack the water strikes all surfaces, corners and crevices.

THE "CRESCENT" FINDS THE DIRT!

MODEL "MM"—Capacity 3,000 Dishes or 4,000 Glasses Per Hour
Space required for machine, 28½ in. wide, 27 in. long and 58 in. high. Output of pump 110 gal. per minute. Capacity of tank 13 gal. Motor ½ H. P., D. C. or A. C., 110-220 volts, A. TABLES AND SHELVES FOR CRESCENT DISHWASHERS

Tables and shelves for soiled and clean dishes etc., must fit the machine perfectly to facilitate the handling of the racks of dishes in and out of the machine and to insure watertight connections. These latches and shelves can be made of galvanized iron or Monel Metal. Estimates on any type of table and shelf arrangement would be gladly furnished upon application. Mention make and type of machine in use.

DISH WASHERS 7 MODELS—

A Size For Every Purpose

MODEL "BB"

MODEL "BB"—Capacity 7,000 Dishes or 8,500 Glasses Per Hour
About same size as Model "CC," but is equipped with bronze rollers instead of a motor-driven conveyor. Pump capacity 265 gals. per minute. These bronze rollers make it easy to slide the racks of dishes through the machine. Length 58 in., width 30 3/4 in., height 57 1/4 in. 1 1/2 H. P. motor. Complete with motor, steam injector, gas burner, and 8 racks. Shpg. wt. complete with racks 1,050 lbs.

"AUTOSAN" DISHWASHING MACHINE

Save 60% Dish Breakage and 50% In Labor Costs!!

The "Autosan" is completely automatic and is always in control of the operator at the clean dish end of the machine. All articles to be cleaned are placed on a moving fibre cushioned conveyor which passes between a series of spray arms through which hundreds of gallons of water, per minute, are forced at high pressure by the powerful multiple chamber centrifugal pump mounted on the base.

The soiled tableware is washed, thoroughly rinsed and sterilized by the moving conveyor carrying them through the penetrating needle sprays, so that each article is deluged with hot water or steam on all sides. The first pair of sprays delivers a warm washing-compound solution for removing the debris from articles being cleaned, the second a hot

solution for re-washing, the third clear hot water for rinsing and the fourth boiling and steam for sterilizing the rinsed dishes.

Corresponding to each pair of the first three sets of sprays is a water tank located and to the side of the hood. Each tank is provided with a scrap tray, and below a shaped filter located over the pump intake, which cleanses the water before recirculation through the pump and spray tubes. The fourth set of sprays delivers fresh, steaming hot water for sterilizing, and the water is then used automatically to replenish the rinse tank and through a by-pass to replenish the wash and re-wash tanks. A stand in each tank controls the over-flow and is also the means of emptying the tanks. Because of their location, these water tanks can be easily, quickly and thoroughly cleaned.

A HEAVY-DUTY MACHINE

Model C-D. 3

Automatic Conveyor Type

**Washes Dishes for 1,500 to 3,500 Persons
Per Meal**

Three Tank Size

For clubs, hotels, restaurants and hospitals, this specially constructed, always dependable machine washes, rinses and sterilizes, **separately**, everything in table service, including the most fragile china—and it **quickly, thoroughly, safely and hygienically**.

The "Autosan" Dishwasher is equipped with an exclusive patented brass conveyor, cushioned to prevent contact with glass or china with metal. A safety device is provided which will automatically disengage the clutch driving the conveyor should an article become caught in the dish slide.

One of the outstanding reasons why "Autosan" machines are so easy to operate is the tank, which is located on the side of the machine and accessible at all times.

This "certified service," entirely automatic dishwasher is built of materials that positively will not rust or corrode—**bronze, copper and brass**. Highest grade material, scientific design, lasting construction, simplicity of operation, are responsible for the efficient, economical, performance of the "Autosan."

"FEARLESS" DISHWASHERS

FOR HAND AND
ELECTRIC POWER

The Only Dishwasher Unaffected by Lime in Water!

"FEARLESS" HAND DISHWASHER

145⁰⁰
For Model 0

The basket containing the dishes is lowered into the cradle, the lever handle is given a few motions back and forth, and the pendulum motion forces the water back and forth through the dishes, striking every one of them. There is no unwashed center. Tanks are made of the best heavy galvanized iron. No iron is used for the rims; the galvanized iron, turned, forms its rim. Cradles and carriers made of refined wrought iron, castings of best malleable iron. Cradle can be lifted out for cleaning tank when empty or full of suds. No pumps or sprays to lime or clog. The best adapted machine for use in states served by hard water as in all other states where the water is comparatively soft. Supplied with 3 dish, 1 silver and 1 cup basket. Wood lined baskets are of heavy wire, with upper part projecting, and are galvanized being made. Machine has two 3/4 in. hot water gate valves, two valves for steam, and one 2 in. sewer connection. **State whether machine is to be heated by gas or steam and if wash tank is wanted on left or right side. Shipped from factory in New State.**

---------	---------------	--------------	--------------	------------------	--------------------	---------------

SPECIAL SINKS

We manufacture sinks in large quantities. The standard sizes shown above are almost always in stock, and we can ship immediately almost any stock number ordered. The making up of single sinks in special sizes are a source of delay and added expense. Slight variations in size are often not required and one of the stock sizes will usually meet the requirements in most cases. We are in a position, however, to carry out your specifications for sinks in any manner you require.

PIX VEGETABLE SINKS

Master-Made Equipment made in our own factory

Heavy gauge galvanized steel, closely riveted. Reinforced rim. Heavy angle iron legs, extending from floor to top of sink, riveted to body. Legs painted with battleship gray enamel. Heavy 1 1/2 in. brass drain connections with plugs and chains in each compartment. Ht. to rim 34 in. Splash back 12 in. high.

All measurements stated below are extreme outside dimensions, excepting sinks without splash backs, which are explained below. Shipped from Chicago stock.

Sinks Without Partitions

Sink is one compartment and fitted with splash back, 12 in. high.

	Length	Width	Depth	Wt.	Each
14E1446	24 in.	24 in.	14 in.	85 lbs.	\$28.00
14E1447	30 in.	24 in.	14 in.	95 lbs.	\$32.00
14E1450	36 in.	24 in.	16 in.	107 lbs.	\$37.00

Sinks With Partitions

Divided into two compartments and fitted with splash back, 12 in. high.

	Length	Width	Depth	Wt.	Each
14E1454	42 in.	24 in.	16 in.	120 lbs.	\$44.00
14E1455	48 in.	24 in.	16 in.	140 lbs.	\$51.00
14E1457	60 in.	24 in.	16 in.	160 lbs.	\$60.00

Sinks Without Splash Backs

To fit into cook's table, preparation tables, etc. measurements stated are net inside. 1 in. flange all around. 14E1458 Single compartment, length 18 in., width 24 in., depth 12 in. Wt. 50 lbs. Each, \$24.00. 14E1459 Double compartment, length 36 in., width 24 in., depth 12 in. Wt. 90 lbs. Each, \$38.00.

Drainboards for Sinks

Made of corrugated, galvanized steel, pitched toward sink. Supported from sink legs by iron brackets and 6 in. splash backs. Are made in right and left-hand to fit to right or left of sink.

Prices include attaching to Sinks

	Length	Width	Wt.	Attached
14E1460	Right	24 in.	24 in.	40 lbs. \$8.75
14E1461	Left	24 in.	24 in.	40 lbs. 8.75
14E1462	Right	30 in.	24 in.	50 lbs. 8.75
14E1463	Left	30 in.	24 in.	50 lbs. 8.75

Deduct \$2.00 if drainboards are wanted alone, not attached.

WROUGHT STEEL VEGETABLE SINK With Splash Back

Same construction as the sink shown at the right, except that the back of the sink continues up to the height of 12 in. above the sink level, forming a splash back. Each compartment has heavy brass drain connections with plugs and chains. Shipped from New York stock.

We Will Make Special Sizes of Sinks Promptly to Your Order. Let Us Know Your Wants.

ELECTRIC COFFEE MILLS and MEAT CHOPPERS

The "Enterprise" Electric Coffee Mill

This is an ideal machine for large hotels and restaurants where the best work is demanded and less speed necessary. The "Enterprise" Electric machine is very heavily built and is equipped regularly with $\frac{1}{2}$ H. P. direct current motor. The nickel plated hopper has a capacity of 4 lbs. of coffee and the machine will granulate $1\frac{1}{2}$ lbs. per minute. May be adjusted to grind coarse or fine while running. An important feature in the construction of these machines is the fact that the grinders are connected direct, thus avoiding gears. The machine is equipped with safety release. Height, 30 in.; floor space, 15x20 in. **Shipped from Factory in Penna.** Weight, 155 lbs., with iron hopper (as shown) holding $3\frac{1}{2}$ lbs. of coffee.

9E5385F Direct Current..... Each, **\$101.25**
9E5386F Alternating Current..... Each, **\$101.25**

NOTE:—In ordering the No. 9E5385F, be sure to state system and voltage used, and in ordering the 9E5386F, give the voltage, cycles and number of phases.

"Enterprise" Heavy Duty Electric Meat Chopper

For large hotels and institutions. The machine has a heavy malleable iron body, only retinned. Great power and attained by means of a screw conveyor with a $\frac{1}{2}$ H. P. enclosed motor, the gear and chopper being set on a cast iron base. Two speeds are possible—the direct current machine, the fast having a capacity of 150 lbs. per hour, or 450 lbs. of pork, and the slow chopper at the rate of 100 lbs. per hour, or 300 lbs. of pork. The alternating current machine has only one with a capacity of 200 lbs. of beef or 600 lbs. of pork per hour. The speed may be instantly changed from slow to fast or reverse. Four plates are furnished with each machine, having $\frac{1}{8}$ in., $\frac{3}{16}$ in., $\frac{1}{4}$ in., and $\frac{1}{2}$ in. holes and also 4 tempered steel knives. Machine complete measures about 16 in. high, 24 in. long, and 18 in. wide.

Shipped from Factory in Penna.

9E5387F Direct current. Weight 230 lbs..... Each, **\$168.50**
9E5388F Alternating current. Weight 230 lbs..... Each, **168.50**

"Enterprise" Electric Meat and Food Chopper

This machine will exactly meet the demand of the average size hotel or restaurant requiring a meat chopper of greater capacity than the ordinary hand machines. This type is especially adapted for cutting Hamburger Steak, but is equally useful for all food-grinding purposes. The body is heavy cast iron attractively finished in red with gold striping. The motor is $\frac{1}{2}$ H. P. completely enclosed and connected with a meat-grinding shaft by cut gears. Chopper is malleable iron retinned, and is removable for cleaning. Machine may be connected to electric light socket, if desired. Four plates and four knives are furnished with each machine. Capacity, beef, 200 lbs. per hour; pork, 300 lbs. per hour. Length, 23 in. Width, 14 in. Height, 21 in. **Shipped from Factory in Penna.** Shipping weight, 235 lbs.

9E5389F Direct current..... Each, **\$131.25**
9E5390F Alternating current..... Each, **131.25**

The "Hobart" Electric Meat and Food Chopper

Certain electric-driven fixtures are recognized as essential in the up-to-date hotel or restaurant kitchen. One of these is the electric power meat chopper and grinder, and an ideal type is found in our "Hobart" machine because it is a compromise in size between the larger hand-power device and the extremely expensive power machines heretofore sold. This chopper is operated

by a $\frac{1}{2}$ H. P. quietly running, powerful motor which is completely enclosed. The chopper, which is made of iron thoroughly retinned, is easily detachable for cleaning and will deliver about 3 lbs. of chopped meat per minute. It also chops other foods, such as bread, crackers, vegetables, etc., efficiently. The machine is beautifully designed, and being light in weight is easily moved from one point in the kitchen to another, where it may be put to work instantly by connecting the cord with an electric light socket. Finished in attractive bright red enamel, richly striped, with nickel plated. Length over all, 20 in. Width, 10 in. Height, 12 in. **Shipped from Factory in Ohio.** Shipping weight, 115 lbs.

9E5391F Direct Current..... Each, **\$165.00**
9E5392F Alternating Current..... Each, **165.00**

The "Hobart" Electric Driven Coffee Mill

The extra heavy construction and simplicity of the "Hobart" Electric Coffee Mill recommend it for all hotel and institution uses. It is operated by connection with an electric light socket which may be done in an instant. The motor is $\frac{1}{2}$ H. P., providing sufficient power to insure against overloading. The "Hobart" has tooth burrs with conveyor giving a definite regular flow not possible on the usual gravity fed mills. Has attractive polished aluminum hopper which holds 2 lbs., and a convenient style dustproof receptacle for ground coffee. The machine is easily adjusted to grind any degree of fineness, and will deliver $\frac{3}{4}$ to 1 lb. of ground coffee per minute, depending upon the degree of fineness. Finished in bright red beautifully traced with nickel plated trimming. This Hobart hotel coffee grinder carries with it a record of achievements already established, that assures the hotel man that he is getting the best that can be made, regardless of price. Size of base, 14 $\frac{1}{2}$ x10 inches. Extreme height, 28 in. **Shipped from Factory in Ohio.** Shipping weight, 100 lbs.

9E5393F Direct Current..... Each, **\$120.00**
9E5394F Alternating Current..... Each, **120.00**

The "Hobart" Electric Combination Coffee Mill and Meat Grinder

Here is an ideal fixture for the busy hotel or institution that estimates correctly the advantage of economy in man power in the kitchen. The combination includes a perfect power coffee mill with polished aluminum hopper of attractive design, holding 2 lbs., which may be ground in a little over a minute. The grinders are the standard type tooth burr with conveyor feed insuring uniform flow of coffee, and the machine can be regulated to grind any degree of fineness. A suitable dustproof receptacle fits under the grinders to receive the coffee. The meat chopper has a capacity of 3 lbs. per minute. The motor is the latest enclosed type $\frac{1}{2}$ H. P. and may be furnished for any current as specified. The meat chopper is easily detachable for cleaning or may be removed when not in use. Finished in bright red, attractively striped. Length over all, 27 $\frac{1}{2}$ in. Width, 10 in. Extreme height, 33 $\frac{1}{2}$ in. **Shipped from Factory in Ohio.** Shipping weight, 200 lbs.

9E5395F Direct Current... Each, **\$205.00**
9E5396F Alternating Current..... Each, **205.00**

The New "Holwick" Electric Driven Coffee Mill

It took years of experiment and experience to produce it, but here it is—a high-grade electric coffee mill, guaranteed in every respect, at a price much below the usual selling figure. The "Holwick" electric coffee mill, which we are offering as a leader, is equipped with a one-quarter H. P. motor of standard make and has a grinding capacity of one pound per minute. Any grade of fineness desired can be obtained, so that the machine is adapted for use in any kind of a place. The aluminum hopper holds 3 lbs. of coffee. No special wiring is required for this device, it being necessary only to attach the plug at the end of the cord into an ordinary electric light socket. Finished in bright red enamel, handsomely striped. Shipped complete with 8 ft. of cord and plug, ready to attach to lighting socket. Counter space required, 10x12 in. Height of machine, 32 in. **SHIPPED DIRECT FROM FACTORY IN OHIO.** Shipping weight, 90 lbs.

9E5397F..... Each, **\$60.00**

IMPORTANT In ordering electric driven machines shown on this page, be sure to specify whether alternating or direct current is wanted, and give the voltage. If the current is alternating, also specify the number of cycles and whether one, two or three phase.

THE "STERLING" VEGETABLE PARING MACHINE

For peeling potatoes, carrots, turnips or any other vegetables. Skins are removed in small, like particles, eliminating the waste (often as high as 25%) from hand peeling. Vegetables are placed in hopper and revolving disc, moving 200 or 300 times a minute, throws vegetables against abrasive sides of cylinder, removing all skins. The abrasive surface is embedded in a glass porcelain enamel and fused to cylinder, making sides as hard and sharp as flint. By connecting water-supply, potatoes can be washed as they are peeled, refuse being expelled through waste at bottom. Machine strongly and carefully constructed. Driving belt is protected. Comes with motor. **Shipped from factory in central New York.**

OVERHEAD MOTOR

Motor placed on elevated shelf above peeler where it is easily accessible.

THE "ECONOMICAL" POTATO PEELING MACHINES

26 IN. WITH MOTOR, BELT AND GUARD

During the 24 years of manufacture, wherever these machines have been installed, their fine appearance and excellent work have led the users to speak well of them. In one well known factory where 20,000 bushels of potatoes are peeled in a season, the operators after careful tests found it most economical in upkeep and in work done. On request of customer, we will fit these machines with "Carborundum Interiors"—that is, peeling surfaces having granulated carborundum "cast-into" the metal, and not merely attached to the metal by any "secret process," or otherwise. Capacity 50 lbs. per charge. Floor space 32 in. x 32 in. x 48 in. ½ H. P. motor. Shpg. wt. 550 lbs. **Shipped direct from factory in New York City.**

9E5606F	Pulley driven, without motor.....	Each, \$275.00

16 AND 20 IN. WITH MOTOR BELT AND GUARD

These Machines are specially adapted to eating places where 75 to 350 persons are served. Their graceful lines and rugged construction, combining beauty with utility, make this machine a most attractive and dependable kitchen worker. The peeling surfaces are of perforated steel, giving quick, efficient and clean work, preventing no chip or come-off—in other words, no part of these surfaces can work loose from their plane, and become imbedded in the material peeled. It is true economy to use an "Economical"—the long-lasting, efficient and satisfactory potato peeler. With ordinary good care the upkeep of this machine amounts to almost nothing. ¼ H. P. motor. **Shipped direct from factory in New York City.**

POTATO AND FOOD MASHERS, FOOD PRESSES

MEAT SLICERS
COFFEE GRINDERS

"DILVER" FRUIT AND VEGETABLE PRESS, SIEVE, COLANDER AND RICER

\$ **4⁹⁵**
Each

Easily operated, quickly cleaned, can be used anywhere. Saves time, labor and food. To prepare fruits and vegetables just wash and cook. Then put through the "Dilver" which separates the skins, cores and seeds allowing all the good parts of the food to go through and leaving very little refuse. Absolutely no waste. Excellent for preparing apple sauce, soups, jellies or ricings potatoes. Will mash a bushel of potatoes in 15 minutes.

The spiral pressure blade and perforated bowl are made of the best quality, heavy gauge, hard cold rolled steel. Heavy frame. The blade will not wear the bowl. May be clamped anywhere. The bowl may be used as a colander or strainer. Height 11 in. diam. of bowl 8 in. Length of handle 6 in. Wt. not over 5 lbs.

E2845 Complete with instruction book giving many uses. . . . Each **\$4.95**

"WESCO" CAN OPENING MACHINE

Speedy—Safe—Easy to Operate

Will open any size or shape can from 2 to 6½ in. in diameter and up to 8 in. high. Entire top of can removed quickly and easily. No danger of cutting hands on can. No waste, no rim around top of can, food can be all removed easily. Nothing to get out of order, easy to operate, just place can on the base plate, lower down sliding knife until it pierces the top of can and turn the handle. Can is automatically gripped and revolved. Used by hundreds of hotels and institutions all over the country.

\$ **25⁰⁰**
Each

4E4186 Ht. 20½ in., width 9 in. Shpg. wt. 20 lbs. Each, **\$25.00**

IMPROVED PLUNGER MASHER

decided improvement over the old style hopper. Plunger made of steel throughout (heavily retinned). Lighter, cleaner and more sanitary than plungers made of wood. Cannot warp or crack as wood plungers do. Plunger is heavy wrought steel retinned. Frame is heavy wrought iron.

4E2925 7 in. diam. Wt. 26 lbs. Each, **\$24.00**
4E2926 9 in. diam. Wt. 33 lbs. Each, **\$30.00**

"CHEF" POTATO MASHER AND CREAMER

Made of steel throughout in two solid sections, heavily retinned. Can be taken apart and put together instantly. Neat and durable; will last indefinitely. Construction simple and sanitary. Will mash or cream ½ bushel or less of potatoes desired. Cap'y ½ bushel. Diam. of bowl 15 in. Ht. of machine over all 30 in. Shpg. wt. 20 lbs.

E2843 Each, **\$15.00**

"ST. LOUIS" POTATO MASHER

Made in Our Own Factory

Excellent shaped for straining thick soups, sauces, and mashing vegetables. The coarse bottom is used for mashing purposes and the fine bottom for straining liquids. Angle iron frame, strongly braced. Under-shelf of galvanized iron. Bowl of heavy tin with two perforated heavy tin bottoms, one coarse and one fine. The mashing is done by means of a hardwood roller, which is securely fastened on a long hardwood handle. The handle is held in place by a strong wrought iron rod. Length of the frame is 23 in., width 13 in., ht. 32½ in. The total ht. is 9 ft. Shpg. wt. about 90 lbs.

14E2929
Each.. **\$52.50**

DUCK PRESS

For pressing juices from all fowls, wild ducks especially. Heavy gray iron, nickel plated. Gives just as good and even better service than the costly imported ones. Easily operated and cleaned. Ht. 17 in.

Diam. 14 in. Shpg. wt. not pkd. 40 lbs. **4E2533** Each, **\$50.00**

"GRISWOLD" FRUIT AND LARD PRESS

Heavy tinned plunger is forced down by strong steel screw, held in place by 3 point bearing cross-bar. Plunger plate perforated to allow juices to flow freely. Body is made of heavy wooden staves with heavy tin splash cylinder. Heavy cast iron tinned base. The entire press locked together by 3 tension bars. The castings and tension bars are bright tinned finish, except the cross-bar and handle which are finished in battleship gray. Cap'y 10 qts. Wood cylinder, diam. 8 in., depth 12 in. Shpg. wt. 45 lbs.

4E2615 Press complete. Each, **\$10.50**

"STERLING" POTATO MASHER

Grates and sweeps potatoes through a finely perforated disc, producing potatoes in riced form. Cap'y of cylinder about 2 pecks. Requires ¼ to ½ min. to mash. Frame of cast iron, baked black enamel finish, gold stripe. Retinned sheet steel cylinder. Gears of hardened steel. **Pan not included.** Ht. 38¼ in. Floor space 20x24 in. Shpg. wt. 60 lbs.

4E2859 Each, **\$39.50**

"STERLING" MEAT SLICER

A Moderately Priced High Grade Slicing Machine

\$ **145⁰⁰**
EACH

Slices boneless meat whether hot or cold, cooked or raw, into slices of any thickness. Blade of best tool steel revolves with great rapidity, momentum being attained by a heavy balance wheel. Knife makes three revolutions while cutting material across the 10½ in. opening. As blade returns for a new cut, plate carrying meat is automatically pushed forward. Adjustable feed knife regulates the thickness of the cuts and is self-sharpened. Frame is of iron, finished in dark maroon enamel. The wheel rims, gear and knife housing are of highly polished nickel plate. Set up ready for use and tested before shipment. Shpg. wt. 270 lbs. Shipped from factory in central New York.

4E2677F Size over all: Ht. 24 in., width 23 in., length 24 in. Each, **\$145.00**

RAPID GRINDING COFFEE MACHINE

Made of the best gray iron casting. Wood base. Hopper of one piece. Burrs made of best grade hardened cast steel. Two balance wheels run machine easily. Adjustable to fine, medium or coarse. Coffee container is wood. Finished in maroon enamel and decorated in gold.

4E2955 Hopper holds 1¾ lbs. Ht. 24 in. Wheel 15 in. Shpg. wt. 70 lbs. . . . Each, **\$19.50**

4E2957 Hopper holds 2¾ lbs. Ht. 27½ in. Wheel 17 in. Shpg. wt. 107 lbs. . . . Each, **\$27.75**

PRACTICAL POWER FOOD CHOPPERS

THE WORLD'S FINEST MEAT, FOOD AND VEGETABLE CHOPPERS

New Model No. 111 "Buffalo" Food Chopper

Large enough for the ordinary restaurant or small hotel. Chops any kind of food fine and uniform without squeezing out all the juices. The most perfectly protected cutting machinery on the market. Accidents are impossible. The Knives are never exposed. Top can be removed easily; when let down it automatically locks into working position. Bowl or Knives can be stopped when running. Knives can be resharpened without disturbing the setting. Its uses are practically unlimited. Ball bearing throughout. A big saver of time, labor and floor space. Shpg. wt. 440 lbs.

SPECIFICATIONS

Inside diam. of bowl 14 in.
Two Knives.
Depth of Machine 16½ in.
Width of Machine 22 in.
Ht. of Machine 49 in.
Floor Space 25x14½ in.

½ H. P. Motor can be connected to any lamp socket, no special current necessary.
Motor has high and low speed adjustment.
Main switch conveniently located so motor can be started and stopped instantly.

THE NEW "BUFFALO" CHOPPING MACHINE A STRONG, STURDY MACHINE FOR POWER

The New "Buffalo" with Stationary Bowl and Improved Pedestal Base.

The "Buffalo" will chop a pound of raw meat in 5 minutes without mashing, tearing or squeezing. It chops cooked meat and vegetables for soup in 2 minutes. In fact, the "Buffalo" is used to chop anything a knife will cut, because the knives make a draw cut, the same way you would use a knife by hand. Therefore, the "Buffalo" means the finest, tenderest sausage meat or hamburger steak out of cheap or tough cuts of meat and all the choicest and nutritious qualities remain in the food. The "Buffalo" quickly converts remnants and leftovers into tasty and profitable dishes.

These are some of the things the "Buffalo" can be used to chop fine:

- | | |
|---------------------------------------------|-----------------------------|
| Sausage Meat. Hamburg Steak | Salads of all kinds |
| Cooked Meats for Hash | Spinach, Onions, Relishes |
| Veal and Beef Loaf | Clams, etc., for Chowder |
| Chicken and Turkey Croquettes | Cheese for Welsh Rarebits |
| Chicken and Lobster Cutlets | Mixing Cottage Cheese |
| Codfish Cakes, Mince Meat | Crackers for Breading |
| Vegetables for Soups | Carrots, Potatoes, Turnips |
| Chops, Parsley, Mint, Green and Red Peppers | Nuts, Fruits, Figs, Citron |
| Celery, Tomatoes, Cabbage | Lemon and Orange Peel |
| Royal Canape | Almond Paste, Coconut, Etc. |

The "Buffalo" is built on the only correct principle for cutting food without mashing. The knives that do the cutting pass through a comb; the aluminum bowl revolves, bringing the meat, etc., under the comb. Every time the knives pass through the comb they make a draw cut, the same as in cutting a piece of steak, and do not mash or tear. The top plate, including the hood, knife shaft and knives, swing back on hinges, allowing the operator to empty the bowl easily. The comb is detachable, leaving the bowl clear to clean. The plow mixes the food while cutting. Ht. 3 ft. 8 in., length 3 ft. 9 in. Diam. of bowl, 17 in. Cap'y 12 lbs. of raw meat in 5 minutes, for cooked food or vegetables in 2 minutes. 1 H. P. motor. Shipped from Buffalo factory or from Chicago, as desired. Shpg. wt. 550 lbs.

READ, MEAT AND VEGETABLE SLICERS NOODLE CUTTERS

IMPROVED "BUFFALO" BREAD SLICER—For Hand or Power

Cuts 175 to 200 Slices
Per Minute

Steel Hood Knife Guard
Protects the Operator

Improved
Regulating
Device

Improved device for regulating the thickness of slice. Will cut 175 to 200 slices per minute. Made of the finest and best material obtainable. Cuts hot or cold bread from $\frac{1}{8}$ to $\frac{3}{8}$ in. thick automatically and stacks the slices at the same time. Thickness of bread regulated by device on flywheel. Every slice of bread cut is of the same thickness.

Container is of high grade steel, nickel plated. Gears cut from solid steel. Protected knife of finest inlaid English tool steel. This is accomplished by the flywheel, which is 14 in. in diameter. The shaft on which the knife is mounted is of cold rolled steel, nickel plated. A heavy steel hood guards the knife. Pan, tray and working parts are of finest materials, beautifully finished in nickel. Frame finished in white enamel. Length, including pan, 4 ft. 4 in. Without pan, 2 $\frac{1}{2}$ ft. Bread tray, 22x5 in. Shpg. wt. 130 lbs.

"STERLING" BREAD AND MEAT SLICER

Cuts full sized loaf of bread; slices cold meats, sausages, hams, cheese, etc.; slices fruit or vegetables; cuts cabbage for kraut. Balance wheel protects hand from the tool steel cutting knife. Guard or pusher protects the hand that feeds. Thickness of slice regulated from $\frac{1}{8}$ to $\frac{3}{8}$ in. Made of cast iron, finished in baked black enamel with gold striping.

2682 Ht. 15 in., width 18 in. Length of trough 4 in., width 5 in. Shpg. wt. 45 lbs. Each, \$19.50

2684 Large size. Ht. 21 in., width 20 $\frac{1}{4}$ in. Length of trough 18 in., width 7 in. Shpg. wt. 85 lbs. Each, \$30.00

"STERLING" COMBINATION FRUIT AND VEGETABLE SLICER

Large Capacity 4 Separate Hoppers

Fruits and vegetables are sliced without crushing. Each of 4 hoppers may be filled with a different fruit or vegetable and component parts of a salad prepared in one operation. Circular revolving tool steel knife swings under the pockets, cutting thickness from $\frac{1}{8}$ to $\frac{3}{8}$ in. Material drops down by gravity. Throwing back top gives access to working surface for cleaning. Built of cast iron, finished in baked black enamel with gold striping. Ht. 19 $\frac{1}{2}$ in. over all. Floor space 24 in. Cap'y each hopper about 3 lbs. Shpg. wt. 110 lbs. Each, \$65.00

2685. Each, \$65.00

NOODLE CUTTER

Non-Adjustable. Size 21x6 $\frac{1}{2}$ x9 in., heavy cast brown japanned iron, porcelain lined trough. Var-nished hard wood feed-ing platform. Wt. not pld. 9 $\frac{1}{2}$ lbs

4E2728 Each \$12.00

Adjustable. Same as above, only slightly larger and adjustable. Shipped from factory in New York State.

4E2729F Each, \$42.50

"STERLING" COMBINATION FRUIT AND VEGETABLE SLICER

For slicing Sara-toga chips, vege-tables and fruit of all kinds, such as cabbage for cold slaw, beets, apples, turnips, cucumbers, pumpkins, rhu-barb, etc. The revolving cylinder is 11 in. in diam. Ht. over all 16 in. Made strongly of cast iron with knife

of best tool steel. Shpg. wt. 56 lbs.

4E2923 Each, \$18.00

"STERLING" BREAD OR HAM SLICER

Slices bread, cold meats, fruits, vege-tables to the thickness de-sired. Knife is sharpened automatically. Blade 8 in. in diam. Frame of strong cast iron, finished in black enamel.

4E2680 Cuts up to 5 $\frac{1}{4}$ in. square. Machine is 21 in. long, 16 $\frac{1}{4}$ in. wide. Ht. over all 12 in. Shpg. wt. 63 lbs. Each, \$34.50

4E2681 Cuts to 7 $\frac{1}{2}$ in. square. Machine is 29 in. long, 18 in. wide. Blade 10 $\frac{1}{4}$ in. in diam. Ht. over all 14 in. Shpg. wt. 82 lbs. Each, \$50.00

COMBINATION BREAD SLICER

For Small Restaurants, Clubs and Hotels

Hand operated. Quickly, easily and accurately cuts full size loaf of bread. Slices beef, vegetables and fruit into slices of any thickness desired. Made of oak. Fitted with best steel knives.

4E2673 Length 21 in., width 10 in., ht. 10 in. Wt. not pld. 8 $\frac{1}{2}$ lbs. Each, \$5.95

"UNIVERSAL" VEGETABLE SLICER

Well built. Clamps to ordinary table. Slices vegetables, sauer-kraut, cold slaw, Saratoga chips, etc. The hinged lid presses vege-table against the knives. Two re-volving knives of best tool steel give the machine double cutting capa-city. Instantly adjustable to coarse or thin cutting. Body of cast iron. Ht. 14 in., length 13 in., width 5 $\frac{1}{2}$ in. Wt. not pld. 6 $\frac{1}{2}$ lbs.

4E2512 Each, \$3.25

Each \$3.25

"STERLING" FRUIT AND VEGETABLE SLICER

A Handy, Small Machine

Slices fruits and vege-tables $\frac{1}{8}$ to $\frac{3}{8}$ in. thick. Unequalled for making cold slaw. Fingers pro- tected from danger. Tool steel knife, cast iron frame. Ht. 14 $\frac{1}{2}$ in., length 11 in., width 9 in. Wt. not pld. 7 $\frac{1}{2}$ lbs.

4E2683 Each, \$4.95

Each \$4.95

"ENTERPRISE" MEAT CHOPPERS

High grade, durable and satisfactory machine. Strong malleable iron, handsomely retinned. Knives are made of thoroughly tempered, high grade steel. Comes in three sizes as listed below. Each chopper is furnished with one plate with the standard size $\frac{1}{8}$ in. holes.

For Medium Size **\$7.40** EACH

4E2730 Small Size Chopper. Wt. 9 lbs. Chops 3 lbs. per minute.

Each, **\$4.25**

4E2735 Medium Size Chopper. Wt. 14 lbs. Chops 4 lbs. per minute.

Each, **\$7.40**

4E2740 Large Size Chopper. Wt. 22 lbs. Chops 5 lbs. per minute.

Each, **\$8.85**

Stuffing Attachments for "Enterprise" Meat Choppers
Size of hole $\frac{1}{8}$ in.

4E2774 To fit No. 4E2730 Wt. not pkd. $\frac{1}{2}$ lb. Each, **90c**

4E2775 To fit No. 4E2735, and No. 4E2765 Choppers. Wt. not pkd. $\frac{1}{2}$ lb. Each, **\$1.05**

4E2776 To fit No. 4E2740, and No. 4E2770. Wt. not pkd. $\frac{1}{2}$ lb. Each, **\$1.40**

SPECIAL "ENTERPRISE" MEAT CHOPPERS

For Hotels and Institutions

These "Enterprise" Meat Choppers are of extra large capacity and are designed to handle a large quantity of meat in a short time. Made extra heavy and durable, making them ideal for use in large hotels and institutions. Made of heavy and strong malleable iron and heavily retinned throughout. Knives are made of highest quality tempered steel. Come in 2 sizes, as listed below.

4E2765 Medium Large Chopper. Wt. 21 lbs. Chops 4 lbs. per minute.

Each, **\$11.85**

4E2770 Extra Large Chopper. Wt. 32 lbs. Chops 6 lbs. per minute.

Each, **\$15.50**

For Medium Size **\$11.85** EACH

"UNIVERSAL" FOOD CHOPPERS

Made of the best malleable iron retinned all over. Knives of high grade, well tempered steel.

Ht. above table $5\frac{1}{2}$ in. Diam. of hopper $2\frac{1}{2} \times 3\frac{1}{2}$ in. cap'y 2 lbs. per min. Wt. $4\frac{1}{2}$ lbs., including 1 medium, 1 fine and 1 nut butter grinder.

4E2700.....Each, **\$1.85**

Ht. above table, 6 in., diam. hopper 3×4 in. Will chop $2\frac{1}{2}$ lbs. per minute. Wt. 5 lbs., including 1 coarse, 1 medium coarse, 1 fine cutter, and 1 nut butter grinder.

4E2702.....Each, **\$2.25**

Ht. above table 7 in., diam. of hopper 4×5 in. Will chop 3 lbs. per minute. Wt. $8\frac{1}{2}$ lbs., including 1 coarse, 1 medium coarse, 1 fine and 1 nut butter grinder.

4E2704.....Each, **\$3.00**

STUFFING ATTACHMENT

For "Universal" Food Choppers

Made of seamless heavy brass, finely nickel plated.

4E2703 To fit No. 4E2702. Wt. not pkd. $\frac{1}{2}$ lb. Each, **75c**

4E2705 To fit No. 4E2704. Wt. not pkd. $\frac{1}{2}$ lb. Each, **85c**

HOME CHERRY STONER

Self-fed by hopper which holds a dozen or more cherries at a time. Two cherries are pitted with each downward thrust of the plunger handle. Downward thrust of the handle forces plungers through cherries, and at the same time forces stones below. Ht. over all $10\frac{1}{2}$ in. Hopper 3 in. wide by 6 in. long. Shpg. wt. $2\frac{1}{2}$ lbs.

4E2645.....Each, **95c**

"UNIVERSAL" MEAT CHOPPER

Malleable iron, retinned all over. Base plate removed from table by turning thumb-screw. Ht. above table 7 in., diam. of hopper 4×5 in. Cap'y 3 lbs. per minute. Wt. not pkd. 10 lbs. Has steel knife and adjustable clamp for fastening to table.

4E2706.....Each, **\$4.95**

Large Size. Ht. above table 9 in., diam. of hopper 5×6 in. Cap'y 4 lbs. per minute. Wt. 13 lbs. Steel knife and $\frac{1}{4}$ in. standard steel plate to screw to table, same as 4E2765 illustrated above.

4E2716.....Each, **\$7.75**

STUFFING ATTACHMENTS
Heavy seamless brass, nickel-plated.

4E2712 To fit No. 4E2706 Chopper. Wt. not pkd. $\frac{1}{4}$ lb. Each, **\$1.40**

4E2717 To fit No. 4E2716 Chopper. Wt. not pkd. $\frac{1}{4}$ lb. Each, **\$1.40**

REPAIR PARTS FOR CHOPPERS

Do not order repair parts by catalog number of your machine. In ordering parts state the number stamped on hopper and number and name of part wanted. Each part is numbered.

"CHAMPION" BUTTER CUTTER

Made of brass—heavily nickel plated. Can be cleaned by simply dipping into hot water. By changing wires each machine will cut 2 sizes.

The "Champion" butter cutter is the only one on the market that has the replaceable wire feature. When a wire becomes loose or breaks you can tighten it or slip in another quickly and easily. This feature will far more than pay the difference in cost between the "Champion" and lower priced cutters. Shpg. wt. 8 lbs.

STANDARD SIZE

4E2751 36 pieces from 1 lb. of butter.....Each, **\$14.00**
4E2750 40 pieces from 1 lb. of butter.....Each, **12.50**

4E3750 Extra Wicking.....Roll, .65

QUALITY BREAD TOASTERS

Slices of bread are placed on the two hinged pans, one pan on each side, which are closed up against the wire grid. When the toast is cooked on one side the pans are turned down and the bread slides from the grid into the bottom of the pan. The pans are then immediately closed again against the grid, which permits the other side of the bread to toast. Thus in a fraction of a second 8 slices have been turned without handling. Ends of toaster are made of cast iron. Has 1 long burner. Width over all with pans closed, 10 in., open 18 in. Over all: length 23 in., ht. 12 1/2 in.
4E3759 Shpg. wt. 42 lbs. Each, \$21.50

KRUSTY "KORN DOG" BAKER

Something
New in
Money
Makers

\$10⁵⁰
Each

It's new, novel and delicious to eat. The Krusty "Korn Dog" is a corn bread waffle, shaped like an ear of corn, with a "hot dog" baked inside. All done in one baking. IT'S ALL THE GO AND MAKING BIG MONEY FOR OPERATORS ALL OVER THE COUNTRY. The "hot dog" is baked inside the corn batter, which, as it bakes, moulds itself to resemble an ear of corn. When broken open it looks exactly like an ear of corn with the golden kernels on the outside and the red cob of sausage in the center.

THEY'RE EASY TO MAKE! Heat both sides of the "Korn Dog" Pans and grease lightly. Fry small "hot dogs" in the fryer pan. Half fill each section of the lower "Korn Dog" pan with the batter, put a "hot dog" in the center and spread a little batter lightly over the "hot dog." Close the pans, bake seven minutes, then turn the pans and finish baking for about seven minutes. You will be surprised at the savory, tasty result. Recipes for making batter with each Baker.

ORDER YOUR KRUSTY "KORN DOG" BAKER NOW! THE PRICE IS SMALL! THE PROFITS BIG! GET IN ON THIS MONEY MAKER!

The Krusty "Korn Dog" Baker is made of cast iron, smoothly japanned finish. The pan handles are made of heavy, sturdy wire coils and are always cool. Heavy wire handles on each end. Dimensions of Baker are: Bottom of frame is 10¼x21¼ in. Ht. of frame 2½ in. Size of fryer pan 8½x8½ in. Depth of each fryer pan ¼ in. Total depth of both fryer pans 1½ in. Size of Krusty "Korn Dog" 6½ in. long and 1½ in. in diam.

A DECIDED IMPROVEMENT! The "EDLUND" CAN OPENER Opens Any Can Quickly and Safely

Opens any can, oval, square or round—large and small, leaving a smooth, rounded edge turned inwards, permitting contents to be emptied whole. Cannot cut or injure fingers in operating opener. It is unlike other openers because the can rests upon an adjustable plate which rests on table, holding can securely and makes the spilling of cans almost an impossibility. (See illustration.) Strongly constructed of cast aluminum. Can be attached temporarily or permanently to table or bench by clamp or screws. Cutting knife can be reversed to get double wear and can be quickly removed for replacement. Each machine packed in individual carton complete with instruction sheet. Overall size is 13 in. high, base 6¼ in. long and 3¼ in. deep. Shpg. wt. 5 lbs.

Shipped direct from Pennsylvania factory.

OW ROUND WAFFLE IRON
With Wire Ball Handle

QUICK SERVICE BROILER

WORKS
ON ANY
STOVE

NO EXTRA
FUEL OR
FIRE

Made of heavy cast metal, insuring even distribution of heat. No openings, so fire cannot come in contact with food. The corrugated top will permit juices to drain into runway in side. This eliminates smoking and means considerable saving of fats. Splendid for broiling whole fish, large steaks, game or poultry without burning outside.

4E3771 Size 12x18 in. Wt. not pkd. 60 lbs. Each, **\$5.80**
4E3772 Size 16x20 in. Wt. not pkd. 97 lbs. Each, **\$8.80**

DEEP ROUND WAFFLE IRON
With Wire Ball Handle

cast iron, japanned shallow base. are of wire over a steel core and become too hot to grasp with the hand. For use on gas or coal can be easily turned without means of the improved ball and joint. Easily cleaned. Diam. of in.; of bottom ring 9 3/4 in.

4E3694 Black enamel finish. Each, **\$12.00**

Japanned gray cast iron, nickel coil handles set in air cooled sockets. No burnt fingers or loose handles. Can be used on gas or coal stoves. Patent grease cup prevents grease from dripping. An unusually good value. Diam. of pans 7 3/4 in. bottom ring 1 1/2 in.

4E3758 Wt. not pkd. 12 lbs. Each, **\$2.25**

SUPERIOR GAS BROILERS

BROILS BOTH SIDES
AT THE SAME TIME

"Superior" Gas Broilers are strongly made and are very desirable for use in Hotels and Restaurants. They can be arranged in batteries of two or more as required. The article to be broiled is placed in the wire grid and inserted between the gas flames. The gas is brought in at the rear of each side, going up in main channels, the inner surface being perforated with very small holes. The incandescent rays reflected from both asbestos sides, broils the meat. Drip pan heavily tinned wire grid furnished with each broiler.

4 in. Depth 20 in. Width 12 in.

wt. 75 lbs.

Each, **\$26⁵⁰**

GRIDDLE, TOASTER AND WAFFLE IRON

Master-Made Equipment made in our own factory

Top has heavy plate of polished steel for griddle cakes, heated by improved gas burners. Waffle irons on one end, oblong or round, as listed. Below the top and heated by the same burners by deflected heat are two grills for toasting bread. Heavy angle iron stand with galvanized steel shelf for batter pail and greaser.

14E3785 With 2 round waffle irons. Length 55 in., width 22 in. ht. 36 in. Painted black. Shpg. wt. about 325 lbs. Each, **\$115.50**

14E3786 Same as 14E3785 but made for window display. Stand, pipes, gas mixer, handle and waffle iron are nickel plated and polished. Back and two sides are of steel, white enamel finished. Shpg. wt. 360 lbs. Each, **\$165.00**

With Oblong Waffle Molds

14E3780 With 4 oblong waffle irons, otherwise as 14E3785. Each, **\$121.00**

14E3781 With 4 oblong waffle irons, otherwise as 14E3786. Each, **\$173.25**

GRISWOLD ELECTRIC WAFFLES and GRIDDLE

We Pay Transportation Charges on These Griswold Waffles and Griddle

Greaseless, Smokeless and Odorless!!

Waffles or Griddle Cakes baked perfectly in a Griswold Electric Waffle Baker and Griddle and served in a clean atmosphere free from grease and smoke make many permanent customers. Waffles and griddle cakes are extremely popular and are therefore splendid profit makers. It is easy to make a reputation for wonderful waffles and griddle cakes with the Griswold Electric Waffle Baker and Griddle. It is absolutely the greatest improved article of its kind on the market. In 8 minutes from the time it is turned it is ready for use. When heated it bakes a perfect four-section waffle an even, crisp golden brown on both sides at once, in three minutes, without turning the pan, with an electric current cost of about 3½ cents an hour. It is greaseless, smokeless and odorless, and requires no experience to operate. Made in one, two and three unit sizes, in all-waffle or any waffle-griddle combination desired. Thorough insulation makes the heat flow directly into the waffle molds or griddle. Switches placed in front provide for "off," "low," and "high" heat. Each switch has convenient pilot light that tells when current is on. The waffle molds and griddles are made of purest cast aluminum, polished and easy to clean. Frames and legs are of heavy strip steel, heavily nickel plated. Legs welded to frame and frame itself is welded at joints, making a piece of equipment of very durable construction. Furnished in 110 volts only. If special voltages are required write for information.

CLARK CARBON BRICK

For Use With Food
Carrier Listed At Left

May be used with any type of room service food carrier. Burns without soot, odor, flame or smoke, leaves only a small ash residue. A brick lasts from 10 to 16 hours. Put carbon brick over gas flame or bed of coals until red hot, then place in metal container in food carrier. Shpg. wt. carton of doz. bricks 6 lbs.

4E3712 Carton of 1 doz. bricks..... **\$1.15**

EDISON TYPE ELECTRIC BROILER

This broiler combines the desirable features of the famous charcoal broiler with the cleanliness and convenience of the electric broiler. No grid raising or lowering device is required. Cover is of Monel metal and can be raised to any desired point, as it is perfectly balanced.

A three-heat switch controls the heating grid, medium heat giving broiling temperature at front only. Low heat maintains broiling temperature over entire area, with cover closed. Construction of this broiler makes it possible to bank several sections together where large capacity is required. Easily removable grease pan is located below the broiling surface. Body, finished in black with nickel-plated trims. Effective broiling area is 12x18 in. Capacity, four 1½-lb. steaks; 6 1-lb. fish; five half chickens. Length, 23½ in. Depth, 20½ in. Height, with cover, 16 in. Wattage-Voltages —110, 120 or 220, 240. State voltage wanted.

Heavy Copper, Nickeled—Just the thing for the coffee shop that desires to serve their trade good fresh coffee in an attractive way. Made of heavy copper, highly nickel plated, with ebonized wood handle. Equipped with standard "Hotpoint" heating element, safety switch and valveless percolating apparatus. Furnished complete with cord and plug. For 110 volts only either A. C. or D. C. Shpg. wt. 3½ lbs.

E459105 Cap'y 8 cups. Each, **\$15.00**

"TURNSIT" ELECTRIC TOASTER

Has Special Device for Mechanically Turning Toast

Equipped with switch on cord, making it possible to turn current on and off without leaving table.

E459702 Substantially made, neat appearing.

Slices may be toasted on both sides of toaster at same time.

Highly nickel plated. Ht. 7¼ in. Base 5x7 in. 6 ft. of cord and plug. Will fit any light socket but is wired for 110 volts only, either A. C. or D. C. Wattage 500. Shpg. wt. 3 lbs. Each, **\$6.50**

ELECTRIC URN HEATER

Base of extra heavy enameled iron, 6 in. diam. with rod in center for adjusting from 5 in. to 10 in. heights. One-piece porcelain disc heating plate, diam. 8½ in. set in heavy iron casting which protects disc and prevents breaking. 3-heat snap switch, low, medium and high, securely attached

to iron wire housing which covers all wiring except lead-in wires. Operates on either A. C. or D. C. If special voltage is required write for prices.

	Watts	Volts	Shpg. Wt. About	Each
E459430	2,000	110	14 lbs.	\$12.00
E459431	2,000	220	14 lbs.	12.00

FOR OTHER ELECTRICAL EQUIPMENT—Pages 178 to 181

WELLS ALL-ALUMINUM WAFFLE BAKER

Built of highly polished enduring aluminum that holds its polish. It is free from angles and as easy as a china dish to keep clean.

The hinge construction, which is fully covered by patents, completely protects wires and elements and permits the waffle to raise evenly all around. The pilot lamps are protected and are instantly replaceable without tools. The grids are thoroughly insulated from the supports by extremely heavy gaskets to conserve heat and protect the heating elements.

The Wells' Waffle Baker bakes perfect waffles to a uniform, tempting golden brown without grease. Its temperature is always correct. High heat maintains it

when baking — low heat when standing ready but idle. Its operation is so simple that it is possible for even unskilled help to turn out delicious waffles. The electrical connection can be plugged in or out instantly and because of its extreme portability, it fits anywhere. The cost of operation is exceedingly low.

We Pay Transportation Charges On This Baker

The base of the Wells' Waffle Baker is 18 in. long and 12 in. wide. When closed, it stands 4 in. high. When open, it stands 17 in. high. It bakes two 7 in. diameter waffles at a time. Rating: 1320 watts for baker of two irons.

E4594877—110 volts. } Each, **\$70.00**
E4594878—220 volts.

BE SURE TO SPECIFY WHETHER BAKER IS FOR 110 OR 220 VOLTS
If you are not sure of this information, get it from your local light company as Bakers will not function except on correct voltage.

"EDISON" PORTABLE ELECTRIC WAFFLE BAKER

We Pay Transportation Charges On This Baker

A new portable electric waffle iron for counter or window use. Can be connected with any electric light socket. Requires no special wiring. Is light in weight, but rugged, and will give speedy service. The waffle pans are of aluminum, requiring little or no grease, fitted with patented cast-in helical core sheath wire elements, which are much better than the ordinary type of heating elements. The upper pan is equipped with a nickel plated wire handle and vertical lift in the hinge connecting pans, eliminating the tendency to pinch the waffle at the back of pan. Each pan provided with individual cord and plug. Equipped with all-bakelite reversible 2 heat switch for each pan. Waffle pans mounted on an all white enameled base with nickel plated feet, providing clearance underneath frame. Top of base recessed to catch overflow of batter. Width of baker 22 in., depth 15¼ in., ht. 8½ in.

We Pay Transportation Charges.

E4594880	Bakes 6½ in. waffles. Shpg. wt. 38 lbs.	Each, \$52.50
E4594881	Bakes 7 in. waffles. Shpg. wt. 38 lbs.	Each, \$57.50

ELECTRIC GRIDDLES, WAFFLE RANGES, TOASTERS

These griddles and ranges are built of heaviest, finest materials. They are economical in operation, handsome in appearance, and valuable business getters when used for display. Heating units supply quick, intense heat where needed. 3-heat switches provided. Switches and cut-out boxes built right into ranges. Round waffles are 8 in. in diameter. Oblong waffles are 4x9 in. which are marked for division into three 3x4 in. waffles.

Griddle plate $\frac{3}{4}$ in. thick, highly polished. Waffles heated above and below. No need to turn. Irons have cool handles; slide in and out in special trays. Crumb tray under waffles. Constructed of heavy steel, angle corners, ball feet. Ht. 19 $\frac{1}{2}$ in. Maximum power on highest heat is 2 $\frac{1}{4}$ kwts. per waffle per hour. On low, $\frac{1}{2}$ kw. Cakes usually bake on medium heat.

There's a Big Profit in Toast!

**WE PAY TRANSPORTATION CHARGES
ON ALL "STRITE" TOASTERS**

There is nothing more appetizing, nourishing or wholesome than golden brown toast served hot! It is a food that is universally popular when toasted right. Many establishments have built up a profitable business and established a reputation by serving delicious toast. Toast is economical to prepare if you have the right equipment and profitable to serve when the trouble and waste occasioned by old fashioned methods have been eliminated.

"Strite" Automatic Electric Toastmasters end forever that "hit-or-miss" method of "toast-making." By using a "Strite" Toastmaster every patron is assured uniformly perfect toast—evenly browned and crisp. No soggy underdone toast, no scraping, it cannot burn. "Strite" Toastmasters are successfully in use in many of the leading eating places throughout the country, in large hotels, restaurants, hospitals, railroads and steamships.

The Famous Strite TOASTMASTERS

HOW THEY OPERATE: The waiter or other attendant simply places bread in slots, depresses two levers and goes on about other duties. Toast pops up when done and current automatically shuts off. Oven heat keeps toast hot until served. Adjustable timing assures perfect toast from any bread, fresh or dry, automatically. It toasts evenly and quickly, without watching, without burning and gives the toast a flavor that is impossible to obtain any other way. It sells toast in surprising quantities by making the toast right before the patrons.

FOUR-SLICE TOASTMASTER

This is an ideal machine for use in small restaurants, or at lunch counters where 200 slices per hour is the maximum amount of toast served. In many large places a battery of two or more 4-slice toasters is preferred rather than a single large machine. In many ways it proves a more flexible outfit and insures somewhat more continuous service. Current consumption, 2,750 Watts. Makes toast in 80 seconds.

10E4835 Illustrated at top of page. Size 11¼x12x10 in. high. Shpg. wt. 32 lbs.

We Pay Transportation Charges

\$100⁰⁰

Each,

THREE-SLICE TOASTMASTER

For the small lunch counter and soda fountain lunch, and those places where provision is desired for only a comparatively small amount of toast. Will turn out three slices every minute and a quarter, and will produce a dozen orders every ten minutes, which is a capacity sufficient for many of the larger places not making a specialty of toast service. Current consumption, 2,200 Watts. Makes toast in 80 seconds.

10E4834 Size 9¾x12x10 in. high. Shpg. wt. 30 lbs.

Each,

\$7000

We Pay Transportation Charges.

TWELVE-SLICE TOASTMASTER

This is the heavy duty toaster used by large restaurants, cafeterias and other public eating places, or at busy lunch counters where a large amount of toast must be served in a short time. Will make its full capacity of toast every minute and a quarter, and at this rate will supply in an hour 360 large slices of toast, or over 500 slices if each slice measures not over 3¾ in. wide. Current consumption, 5,500 Watts. Makes toast in 80 seconds.

10E4836 Size 13½x15½ in. high. Shpg. wt. 65 lbs.

Each,

\$18000

We Pay Transportation Charges.

MASTER SANDWICH TOASTER

Toasts a complete sandwich to a delicious brown quickly and easily, which cannot be compared with the ordinary sandwich made with two pieces of toast and a cold filler. Sandwiches may be made up ahead and toasted before the customer's eyes when required, then served hot and delicious.

To toast the sandwich just place it in the slot and push down the two levers. The current is automatically turned on and when the sandwich is done it automatically pops up and the electricity is turned off. The slots will take a sandwich 1½ in. thick. Cap'y four sandwiches at one time. Will make 120 to 150 sandwiches per hour.

10E4837 12x12x10 in. high. Shpg. wt. 32 lbs. Each,

\$11000

We Pay Transportation Charges.

EXCELLENT VALUES IN KITCHEN UTENSILS

"MASTER-MADE" ROAST PANS

WITH HEAVY
WROUGHT IRON
STRAPS

Each pan is made of one single piece of heavy highly polished iron, folded and wrapped at ends to insure double strength and to stand hard usage. Heavy wrought iron straps give pans protection from rough surfaces. No joints at corners, making leaks impossible. Strong heavy handles strongly riveted to the body of the pan. Top rim is of heavy steel wire with side and ends bent around it so as to make a strong, smooth surface.

WAGNER CAST ALUMINUM HOTEL WARE

Showing the Exclusive "Drip Drop" Feature Cover

30 Years Proven Service in Hotels and Restaurants Throughout the Country

Wagner Cast Aluminum Hotel Ware, because of its long wearing qualities gives unusual service. Its first cost is the last as it requires no retinning. Attractive in appearance and is easily cleaned making it highly sanitary. It conducts heat almost as fast as copper ware and retains it longer. These utensils are reinforced at the bottom adding double strength, and in addition the bottoms are thicker than the sides giving triple strength where most needed. An extra heavy bead of solid metal is around the top. The "Drip-Drop" covers are an exclusive feature. They fit almost air tight which tends to lessen the cooking time and conserve the flavor of the food.

Illustration at the left shows the reinforced bottom of Stock Pots.
Illustration at the right shows reinforcing on bottom of Sauce Pans.

USE THE INDEX! IT'S THE EASIEST WAY TO FIND WHAT YOU WANT

"WEAR-EVER" ALUMINUM UTENSILS

guine "Wear-Ever". No retinning expense. Cut fuel costs. Less heat required—they absorb heat faster than ordinary ware. Absolutely sanitary. No coating to chip off or
cks to form where food can lodge. Do not contain and cannot form injurious compounds with fruit or vegetable acids. Thick, strong and durable, yet light and easily
illed. They will outlast ordinary ware. "Wear-Ever" Cooking Utensils are being used by up-to-date hotels and restaurants throughout the world. **EASILY KEPT CLEAN.**
TE—All Saucepans, Sauce, Stock and Bain Marie Pots, 9 inches in diameter and larger, have extra thick bottoms and bands around top ½ in. wide, made by bending top
k. Aluminum rivets with large heads are used to fasten all handles to "Wear-Ever" Utensils. These are features that make "Wear-Ever" Utensils give longer service.

BAKING OR STORAGE PANS

TE—These pans may be fitted with straps across corners
a slight additional cost; so that they may be stacked.

EXTRA HEAVY HAMMERED

MADE IN OUR OWN FACTORY

THE copperware illustrated on this page and the opposite page is fashioned from extra heavy copper of the best grade, hammered to shape, hardened, and heavily retinned on inside with pure block tin. Made in our own factory with strictly "up-to-date" electrically operated machinery, directed by workmen who are skilled artisans, each in his own particular field. It is the experience of years that guides us in the manufacture of this high grade ware; fineness of workmanship and of material are held of far greater importance than lowness of price. Copperware has ever been in favor because of its many advantages. It is easy to repair, can be retinned at a very low cost, will not chip or graze, easy to clean, will not absorb grease or turn black, will stand long hard usage. In finish, construction and weight this ware has no superior; it is the best that is made and a quality that cannot be equalled at these prices. It is the enduring kind needed for heavy duty work.

PUREE SIEVE

Extra heavy tinned frame with hand perforated polished copper bottom, thoroughly retinned above and below.

DEEP SAUCE PANS WITH COVERS

Comprising 2 pieces. Sauce pan and
cover have long handles. Handles are
made of best malleable iron, fastened by
broad shanks and firmly riveted with
strong copper rivets. Inside coated with
heavy block tin.

STEAM OYSTER COOKER

The most practical oyster cooker for up-to-date hotels and restaurants. The
bowl is of heavy wrought copper and is steam-jacketed. The uprights or
standards are of cast brass and serve as steam supply and waste pipes. In
the arms of the bowl are automatic valves which, when the kettle is in its normal
position, are open and allow the steam to circulate, thereby furnishing the
necessary heat for cooking. When the contents of the bowl are sufficiently
cooked, the kettle is tilted, allowing the contents to flow into the plate for
serving, and by the same operation the steam supply is shut off automatically.
Entire cooker is heavily nickel plated. Made only in the two portion size.

our factory.

Use ~ STAINLESS STEEL COOKING UTENSILS ~ and Reduce

*Rid of
Staining
Bubbles
Scrubbing*

COOK with Stainless Steel Cooking Utensils and free yourself from the drudgery of scrubbing, scouring, scraping and shining. Use will not mar Stainless Steel Utensils; dis-use will not tarnish them; acids will not stain them; heat will not discolor them. One of the hardest things in the kitchen to keep clean is now made easy and simple by the introduction of this new and extraordinary ware. **Stainless Steel Cooking Utensils are as far superior to ordinary steel or iron utensils as Stainless Steel Cutlery is to common cutlery.**

Extremely durable, this ware is **four times as strong as ordinary iron** and will not break when dropped on the floor. In addition, it offers a sanitary and hygienic service because it is non-absorbent and rust-resisting and will not chip or crack.

Stainless Steel Cooking Utensils are made from iron and steel, which, treated by a patented process of manufacture, **makes them forever immune to the ordinary agencies of tarnish, rust, stain, corrosion, high temperatures, erosion and abrasion.** This process does not merely consist of applying a thin protective coating of tin, enamel or electro-plating, but signifies that the qualities of stainless steel are through and through. There is no re-plating, or re-tinning required—the first cost is the last cost.

It can readily be cleaned with soap, sand and water. Strong soda or any of the cleaning compounds on the market can be used without detriment to the metal.

Stainless Steel Cooking Utensils are fast becoming as popular as Stainless Steel Cutlery. Be among the first of the progressive Hotel and Restaurant men to adopt this twentieth century ware. **Send in a trial order and be convinced of its superiority.**

Stainless Steel Cooking Utensils are a marked improvement over the ordinary type. The hard and severe service which cooking utensils receive in the hotel and restaurant kitchen makes them unfit for use within a short time. Stainless Steel Cooking Utensils, being four times as strong as ordinary iron, gives them the added feature of being able to withstand the hard knocks of kitchen abuse and remain clean, bright and sanitary for an indefinite period.

IMPORTED "ELITE" ENAMEL WARE

PRIME CZECHO-SLOVAKIA (AUSTRIAN) ENAMEL WARE, the most popular line of imported ware ever placed on the market, may now be had in a beautiful green and white finish in addition to the already famous brown and white ware. This enables restaurants and hotels to offer distinctive, individual table service to patrons. Four-coated in attractive green or brown fire-proof enamel outside, and heavily coated guaranteed acid-proof white enamel inside. All the pieces are seamless and otherwise specified. All spouts, lips and handles are securely welded. Covered pieces have enamel covers. "ELITE" enamel ware is guaranteed by its makers to contain ingredients injurious to health. "ELITE" enamel ware rivals the best chinaware of this type in appearance, and its durability is unquestioned.

GENUINE "AGATE" ENAMELED NICKEL STEEL WARE

MADE BY LA LANCE & GROSJEAN. THE QUALITY GRAY WARE. For more than 50 years this ware has been recognized as superior to all other makes. Strong and durable yet light and convenient to handle. Double coated with a hard vitreous gray enamel, which presents a highly polished and beautifully mottled surface that is easily cleaned as china. In manufacturing, the nickel steel bodies and the gray enamel are perfectly combined; no subsequent heating can destroy them.

Remember These Things When Ordering From Our Catalog

This catalog is published for the convenience it gives our customers. It is a handbook for daily use—always ready when you want it, always truthful and very comprehensive. You are invited to use it to the fullest extent, and in order to help you benefit by it to the greatest degree, we are giving you the following hints on how to use it and order from it:—

- 1 Write your name and address very clearly. Do not use your trade name alone, but give the name of the proprietor, followed by the trade name, if any. For instance, John Smith, Proprietor, U. S. Hotel.
- 2 State all shipping directions clearly. If ordering by freight, be sure to make up a 100 lb. shipment if possible, in order to get the full benefit of the rate.
- 3 If remittance accompanies your order, state the amount, and what it is intended to cover. Unless impossible to avoid it, do not send currency, but use Drafts, Checks, P. O. or Express money order, or stamps. Where currency must be sent use registered mail.
- 4 Order by our catalog number. This is an extremely important detail which when overlooked is a frequent cause of delay and disappointment.
- 5 State clearly both quantity and denomination of the items ordered. Where there are prices quoted for several quantities, be certain you are applying the correct price for the amount you order.
- 6 Where Colors, Finishes, Sizes, Measurements or other specifications are needed be sure you state these clearly.
- 7 Where your name is to be placed upon the item purchased, by stamping, embroidering, printing or other means, follow instructions to the letter, and always PRINT the desired wording.
- 8 When your order calls for goods to be made to order, check all measurements and specifications carefully before ordering, and be sure you have overlooked nothing that is necessary for us to know. Always read directions carefully, and if you are not then clear how to proceed, write for information, which will be promptly supplied.
- 9 Notice the place from which shipment is to be made. In some cases shipment will be made direct from the factory only; in some you have the option of shipment from the factory or from our stock. Sometimes factory shipments are made only in large quantities, and sometimes in any quantity desired. This is always clearly stated,—read carefully and be sure you understand everything clearly.
- 10 Wherever possible use our order blank. It will be more convenient for you, and we can fill orders better and quicker if you do. A supply of these blanks will be mailed you at your request.
- 11 Read the catalog descriptions before ordering. They are truthful, and if carefully read will give you a clear conception of the article.
- 12 Use the index. It will save you time and will always tell you quickly where to find what you want.
- 13 When the item you want is not listed in this catalog, but is shown in one of our special books this will be stated in the index, or in other parts of this catalog. In such cases, a request for the desired book will bring it to you by return mail.
- 14 Bear in mind that in many cases we list only part of our line. This may be because a large part of it is made-to-order goods, or because space will permit only a partial showing. Where you are in need of something not illustrated, or not listed in any of our other catalogs, write us, describing the item desired, and we will respond promptly.
- 15 When in doubt about any detail as to the merchandise itself, or how to order it, write us for information. Your inquiry will be given instant attention.

KNIFE CLEANERS AND POLISHERS

Polishing, Buffing and Grinding Motors

No hotel or restaurant equipment is complete without a utility lathe motor which will be found useful every day in the year in polishing and buffing silverware, grinding cutlery, cleaning polished steel utensils, etc. Our self-contained polishing, buffing and cleaning motors provide a complete outfit for all this work and their compactness and simplicity make them especially desirable where little room is available for motor installation. These motors have a speed of 1,500 to 4,000 revolutions per minute, according to requirements, with starting and stopping switch and speed controller or regulator in the base. Each motor is provided with a 6-ft. cord and plug, which may be attached to any ordinary light socket for instant use. The illustration shows a complete polishing and buffing outfit, etc., but this complete assortment is not included with the motor.

The regular motor outfits, as specified at the prices quoted below, include two new style patent, adjustable, interlocking spindles for right and left side, grindstone chuck, adjustable plug and 6 ft. of reinforced covered light cord. Extra chucks, etc., may be purchased as required.

THE "WHIRLPOOL" HAND-POWER MIXER

Beats eggs, whips cream and dressings and mixes drinks of all kinds easily, thoroughly and economically. Made of highly polished aluminum. Ht. 11 in. Base 3 in. in diam. Take off top, remove flanged plunger, and place ingredients in metal container. Replace plunger and top, and by moving plunger up and down, you create a swirl in the container that mixes with all the power and vitality of a miniature whirlpool. The flanged plunger also acts as a strainer.

4E6855	Shpg. wt. 1 1/2 lbs.	Each,	\$2.75
--------	----------------------	-------	---------------

"CRYSTAL" SYRUP PERCOLATOR

Syrup making is a simple matter, will take very little of your time and provides simple syrup at the actual cost of the ingredients. Fill upper compartment with sugar, and syrup strains through into lower compartment. No heat required. No stirring. Seven pounds of sugar make a gallon of syrup, ready to draw off at the faucet.

Made in two sections, of heavy galvanized iron, with cleanly baked-on white enamel finish. The upper or sugar compartment, rests into the lower syrup storage tank. The strainer through which the syrup percolates is of non-rusting metal securely fastened to body. The syrup may be drawn off through a rapid-flow faucet supplied with each percolator. These percolators produce a simple syrup from nothing more than sugar and water, by a cold percolation process, without boiling, measuring or bother. Save freight and profit on syrup. Full directions with each.

4E6805 Produces about 5 gals. syrup daily. Ht. 27 in. Diam. 10 1/2 in. Shpg. wt. 12 lbs. Each, **\$6.60**
4E6806 Produces about 10 gals. syrup daily. Ht. 33 in. Diam. 14 in. Shpg. wt. 17 lbs. Each, **\$9.00**
4E6807 Produces about 20 gals. syrup daily. Ht. 43 in. Diam. 17 in. Shpg. wt. 50 lbs. Each, **\$15.95**

RETINNED DISHER

50c and up

A PRACTICAL DISHER FOR ICE CREAM SANDWICHES AND PIE A LA MODE — Adjustable to 3 Sizes

A new perfected Ice Cream Dish that molds flat pieces from tub ice cream. Dips into ice cream in the same manner as ordinary ball or cone shaped disher. Adjustable to 3 sizes: 16, 18, or 20 portions to the quart. This new sandwich and pie a la mode disher means less waste—more sales—greater profits. Substantially constructed, all working parts quickly removed for easy cleaning. Made of 18% nickel-silver throughout. Guaranteed to never rust or corrode. 4E6815 Wt. not pkd. 1 lb. 3 oz. Each, **\$3.25**

A low priced good quality disher that will give long and satisfactory service. Handle is electrically welded to the bowl and cannot come off. Reliable in operation. Bowl is made of steel, retinned inside and out. Comes in the following sizes: 4, 6, 8, 10, 12, 16 and 20 to the quart.

FRUIT JUICE EXTRACTOR

CALIFORNIA FLORIDA

For Oranges, Lemons and Grape Fruit

FREE WITH EACH MACHINE: A Stainless Steel Utility Fruit Knife, 5 1/2 in. Blade; Together With Oblong Fruit Cutting Board.

50% more juice from grapefruit, oranges and lemons. Extracts twice as fast as motor driven machines or old style devices. Aluminum funnel bowl, with removable aluminum strainer, segregates pulp and seeds, delivering only clear juice. Cast aluminum reamers for grapefruit, oranges and lemons. Patented grapefruit reamer with hollow center leaves core intact and prevents bitter cells being broken. Frame made of cast aluminum. Reamers of highly polished aluminum; can be removed or exchanged instantly. With this machine a half grapefruit out of a case of 76 gives 4 oz. of juice; one orange out of a case of 150 Florida oranges gives from 4 to 6 oz.; making average amount of juice extracted 4 oz. Used and recommended by Lexington Hotel, Chicago; Clark's Restaurant, Chicago; Blackstone Hotel, Chicago; Drake Hotel, Chicago.

4E6540 Extractor complete with reamers for grapefruit, oranges, lemons.....

\$12.50 Each

\$12.50 Each

TAMPED ALUMINUM KITCHEN WARE

Apartment Hotel Kitchenettes, Resorts, Institutions and Household Use. The purest and most sanitary ware for cooking utensils. Tamped out of solid sheet of aluminum. We use aluminum 99% pure. No joints, seams or hollow beads to lodge food. Spouts and bases tamped on. Covers made of spring aluminum—when bent they return to their original shape. Intense heat will not affect shape or wear. The "Sun-Ray" finish gives this aluminum ware a lasting brilliancy, making it easy to keep clean.

ROUND ROASTER
Stationary side handles, "Sun-Ray" finish inside top and bottom, nicely tamped outside.

SIX PIECE APARTMENT HOUSE ALUMINUM SET

\$4.65
Set

These utensils are seamless, made from one solid piece of aluminum, 99% pure, easily cleaned and are highly sanitary. They are light in weight and are easy to handle but are heavy enough to withstand rough use and to give long service. Aluminum is a quick conductor and a good retainer of heat and is a big fuel saver. Set consists of the following:
Roaster, size 10x6 in., cap'y 6 lbs. 4 qt. Colonial
Convex Covered Kettle. 2 qt.
Lipped Sauce Pan. 1 1/2 qt.
Colonial Rice Boiler. 6 qt.
Preserving Kettle. 6 qt.
Cup Percolator. Each set packed in carton.

4E7610
Set of 6 pieces.
Shpg. wt. 5 1/2 lbs. Set,

\$4.65

THE WAGNER STEAM PRESSURE COOKER

The Wagner Steam Pressure Cooker has been developed to meet the demand of the Small Restaurant and Sandwich Shop owner for cooking quickly and economically Ham, Corned Beef, etc. Cooking by steam pressure is the fastest and most satisfactory method known. 8 minutes per pound for Beef, Pork, Veal or Lamb. It is ideal for the preparation of large quantities of food as well as short orders. The cooking time is one-third that of any open vessel method and the live steam insures thorough cooking of food without shrinkage or destroying any of its properties. Meats, etc., cook in their own juices.

Made from solid cast aluminum, highly polished inside and out. (Recipe Book packed with each cooker.) Shipped from factory in Ohio.

	Cap'y	Size	Shpg. Wt.

SLANTING DIAL SCALES

Not legal for use in trade.

4E1866 Weighs 24 lbs. by ozs. R steel body. Sea green japan finish. W enamel 6 in. dial. Shpg. wt. 3¼ lbs. Each, **\$1.50**

NOTE—These two scales are as liable and as accurate as any scales can be made, but are not for use in trade and are not guaranteed to pass sealer's inspection.

"EXCELSIOR" ICE SCALE

Made extra heavy and tested to positive accuracy. The body is made of malleable iron, securely riveted with large face plate. Extra strong steel ring and hook. Fully warranted.

4E1800 Weighs 200 lbs. by 5 lbs. Wt. not pkd. 5¾ lbs. Each, **\$5.25**

FAIRBANKS PORTABLE PLATFORM SCALE

The Arrow-Tip Beam, graduated in ¼ lbs., is of heavy polished brass and will not bend under hard usage. The new easy-reading poise does not cast shadows on the figures and shows the weight so plainly that it is impossible to misread it. These scales are sturdily constructed throughout, which insures lasting accuracy and durability. Accuracy up to full capacity is the outstanding feature of these scales.

They fully meet all specifications and requirements of State and National regulations on weights and measures. Accepted everywhere as the standard.

4E1884 Cap'y 500 lbs. Platform 16x25 in. Shpg. wt. 185 lbs. Each, **\$21.00**

4E1885 Cap'y 1,000 lbs. Platform 18x27 in. Shpg. wt. 190 lbs. Each, **\$24.00**

4E1463	10 x16 x2	18¼ lbs.

BUN AND COUNTER PANS

Bound with Heavy Wire. Will Give Long Satisfactory Service.

BUN PANS—These bun pans are made of a special iron which has found to be the best material obtainable for bun pans. The pans have a smooth glass-like surface. They are easy to grease and to clean. They are ideal pans to stand the rough handling to which they are subjected in the average bake shop. They are bound at the top with heavy wire which adds strength and enables them to preserve their shapes under hard use. Size 18x26x1 in. deep.

4E1442 Medium wt. 24 gauge metal. Wt. not pkd. doz. 58 lbs. Doz. \$ 8.00

4E1443 Heavy wt. 22 gauge metal. Wt. not pkd. doz. 65 lbs. Doz. 10.00

LABOR-**SAVING** BAKERY DEVICES DOUGHNUT OUTFIT

BAKER'S GRATER

Especially Good for Grating Cheese

This machine is for grating and slicing nuts, citron, cocoanut, chocolate, apples, vegetables and many other materials used in bakeries. Made of cast iron with 6 different nickel plated steel discs for various kinds of work. Can and quickly be taken apart for cleaning. Will slice and grate fine, medium and large. Size of hopper 4½ in., height over 10 in. Wt. not pkd. 10 lbs.

34 Complete with 6 discs. Each, **\$12.00**

BOWL TRUCK WITH CASTERS

Made with two heavy ¼x1¼ in. band iron rings firmly riveted to three up-right pipe legs. Mounted on casters. Easily moved. Equipped with foot clamp to hold it. **4E6499** Diam. 23 in., wt. 30 lbs. Each, **\$12.00**

HANDY PIE RACKS

Well made of extra heavy steel wire, retinned. Durable and sanitary. Enables you to store away a large number of pies in a small space.

4E2561 Holds 12 pies. Ht. 24 in., width 10½ in. Wt. not pkd. 2½ lbs. Each, **\$2.25**
4E2562 Holds 24 pies. Ht. 27 in., width 22 in. Wt. not pkd. 4¾ lbs. Each, **\$4.25**

POPPY SEED OR MOHN MILL

Used in bake shops for grinding mohn and poppy seed or any other kind of seed. A very effective and durable mill, made on the steel roller principle. Made of the best material throughout and well finished. Cap'y of hopper 18 oz. of poppy seed. Size 7x12 in. Wt. not pkd. 10 lbs. **4E2535** Each, **\$15.00**

WIRELESS STEEL BAKER'S BOWLS

Four Popular Sizes at Right Prices

Stamped of one piece heavy steel, heavily retinned beaded rim. Easily cleaned, not absorb moisture, sanitary, really indestructible.

THE "GEM" DOUGHNUT MACHINE

A Big Profit Maker for the Bakery

Cuts 120 to 140 doughnuts a minute. Holds enough for 10 to 12 dozen doughnuts. Swings on 3-arm bracket, having reach of 40 in., which can be fastened to wall or post support near stove, so that machine can be swung over kettle holding hot grease. Thus the doughnuts as they are cut drop directly into the grease. Dies and scrapers easily removed for cleaning. Each machine is supplied with 3 different sized dies and 4 different sized gear wheels for making different sized doughnuts. Dies and gear wheels can be changed in a few seconds. Made of aluminum and nickel plated iron. Shipped from factory in Wisconsin. Wt. about 16 lbs. **9E10554F** Each, **\$80.00**

"DUTCHESS" ROLL DOUGH DIVIDER

This bench type Roll Divider will cut one large piece of dough into 36 equal parts. This machine may be placed on the work bench or table. It divides the dough into any size, ranging from 1½ oz. to 3½ oz. in weight. The dough is placed into a dough pan, supplied with machine. The pan is then placed under cutting head. Lever is brought over and pulled down to press and distribute dough in pan. After dough is well pressed, trip lever is sprung, pulling the handle at the same time and the knives will pass through the dough. Remove the pan and you have 36 single pieces of equal weight, ready for making up in any manner desirable. Shipped from Factory in New York. Shpg. wt. 180 lbs. Floor space 15x19 in. **9E10098F** Each, **\$90.00**

BAKERS' BAKE OVENS FOR COAL, GAS OR ELECTRICITY

"BLODGETT" PATENT PORTABLE OVENS

FOR COAL

Constructed of heavy galvanized steel, all walls insulated with asbestos. Stove of heavy cast iron, with long corrugated deflecting radiator which connects to a set of flues through which the heat is evenly distributed to the various shelves. Furnished with heavy steel racks. Doors removed by lifting a lug at one end of door, which holds the hinge in position. There is no connecting bar between the shelves; by removing the door and taking out one shelf you double space between the shelves. Shipped already set up.

9E7275F Ht. 58 in. Width 37 in. Depth 32 in. 3 shelves. Size of shelves 33x20 in. Baking surface 14 sq. ft. Cap'y 36 loaves. Shpg. wt. 670 lbs. Each, **\$120.00**

9E7276F Ht. 61 in. Width 37 in. Depth 32 in. 4 shelves. Size of shelves 33x20 in. Baking surface 18 sq. ft. Cap'y 48 loaves. Shpg. wt. 625 lbs. Each, **\$135.00**

CLEAN

"BLODGETT" CABINET GAS OVENS

Burns Natural or Manufactured Gas

Made of galvanized iron. Thoroughly insulated between the baking chamber and the outer walls with air cell asbestos made especially for this purpose. One flue in back. Each shelf or baking surface is provided with an independent door that drops down to a horizontal position when open, thus forming a shelf that facilitates the placing of foodstuffs in or removing them from the oven with but a minimum loss of heat.

WITH NEW TRANSITE SHELVES

Transite has all the good qualities of tile and can be furnished at the same prices as formerly charged for steel racks. Transite is flat, smooth, will not warp and retains heat as well as tile.

ATTACHMENTS

"GIANT" 4-SPEED CAKE MIXERS

STRONG PRACTICAL MACHINES FOR BAKERS

WILL MIX 25 LBS. TO 125 LBS. DOUGH IN 6 MINUTES

One of the strongest and most practical machines on the market for the retail baker or any bake shop where bread and cake is made. Base and column cast in one piece. Gears extra heavy machine cut. One lever starts and stops machine; also controls the four speeds without shock or jar. It will mix cake batches from 1 lb. to 100 lbs., beat eggs, topping, etc., and will mix from 25 to 125 lbs. of bread dough in 6 minutes. Machine is made of finest materials, finished in gray "Duco." Bowls are of seamless steel, heavily retinned. A special arrangement eliminates raising or lowering of bowls or beater arms which does away with breakage of agitators. The "Giant" has the widest range of work because of its four speeds. No oil or dirt to drop in the batch and spoil the cake—no clashing or breakage of gears when changing speeds.

Equipment includes one 20 gal. and one 9 gal. seamless retinned bowls, 2 wire beaters, 2 aluminum beaters and 1 dough hook. **Shipped from factory in Cincinnati, Ohio.**

"PERFECT" AUTOMATIC EGG BOILERS

The popular use of electricity in culinary establishments is building a constant demand for "Perfect" Electric Egg Boilers. Designed with highest type heating elements and 3-way switch—high, medium and low. Boiling point requires about 12 minutes. Low heat is sufficient to maintain operating temperature when not in use. **To Operate**—Place eggs in bucket, draw up hook indicator to desired time notch (each notch is one-half minute), then draw chain full limit. Bucket will raise itself out of water at end of time set on indicator. To raise bucket instantly press the pin at back of machine.

"JUNIOR" SIZE
4E5000F "Perfect Junior" Electric. Furnished complete on legs with heater, cord and socket. Operated from any lamp socket. Cap'y 3 eggs. Shpg. wt. 10 lbs. Each, \$25.00

"STEAMATIC" EGG POACHERS OR BOILERS

FOR HOTELS, RESTAURANTS, INSTITUTIONS, CLUBS, etc.

COOKS EGGS IN CLEAN FRESH LIVE STEAM

The new "Steamatic" Egg Timers boil, poach and steam fry automatically in clean fresh live steam. Starts in 5 seconds. Operates from any 110 volt A. C. electric light circuit. It is so neat, tidy and so obviously clean—goes right on the counter where everyone can see it. Creates egg sales. The Poaching Pan holds 2 eggs and fits all "Steamatic" Egg Timers. A Single Unit "Steamatic" can now be used for poaching 2 eggs or boiling 4 eggs. The Two Unit will poach or boil at the same time and has twice the capacity of the Single Unit. **Shipped direct from factory in Wisconsin.**

4E4936F	Single Unit "Steamatic" with one Poaching Pan. Cap'y 4 eggs. Shpg. wt. 8 lbs.	Each,	\$22.00
4E4937F	Two Unit "Steamatic" with two Poaching Pans. Cap'y 8 eggs. Shpg. wt. 12 lbs.	Each,	\$42.00
4E4935	"Steamatic" Poaching Pans only. Shpg. wt. 1½ lbs.	Each,	2.50

Same As Above, but for STEAMING EGGS Only.

No. of Units	Cap'y	Shpg. Wt.	Each
4E4930	1	4 eggs	6 lbs. \$19.50

4E4932	3	12 eggs	16 lbs. 55.50
4E4933	4	16 eggs	20 lbs. 74.00

HAND EGG POACHER

1 lb.
4E10930

Simply break egg into cup, place in boiling water the desired time and raise cup to drain off water. The egg can then be placed directly upon toast or plate by pressing a lever. Made of nickel-silver throughout. Ht. over all 9 in. Wt. not pkl.

Each, \$7.50

"HOBART" ELECTRIC MIXING MACHINES

FOR BAKE SHOPS AND PASTRY KITCHENS

This mixer is best adapted to the general work of most kitchens and bakeries. The motor is two horse power. Very rugged, specially developed for the rapidly changing load incidental to mixing. Abundance of power for heaviest work. Completely enclosed to protect from dust and dampness. Gearing is of the finest steel, heat treated. Very quiet and smooth-running. Three speeds—low, intermediate and high, and friction clutch and speed lever; same principle and construction as used in automobiles. The bowl is elevated and lowered by turning wheel which operates gear and pinion mechanism, enclosed in pedestal.

This mixer will mix 125 lbs. of dough, and all kinds of sponges and batters for cakes, pastry, mix pie fillers, and mayonnaise. Beat and mix up cottage cheese, beat eggs, icings, marshmallow and meringue. Mash potatoes, churn sour cream, whip cream, chop meats, potatoes, grind cheese, crackers, granulate and pulverize coffee, slice vegetables and fruits, crumb bread and crackers, sharpen knives and tools. Grind cereals. The various attachments listed below are included with this machine. All can be used without any alteration to the machine. Can be put on and cut off quickly and easily. When ordering 30 qt. bowl or soup strainer you must order also a 30 qt. bowl adapter.

We Offer You Competent Bake Shop Engineering Service

THE illustrations on this page show a few typical installations of our Bake Shop equipment. These bake shops have been carefully designed and planned by our kitchen engineers who have behind them the experience of hundreds of hotel, restaurant, hospital and club kitchens and bake shops. Our organization offers you the benefit of this experience and will give you the assurance that we can plan a bake shop to exactly suit your needs and that will operate with the maximum of efficiency and economy. The bake shop equipment that is specified by our engineers is of the highest quality and proven worth for it has either been designed and manufactured in our own shops or has been selected because our own experience has found it to be the best.

We offer the co-operation of our kitchen engineers to architects and builders planning bake shops. This is, of course, without fee or obligation.

IMPROVED HIGH GRADE POWER ICE CREAM FREEZER

IMPROVED 20 QT. GEAR DRIVE FREEZER

EXTRA HEAVY BASE

For Steam, Gas or Electric Power

An efficient, practical freezer extremely well suited for making ices, sherbets, and small batches of fancy ice cream. Made of cast iron, firmly fitted to a heavy base. Small gear and pulley run on a stud which is screwed into place, and locked with a lock nut. The can is made of copper, heavily tinned on the inside. The dasher is made of heavily tinned malleable iron, while the dasher scrapers are of the best flexible sheet steel, tinned. The tub is of Virginia seasoned cedar, with heavy galvanized iron hoops and two well riveted handles. The wall of the tub is absolutely solid as the staves are tightly dovetailed into each other. This machine can be run direct from a motor without countershafts. All gears are guarded. Equipped with an 18 in. diam., 3 in. pulley, the speed of which is 350 R. P. M. Floor space is 33x20 in. Ht. 36 in. Shpg. wt. 250 lbs.

9E4430F Cap'y 20 qts..Each, **\$84.00**

IMPROVED ICE CREAM FREEZERS As Above But With Tight and Loose Pulley

9E4433F Cap'y 40 qts.....Each, **\$125.00**
9E4432F Cap'y 20 qts. Has 12x3 in. tight and loose pulleys, the speed of which is 125 R.P.M. Requires 1 H.P. Motor. Shpg. wt. 250 lbs.. Each, **84.00**

IMPROVED MOTOR DRIVEN FREEZER AND ICE CRUSHER

An ideal freezer and ice crusher, made of heavy cast iron, united on one base. The freezer and crusher may be operated separately, thus saving power and wear and tear on the machine. A 2 H. P. motor which is supplied in either Alternating or Direct Current is securely bolted on the machine with a guard to protect it from the ice. It is provided with a noiseless fibre pinion running into cut gears, all well guarded to prevent accident. **Operating cost about 5c per hour.**

The freezing can is made of heavy copper with a brass bottom and is heavily tinned on the inside. The beater is specially designed to whip up the contents. The cream is prevented from crustling on the sides of the can by flexible sheet steel scrapers. The cover is of cast iron, galvanized

inside and out equipped with two heavy plate glass windows for viewing contents. Glass is fastened in with a salt-resisting cement. The dasher, which is of copper, moves in opposite direction to that of the can. The can revolves about 125 R. P. M. and will turn out 250 gals. of cream daily. The tub is of Virginia seasoned cedar, equipped with two galvanized handles and bung hole protector. A block of ice 12x12 in., and of any length, need be lifted only 2½ ft. from floor to be placed in the crusher. It will crush about 3 tons of ice per hour. Pegs are made of steel, cast into the cylinder so they cannot fall out and break other parts of machine. Complete Ice Cream Freezer, Ice Crusher and Motor in one machine furnished for either alternating or direct current.

With 20 Qt. Freezer. Floor space 26x32 in. Ht. 43 in. 1 H. P. motor. Shpg. wt. 500 lbs..

IMPROVED MOTOR DRIVEN POWER FREEZER

CAPACITY 40 QUARTS

\$227.00 and

This freezer is of the same reliable construction as the one described at the top. The can, tub, beater and cover are the same. The motor is firmly bolted to a bracket and is equipped with a noiseless fibre pinion running into a cut gear. The freezer has no i.e. crushing attachment. A 2 H. P. motor—either Alternating or Direct current is required, costing 5c per hour to operate. The can revolves about 125 R. P. M. and will turn out about 250 gallons of cream daily. Gears are guarded. Space required is 33x20 in. Ht. over all 56 in. Cap'y of 40 qts. Shpg. wt. 350 lbs.

20 QT. FREEZER WITH MOTOR ATTACHED

This machine is used in hospitals, or other places where it is desirable to make a large amount of cream at one time. The construction is similar to the 10 gallon motor driven freezer. All gears are guarded to prevent accident. It is equipped with a 1 H. P. motor and costs 3c per hour to operate. The tub is made of Virginia cedar. The cover is made of heavy copper with brass bottom, well tinned inside. The cover has small glasses to view the cream. The beater is well made and heavily tinned. Floor space 42x20 in. Ht. 36 in. Shpg. wt. 430 lbs.

"CHAMPION" COMBINED ICE BREAKER AND ICE CREAM MACHINE

Ice Breaker and Freezer Operates Together or Independently. Patented clutch arrangement similar to that on an automobile. Enables the ice breaker and freezer to operate either independently of each other or together. A wing lever sets either section in operation.

There is a twofold advantage in this machine. First, the saving of space and power; second, the saving in wear and tear. It is quite evident that it takes more power to operate both sections together than it takes to operate only one. The same applies to wear and tear on the motor and the wear on the parts. Very often one section is used a great deal more time and for such purposes there is no more economical machine than the "Champion" No. 1.

The frame is absolutely rigid and free from vibration. Bearings ample provision for lubrication, resulting in maximum resistance to wear. The gears are permanently set into correct position and therefore need no adjustment and cannot slip out. The gears run in oil making action smooth and quiet. The tub is of very heavy selected Virginia White Cedar, painted inside and outside with acid resisting paint. The ice cream can is made of heavy copper and is of 40 quart capacity. The ice breaker is of heavy construction. Diamond shaped teeth are set in sockets on drum. Ice can be cut fine, medium, or coarse by turning a thumb screw. **Shipped from Factory in New York City.**

Made only for motor drive. Size of motor, 2 H. P. Floor space, 60x32 in. Machine 61 in. high. Breaker hopper, 16x17 in. Shpg. wt. 1,650 lbs.

ICE BREAKING MACHINES AND ICE CUBE CUTTERS

"CREASEY" MOTOR DRIVEN ICE BREAKERS

An economical and satisfactory outfit, neat and compact. Comes completely assembled, fitted with guarded drive, can be installed at any convenient point. Powerful slow speed motor mounted on top of machine, protected by a strong baffle, driving direct to the ice-breaker shaft through pliable belt with idler arrangement for adjusting the belt tension. No gears to make noise, jam or break. Prices cover the outfit complete, including ice breaker, motor starter, belt and idler drive, casing to cover belt, baffle to protect heavy motor and flywheel. Used by The Palmer House, Union League Club of Chicago, Book-Cadillac Hotel, Detroit, Olympic Hotel, Seattle, Ben Franklin

Philadelphia, Allison Hospital, Miami, Alba Hotel, Palm Beach, and many other hotels, hospitals, clubs, etc.

"BLAKESLEE" GIANT ICE CUBE CUTTERS

To meet the demand for a machine of very large capacity, and one adapted for very hard usage, the Blakeslee Giant Ice Cube Cutter was put on the market. This machine has several new features, which make it the most desirable and best machine ever designed for the purpose of cutting ice into cubes. Guaranteed to be the speediest, most economical, safest and most durable machine ever produced. We are prepared to furnish this machine

to cut either 1½ or 2 in. cubes, and can furnish special sizes to order. The slide will accommodate a cake of ice 12x12 in. of any height. Capacity of the Blakeslee is 5,000 1½ in. cubes an hour. Bearings are extra large and lined with Phoenix best Babbitt metal, considered the best on the market today. Bearings are all fitted with dope cups, to insure easy oiling. Everything about the machine has been designed with a view to the hardest kind of service. The machine requires 1 h. p. for operation, occupies a space 30x40 in. Speed of pulley, 900 revolutions a minute. Shpg. wt. 450 lbs.

9E3080F

Each \$250.00

Same style as above, for hand power or with pulley for belt drive. Hand machine will cut 1,000—1½ in. cubes per hour. Power machine will cut 2,500—1½ in. cubes per hour. Floor space required 22x33 in. Shpg. wt. about 325 lbs.

9E3081F With crank for hand power..... } Each, \$140.00
9E3082F With pulley for belt drive..... }

Blakeslee Ice Cutters are Shipped from Factory in Chicago.

"CREASEY" ICE BREAKERS

Hand Power

No. 9E3054 is intended for hospital use, where broken ice is often required instantly. It is also useful for restaurants, where a limited amount of broken ice is used. It is a small, compact, well-made machine, easily operated.

Nos. 9E3061F to 9E3065F are popular hand-power machines for hotel or restaurant use.

For specifications and prices see column at right.

"CREASEY" ICE BREAKERS

Medium Size

For Hand and Power

All machines at right are very strongly made. They are usually run by power, but may be operated by hand if necessary.

No. 9E3056F is for use by power only.

For specifications and prices see column at right.

"CREASEY" ICE BREAKERS

Large Size For Power

Nos. 9E3083F to 9E3086F, inclusive, are large breakers operated by power. They are very efficient.

Nos. 9E3084F and 9E3085F are of the Hopper-Type of ice breaker. Wherever it is feasible to place the ice breaker close to or just beneath the floor, the Creasey Hopper-Type Machine will show an immense saving in the labor and cost of handling both the ice cakes and the

ice. For example, where the ice storage room is above the room, the cakes can be slid directly into the hopper of the machine supported on I-beams or channel irons just beneath the floor. The broken ice can be delivered by means of a chute or conveyor to wagons, boxes, trucks, etc. The bottom casting of this machine forms a solid, jointless hopper or funnel. There is, therefore, no seepage, and there is also no annoyance from scattering of the broken ice.

For specifications and prices see column at right.

All "Creasey" Ice Breakers with the letter (F) following numbers are shipped from factory in Pennsylvania.

ICE BREAKERS, CRUSHERS AND FREEZER

ICE BREAKERS OR CRUSHERS—Built for Service and Durability

Small Ice Crusher—For counter and individual service. Splendid to crush ice for cooling drinks. Also suitable for restaurants, confectioners, hospitals and private homes. Cuts ice evenly and eliminates waste. The price is so low that any kind of establishment that uses crushed ice can afford to put several of these in service. Strongly built for real service. The strong driving wheel exerts considerably more power than does the direct connected plain handle type. Made of strong cast iron, heavily retinned throughout.

Ht. over all 13 in. width including handle 12 in. Fly wheel 12 in. diam. Hopper 5x5 in. Shpg. wt. 25 lbs.

9E3028 Ice Crusher only. Pan not included. Each, **\$8.00**

"New Rapid"—Extra heavy cast iron body, thoroughly galvanized, round steel cylinder with eight perfectly tempered removable steel picks. Heavy fly wheel makes operation easy. Floor space 12x12 in. Takes ice 6x8 in., any length. Size of hopper 7 3/4 x 9 in. Ice pan 8 3/4 x 12 1/2 in. Ht. 6 3/4 in. Fly wheel 13 in. diam. Ht. over all 17 in.

9E3027 Shpg. wt. 46 lbs. Each, **\$18.00**

THE JACK FROST ICE SHAVER

MAKES A POPULAR 5c SELLER

Made especially for making Snow Ice Balls, which with flavor added make a fast-moving popular 5c seller. Used by confectioners, concession men at Ball Parks, Amusement Parks, Summer Resorts, etc. To operate, pack ice into opening of hopper and turn driving wheel. The heavy cast iron arm which fits into hopper acts as a pressure bearing down on and forcing the ice into two sharp steel knives, which work as slicers in cutting the ice evenly into regulation size. Glass or receptacle placed under knives, receives the ice as it drops through. Made of heavy cast iron, painted aluminum finish. Ht. to top of hopper 15 1/4 in., length of base 14 1/4 in. Shpg. wt. 67 lbs.

9E3029 Ice Shaver only. Glass not included. Each, **\$14.00**

"Creasey" Medium—A very popular size for operators who need a somewhat larger hand machine than No. 4E3054. Ice opening 9 1/4 x 14 1/2 in. Floor space 14 x 25 in. Complete with 7 tooth fine comb and 4 tooth coarse comb. For hand operation.

9E3055 Wt. 225 lbs. Each, **\$55.00**

"Creasey" Midget—A small size which is widely used. Floor space 12x15 1/2 in. Ht. 17 in. Hopper 7x9 1/4 in. Japanned finish. Complete with wooden baseboard, galvanized ice pan and agate handling scoop. For hand operation. Complete with 8 tooth fine comb and 4 tooth coarse comb.

9E3054 Wt. 100 lbs. Each, **\$34.50**

New Model Motor Driven "Creasey"—For hotels, restaurants and institutions. Cap'y 1 to 2 tons per hour. Made of best materials and will give long service. Floor space 16x24 in. Ht. 34 in. Hopper 9 1/4 x 14 1/2 in. Drum 12x8 1/2 in., fitted with 8 picks. 2 combs for regulating size of broken ice; a fine comb with 7 teeth and a coarse comb with 4 teeth. Shipped completely assembled with motor, chain protected by steel casing and cast iron base for storage of broken ice. Shipped from factory in Pennsylvania. Shpg. wt. about 500 lbs.

At Under-Market Quotations

THE NEW DESIGN TRIPLE MOTION "WHITE MOUNTAIN" ICE CREAM FREEZER

The triple motion produces excellent results. The can moves from right to left, scrapes the frozen cream from the inside of the can and throws it to the center. At the center the floats of the inside beater, which move in the opposite direction, return the contents to the outer edge. This keeps the cream in constant motion, thoroughly mixes it, and produces a smooth and delicious cream. This is the only freezer on which the speed can be regulated to conform with the formula for perfect ice cream. The freezer should start slowly and the speed be gradually increased as freezing commences; after freezing is started the speed should be increased until the greatest degree of swelling is accomplished. The cream instead of absorbing air, expels it, producing a cream that will stand up and be of a richness and tastiness that is unsurpassed.

Every part of the freezer that comes in contact with the cream is heavily plated with block tin, making it rust proof and sanitary. The tub, can and all parts of the freezer are made of the best materials and are guaranteed satisfactory in every respect.

TRIPLE MOTION HAND FREEZER WITH CRANK

12½ in. Wt. 16 oz.....Each, **35c**

"KRUSTY KORN" BAKER

Turn to page 176 and see Our New
Money Maker. Cooks Frank-
furters and Hamburger in Corn
and Molds them like an Ear of
Corn. They're going to be a
big Hit.

"ECONOMY" CREAM AND TOPPING BEATER

Simple Construction. Easy to Operate. Easy to Keep Clean. Low Prices

Because of its simplicity of construction, ease
of operation and durability the "Economy"
is one of the most popular cream and top-
ping beaters made. It is an item which will
interest every soda fountain proprietor, be-
cause of its economical and service-giving qual-
ities. It beats cream and marshmallow
topping efficiently and quickly, doing it
more satisfactorily than by any other
means yet discovered. It is easy to
keep clean because of the simple con-
struction and small number of parts. All
interior parts are covered with tin to in-
sure sanitation. We call particular atten-
tion to the prices which are exception-
ally low for an article of this high quality.

ICE CREAM TUBS, CANS, MOULDS

PAILS, CYLINDER
TANKS and TRUCK

ICE CREAM PACKING TUBS

Made of Selected Everlasting White Cedar

These practical, strongly made tubs combine utility, cleanliness, economy and service. Made of seasoned close-grained white cedar, treated to resist water absorption and to stand hard usage. In actual experience, white cedar outlasts all other woods for ice cream packing tubs. The tubs are tightly bound by heavy galvanized hoop bands. Staves and bottoms tongued and grooved. Extra thick bottoms on 8 and 12 qt. sizes; double bottoms on 20 and 40 qt. sizes. All have galvanized drop handles.

ICE CREAM CABINETS AND ICE CHESTS

MAHOGANY FINISH ICE CREAM CABINETS

These Ice Cream Cabinets are of standard size and construction and are made especially for us.

Made of first quality ceiling cypress, rich mahogany finish with waterproof varnish. Ht. 34½ in., width 22½ in. Top flush with rim, hence no exposed wearing surface. Sides securely fastened to hardwood corner posts, which are saturated in oil to prevent decaying.

Insulation: Ground cork between 1 in. wood outer wall and wood inner wall. Cork insulation all around, being 3 in. thick at bottom and tapering on sides to 2 in. thick at top. Insulating paper between walls and cork. **Lining:** "Armco" rust-resisting iron, may be taken out by removing four small strips inside rim and loosening faucet and lock-nut. Improved nickel plated brass faucet. **Shipped from factory in Wisconsin.**

NOTE—Prices include heavy galvanized iron packing can cylinders only. For packing cans see index.

29E4250F Cap'y one 5-gal. can. Length 21 in. Shpg. wt. 129 lbs.....	Each, \$22.00
29E4251F Cap'y two 5-gal. cans. Length 35½ in. Shpg. wt. 200 lbs.....	Each, 30.00
29E4252F Cap'y three 5-gal. cans. Length 50 in. Shpg. wt. 255 lbs.....	Each, 39.75

BRINE WELL CABINETS

Requires ¼ less ice and salt for first filling and ¼ to ½ less for refilling.

Illustrating 29E4267F

Illustrating interior of 29E4267F

No ice or brine comes in contact with cans. Main holder or compartment tank is removable, easily kept clean. Ice cream cans are set into compartments, or bricks piled into them. Compartments can be used for either bulk cans or brick packages. Cabinet made in walnut finish, smooth panel, insulated with asphaltum paint, 2 slabs of 1½ in. cork board, and 2 sheets of asphaltum paper. Insulation is 3 in. in upper ⅔ of cabinet, 6 in. in lower ⅓, and 4 in. in bottom, and is triply sealed by the asphaltum paint and paper. Gasket is inset around the inner edge of cabinet and insures a tight fitting cover. Ice-pack is decreased ¼, but lower part of compartment tanks are surrounded by the brine which drips down from the ice pack. From Wisconsin factory.

29E4265F One 20 qt. cap'y compartment. Outside dimensions 26x25x36 in. Each	\$43.50
29E4266F Two 20 qt. cap'y compartments. Outside dimensions 36x25x36 in. Each	58.50
29E4267F Three, 20 qt. cap'y compartments. Outside dimensions 46x25x36 in. Each	72.00
29E4268F Four 20 qt. cap'y compartments. Outside dimensions 56x25x36 in. Each	90.00
29E4269F Five 20 qt. cap'y compartments. Outside dimensions 66x25x36 in. Each	110.00

NOTE—No. 4E2016 Steel Ice Cream Packing Cans will fit above Cabinets. See page 229.

MAHOGANY FINISH ICE CREAM CABINETS

Made of first quality cypress, rich mahogany finish with waterproof varnish. Ht. 34½ in., width 22½ in. Top flush with rim, hence no exposed wearing surface. Sides securely fastened to hardwood corner posts, which are saturated in oil to prevent decaying.

Insulation: Corkboard 2 in., thick all around between 1 in. wood outer wall and wood inner wall. Thick layer of insulating paper between walls and corkboard.

Lining: "Armco" rust-resisting iron, may be taken out by removing four small strips inside rim and loosening faucet and lock-nut. Improved nickel plated brass faucet. **Shipped from factory in Wisconsin.**

IMPROVED BRICK ICE CREAM CABINETS

Top may be removed for icing without disturbing tanks or their contents. A metal sleeve extends down over tank with tight-fitting cover.

Two wood strips on side of sleeve fit into top of cabinet, holding tanks firmly in place while icing; also, sleeve and cover prevent ice and salt from falling into tank. Cabinet made of first class cypress, rich mahogany finish, waterproof varnished. Insulation consists of 2 in. thick corkboard all around set between 1 in. wood outer wall and wood inner wall. Thick insulating paper between corkboard and walls. Lining of "Armco" rust-resisting iron, may be taken out by removing four strips inside rim and loosening faucet and lock-nut. Improved nickel plated brass faucet.

Shipped from factory in Wisconsin.

NOTE—Prices include heavy galvanized square tank for holding brick ice cream and special metal sleeve for holding tank in place.

29E4260F 1 compartment. Cap'y 20 qt. Length 22¼ in., width 20¼ in., ht. 34½ in. Wt. 135 lbs.....	Each, \$32.50

"LORILLARD" R

For HOTELS, RESTAURANTS, CLUBS, High Grade Refrigerators Made by a Long

THE refrigerators manufactured by the Lorillard Company have for more than a decade been considered the standard in scientific construction, economical operation and all around efficiency. This is not hard to understand when it is considered that no effort is spared in their manufacture to make them in the best way possible and to continuously improve them. The factory in which "Lorillard" Refrigerators are built is a model of its kind, containing mechanical equipment of the most advanced type and employing men of long experience in refrigerator manufacture.

Why "Lorillard" Refrigerators Are Superior

An ice-cooled refrigerator is efficient inversely in proportion to the amount of ice required to maintain in it the temperature necessary to protect the food contents. In the construction of such a refrigerator two principles are involved: Air circulation and insulation. These qualities are distinguishing characteristics of "Lorillard" hotel and restaurant refrigerators. No better refrigerators can be made.

To maintain the necessary low temperature in a refrigerator with a minimum consumption of ice, it is imperative that the insulation between the exterior and interior walls be most efficient so that the warm air which surrounds the refrigerator will not penetrate into the interior. All "Lorillard" Refrigerators are insulated with compressed cork board of U. S. Government specifications: i. e., to withstand immersion in boiling water at an atmospheric pressure, without disintegrating or expanding more than 2% lineal dimension in width, breadth or thickness. Cork board was adopted as a standard insulation only after repeated tests

proved it to be superior to any other kind of insulating material. It has demonstrated splendid serviceability and great efficiency in "Lorillard" Refrigerators over a span of many years.

To insure maximum food preservation, the cold air in a refrigerator must circulate. The "Lorillard" Cooling System maintains a constant circulation of cold, dry air throughout the interior of the refrigerator as long as ice remains in the cooler. As the cold air in the ice chamber is heavier than in the food compartments, it sinks down into the lower food compartment and then, passing under the dividing partition, it ascends through the remaining food compartments on its course back into the ice chamber. During this process of circulation the cold air absorbs all moisture, impurities and odors. These are condensed by contact with the ice and then are drained off with the water. In this manner "Lorillard" Refrigerators are always kept absolutely dry and sanitary,—every nook and corner is sweet and pure at all times.

View in the "Lorillard" Refrigerator at Kingston, N. Y.; showing a number of giant power brakes used in their manufacture.

No better testimonial of the value of "Lorillard" Refrigerators can be given than the great number of their satisfied users. A few of these are illustrated and listed on this page.

The
S. S. MALOLO
American-Hawaiian Steam-
ship Company

An exceptionally fine installation. The cargo chill rooms, and all refrigerators in this largest steamship ever constructed in America were built in the Lorillard Refrigerator Factory.

"MASTER-MADE" ALL-PURPOSE REFRIGERATOR

Made by the Lorillard Refrigerator Company

Although Lorillard refrigerators are sold by us at lower prices than other manufacturers charge for similar sized, but lighter constructed ice boxes, they are not advertised as "low priced." The feature that enables us to sell so many refrigerators of our various models is that they are the best refrigerators for the hotel and restaurant that can be made. And don't forget that to be the best means several things. Just compare the weight, construction, finish, insulation, lining, hardware—and price—with the same points in other makes and you will see at once why our big refrigerator plant is kept busy. The outer case or cabinet of Lorillard refrigerators is made of selected quality Kiln-dried ash, full paneled, smooth finished, stained and varnished.

The walls—and here's one of the big features—are 4 inches thick, consisting of the $\frac{3}{4}$ -inch exterior ash case, then a heavy sheet of water-proof

insulating paper, then the inner or insulating wall of 2-inch compressed corkboard, followed by another sheet of water-proof insulating paper, then a $\frac{3}{4}$ -inch hardwood inner case and finally a lining of heavy galvanized iron. Lorillard refrigerators are ice savers and that's what a heavy-duty refrigerator must accomplish, for ice costs money. Moreover, Lorillard refrigerators produce and hold a maximum low temperature by means of their scientific construction, whereby there is a constant circulation of cold, dry air throughout all the provision chambers, the greatest aid to the preservation and purity of foods. Finally, Lorillard refrigerators are not only superbly designed and finished, but they are sturdily built that they outlast many times the lighter-weight grade made to sell "at a price." All doors are equipped with our own special design solid brass strap hinges, and automatic self-closing lever handle locks.

—SPECIFICATIONS—

Width, 6 ft.; Depth, 30 inches; Height, 6 ft.

Ice chambers in center. Ice capacity, 540 lbs.

Two compartments on each side of ice chamber and one compartment below.

Exterior case made of paneled ash, stained and varnished.

Interior lined throughout with galvanized iron.

Insulation: 4-inch walls (2-inch corkboard, two thicknesses of water-proof paper and two thicknesses of $\frac{3}{4}$ -inch lumber).

Hardware: Solid cast brass. Hinges have case hardened steel washers. Levers are self-closing type, without springs.

Ice Compartment: 36 inches high, 24 inches wide, 21 inches deep.

Ice door opening: 31 $\frac{3}{4}$ inches high, 15 $\frac{1}{2}$ inches wide.

Compartment under the ice chamber: 27 $\frac{1}{2}$ inches wide, 21 inches deep, 18 inches high.

Door opening: 15 $\frac{1}{2}$ inches wide, 14 inches high.

Upper Right Compartment: 28 $\frac{1}{2}$ inches high, 18 inches wide, 21 inches deep. Door opening: 25 $\frac{1}{2}$ inches high, 15 $\frac{1}{2}$ inches wide.

Lower Right Compartment: 34 inches high, 18 inches wide, 21 inches deep. Door opening: 25 $\frac{1}{2}$ inches high, 15 $\frac{1}{2}$ inches wide.

Upper Left Compartment: 28 $\frac{1}{2}$ inches high, 18 inches wide, 21 inches deep. Door opening: 25 $\frac{1}{2}$ inches high, 15 $\frac{1}{2}$ inches wide.

Lower Left Compartment: 34 inches high, 18 inches wide, 21 inches deep. Door opening: 25 $\frac{1}{2}$ inches high, 15 $\frac{1}{2}$ inches wide.

Shelves: Hardwood, slat construction. Removable.

Crated for shipment set up. May be taken apart by removing lag screws under brass bolt at the front. Back and top have exposed heads.

Shpg. wt., 1,250 lbs.

er Right Compartment: 35 1/2 in. high, 22 in. wide, 21 1/2 in. deep.
Compartment door opening is 27 1/2 in. high, 19 in. wide.
erator crated for shipment set up. It may be knocked down for shipment or
val by taking out the lag screws at front, rear and top.
Shipped from Lorillard Factory at Kingston, N. Y. Shpg. wt. 1,120 lbs.
120F.....Each, \$260.00

Special Restaurant Refrigerator

One of the most popular types—a medium-size combination pantry and storage ice box, in our regular weight and construction. Save \$50.00 on this refrigerator by ordering direct from the factory distributors.

Specifications:
4 ft. 6 in. wide, 2 ft. 6 in. deep, 6 ft. high.

Ice Chamber in upper left hand corner.

One compartment below Ice Chamber and two compartments on right hand side of Ice Chamber.

Ice capacity: 480 pounds. Exterior paneled ash, stained and varnished.

Interior galvanized iron lined throughout.

Insulation: 4-in. walls—2-in. corkboard, two thicknesses of waterproof paper and two thicknesses of 3/4-in. lumber.

Refrigerator shipped in one piece—easily taken apart.

Hardware, solid cast brass. Hinges have case-hardened steel washers.

Levers: self-closing type without springs.

Ice Compartment: 36 in. high, 21 in. wide, 21 in. deep.

Ice door openings: 31 1/4 in. high, 17 1/2 in. wide.

Compartment under Ice Chamber: 17 in. x 22 in. x 21 in. deep.

Door opening: 17 1/2 in. wide, 13 in. deep.

Upper Right Compartment: 28 1/2 in. x 22 in. x 21 in. deep.

Door opening: 25 1/2 in. high, 17 1/2 in. wide.

Lower Right Compartment: 34 in. x 22 in. x 22 in. deep.

Door opening: 25 1/2 in. high, 17 1/2 in. wide.

Shipped from Lorillard Factory at Kingston, N. Y. Shpg. wt. 1,020 lbs.

29E105F.....Each, \$235.00

An Ideal Restaurant Refrigerator

This is a special type of heavy refrigerator designed to meet the requirement for a convenient pantry and short-order box for the hotel, restaurant or tea room. It is identical in size and construction with our 29E100F shown on Page 236 except that the lower right hand food compartment is replaced by three galvanized iron perforated drawers running on roller bearings. These drawers are self-closing.

Specifications:
Width, 6 ft.;
depth, 30 in.;
height, 6 ft.

Ice chamber in center. Ice capacity, 540 lbs.

Two compartments at left of ice chamber and one compartment at upper right.

Lower right hand section includes 3

self-closing, galvanized iron drawers, for cut meats, etc. Drawers are 5 in. deep.

Exterior case made of paneled ash, stained and varnished.

Interior lined throughout with galvanized iron.

Insulation: 4-in. walls (2-in. corkboard, two thicknesses of waterproof paper and two thicknesses of 3/4-in. lumber).

Hardware: Solid cast brass. Hinges have case-hardened steel washers. Levers are self-closing type, without springs.

Ice compartment: 36 in. high, 24 in. wide, 21 in. deep.

Ice door opening: 31 3/4 in. high, 15 1/2 in. wide.

Compartment under the ice chamber: 27 1/2 in. wide, 21 in. deep, 18 in. high.

Door opening: 15 1/2 in. wide, 14 in. high.

Upper Right Compartment: 28 1/2 in. high, 18 in. wide, 21 in. deep. Door opening: 25 1/2 in. high, 15 1/2 in. wide.

Upper Left Compartment: 28 1/2 in. high, 18 in. wide, 21 in. deep. Door opening: 25 1/2 in. high, 15 1/2 in. wide.

Lower Left Compartment: 34 in. high, 18 in. wide, 21 in. deep. Door opening: 25 1/2 in. high, 15 1/2 in. wide.

Shelves: Hardwood, slat construction. Removable.

Crated for shipment set up. May be taken apart by removing lag screws under brass bolt caps at the front. Back and top have exposed heads.

Restaurant Utility Refrigerator

Lorillard refrigerators are ice savers—the most sought characteristic in a cabinet designed for the storage and protection of food. Maximum efficiency in the Lorillard refrigerator is secured by the best insulation found in any refrigerator line, together with perfect air circulation. No better refrigerators can be made. This extra heavily constructed utility storage or butcher type hotel or restaurant refrigerator has a full-height door to the meat compartment, which is provided with hooks for hanging meats. The exterior cabinet is made of selected quality kiln-dried Ash in full paneled design, sanded smooth, neatly stained and finished with three coats of special varnish. This refrigerator is just as good as skill and experience can produce.

Shipped from
Lorillard Factory
at Kingston, N. Y.

Specifications of our Utility Storage or Butcher Refrigerator

Width, 5 ft. 6 in. Depth, 2 ft. 10 in. Height, 6 ft. 5 in. Ice chamber at upper left. Ice capacity, 625 lbs. One full entrance door to meat compartment at the right. This compartment is fitted with galvanized hooks for meats. One compartment under ice chamber for milk, butter, etc. Interior lined throughout with heavy galvanized iron. The walls are 4 in. thick. Stagnant insulation, consisting of 3/4-in. outer case of Ash, a layer of heavy waterproof insulating paper, 2 in. of compressed corkboard, another sheet of heavy waterproof insulating paper, 3/4-in. wall of selected Spruce, and finally an inner lining of 24-gauge galvanized iron. Hardware solid cast brass. Heavy strap hinges with case-hardened steel washers. Ice compartment: 33 in. high, 29 in. wide, 25 in. deep. Ice door opening: 30 in. high, 22 in. wide. Left food compartment: 30 in. wide, 25 in. deep, 27 in. high. Door opening: 23 in. wide, 21 in. high. Full length compartment: 26 1/2 in. wide, 25 in. deep, 67 in. high. Door opening: 23 in. wide, 60 in. high. Crated for shipment set up. Easily taken apart by removing lag screws at top, front and back. Shpg. wt. 1,350 lbs.

"MASTER MADE" REFRIGERATORS

Manufactured Especially for Us

"Master Made" refrigerators, listed below and on the following page, are manufactured especially for public service. The walls are made with an abundant insulation of pure corkboard. They are of the capacities for use in hotel, restaurant, lunch room and cafeteria

pantries. The cases are of highest grade construction throughout and are carefully finished and the hinges and fasteners extra heavy. All refrigerators are designed to give best arrangement of space and to afford adequate refrigeration with minimum ice consumption.

SUPERIOR FEATURES OF "MASTER MADE" REFRIGERATORS

Refrigerators with Perfect Circulation of Cold, Dry Air.
is accomplished by a solid, insulated "baffle" or separation wall, open at top and bottom only, between the ice and the storage chambers. This insulated separating wall maintains two temperatures, the colder or heavier air falling from the ice and then becoming lighter rising through the storage chamber clear to the top of the refrigerator and passing into the ice chamber again over the top of the baffle wall. Perfect circulation is accomplished by this system, as without tight, insulated "baffle" there is a tendency to an immediate equalization of temperature throughout the refrigerator, causing dampness and stagnant air. This system of circulation applies to "Master Made" Refrigerators except 29E625F shown on page 240, which is designed for overhead icing, but circulates in a similar manner and accomplishes the same results.
"Master Made" Refrigerators are dry, sanitary and efficient, with the utmost keeping qualities by reason of extra thick walls packed tightly with mineral wool, the insulation known for use between wooden walls of small refrigerators. Hinges and fasteners are of polished brass, the heaviest and most efficient used on any of stock refrigerators and of the most approved types.
Doors close tightly on rubber gaskets. The interiors are of clear white Washington spruce, sanded and shellacked. Shelves are of slatted hardwood.
"Master Made" refrigerators are guaranteed to be superior in construction and efficiency and will make good any inherent defects.

SERVICE REFRIGERATORS—Made to Order

We will design and have manufactured to meet your own requirements, any type refrigerator necessary to give you a complete installation of efficiency and the greatest utility, whether for hotels, restaurants, clubs, hospitals, etc. Special Service Refrigerators are made with corkboard insulation, exteriors of oak, and interiors of white Washington spruce with slatted wood shelves, or in the better class of equipment, interior linings of galvanized rust-resisting ingot iron, and etched wire bar shelves. Our Service Refrigerators present the very highest type of construction in built-to-order equipment. If you will give an outline of your requirements, our Engineering Department will furnish designs, specifications and prices on any kind of Service Refrigerator required.

THE "BUFFALO" DOOR CONTROLLER

Keeps Refrigerator Doors Closed—Reduces Ice Bills.

The "Buffalo" Door Controller is a device simple and effective in operation, designed to reduce ice bills and prevent food spoilage by closing ice box door instantly and securely.

Nothing is gained by having a good ice box if the cold air is allowed to escape and the warm air to enter. The "Buffalo" Door Controller is guaranteed to prevent this by giving instant and continuous service in keeping the ice box door tightly closed. In one month's time, the savings on ice and food bills made possible by this device will make it pay for itself.

Can be quickly attached to any refrigerator door and easily adjusted for proper tension. Very strongly constructed and will never get out of order. Shpg. wt. 13¾ lbs. 29E610... Each, \$15.00

"MASTER MADE" HOTEL AND RESTAURANT PANTRY REFRIGERATORS

With Smooth Doors

Not large household refrigerators, but heavy, well-built refrigerators of good capacity for hotel and restaurant use. Built with 4 in. walls insulated with 2 in. of pure corkboard, making an exceptionally efficient, ice-saving insulation. Exteriors of handsome selected beaded oak and are made with smooth doors of 5-ply laminated stock, ¾ in. thick and fitted with rubber gaskets around the inside edge of the overlap. The doors are hung with extra heavy polished brass hardware. Interiors made of clear spruce, well shellacked. Floors covered with galvanized sheet steel. These are the most substantial small size hotel and restaurant refrigerators made. Shipped from Michigan factory.

Each,

MASTER MADE" HOTEL AND RESIDENCE REFRIGERATORS

White Enameled Residence Refrigerators

A fine apartment house or family refrigerators have been designed to meet the incessant demand for refrigerator efficiency in the home. The exterior case of the Lorillard family refrigerator is made of 5-ply flush-panel, Birch, lined with two coats of filler and two coats of special snow white refrigerator enamel, hand rubbed and polished. Greatest insulation efficiency is assured in the construction of the wall, which consists of the outer case of 5-ply, two layers of waterproof insulating paper, a 1½-inch thickness of compressed corkboard, an inside wall of 5-ply tongue-and-groove Spruce, and finally a food interior of seamless porcelain enameled steel. The porcelain coating of the inside food container is fused onto the steel at a temperature of 1800 degrees. Nothing more sturdy could be devised. Ice chambers are lined with 24-gauge galvanized iron and the food compartments are lined with strong tinned wire shelves. All hardware is triple nickel plated; the levers being the self-closing type.

Shipped from Lorillard factory at Kingston, N. Y.

Ice Cream or Milk Refrigerator

Super-Quality Cabinet. Made of the best quality selected, Kiln-dried Ash, paneled design, sanded smooth, stained and varnished. The insulation consists of (1) an outside wall of ¾-inch plywood, (2) a heavy layer of Neponset waterproof insulating paper, (3) 2 inches of compressed corkboard, (4) a 5-ply layer of Neponset waterproof insulating paper, (5) an underlayment of ¾-inch spruce, (6) and a lining of heavy galvanized iron. The heavy, hinged full length hinged cover is provided with a separate opening and movable lift service cover above each cream can. Hinges and handles are of a heavy solid cast brass and each cabinet is provided with a special brass lock. Prices include galvanized cylinders for 20-quart cans, but do not include ice cream cans. These are sold separately.

MODERN REFRIGERATORS FOR HOTELS, RESTAURANTS, APARTMENT HOUSES AND KITCHENETTES

The last word in sanitary construction, durability and attractive appearance. Inside cases made of odorless and tasteless wood, fastened to hardwood cleats, making them airtight. Outside cases of selected hardwood, finished in 3 coats of filler and waterproof varnish. The hotel or restaurant model is lined with porcelain and the others with white enamel, thoroughly sanitary and easy to clean. New patented door fastener locks automatically when door is closed and starts door open when handle is raised. The insulation of 29E800F box is of quilted sea grass, between 2 heavy sheets of paper. On other boxes the insulation is non-conducting sheathing with ample dead air space. Door fasteners and hinges are heavily nickel plated and polished. A continuous circulation of air prevents that stale smell and keeps contents fresh and pure. Shelves are of wire, heavily tinned. Ice rack is of galvanized steel bars, welded together. Lid holder keeps top up while ice is being put in. Absolutely airtight.

SMALL HOTEL AND RESTAURANT MODEL

A Well Made Refrigerator of Good Capacity Suitable for Use in Small Hotels and Restaurants. While this is a Splendid Refrigerator for the money it is not a heavy duty box and we do not guarantee it for hard service.

FOR HEAVY DUTY REFRIGERATORS SEE PAGES 236 to 240.

Porcelain Lined. Suitable for use in small hotels and restaurants. Made of selected ash lumber, golden oak finish. Outside dimensions: Width 45½ in., depth 26 in., ht. 64½ in. Ice compartment: Width 35½ in., depth 20 in., ht. 15½ in. Provision compartment: Width 19½ in., depth 20 in., ht. 32 in. Shipped from factory in Michigan.

Quality Fixtures

Made in Our Own

Woodworking Plant

WE OPERATE a large, fully equipped woodworking factory where we specialize in the manufacture of quality fixtures of all kinds for Restaurants, Lunch Rooms, Soda Parlors and Stores. Here skilled craftsmen, using equipment of the most modern type, design and build Display Cases, Counters, Back Bars, Soda Parlor Booths and many other items of this character. Centering our energies, as we do, on this type of work as a specialty, we have been able to develop special methods and designs with unusual success. We can quote you on standard items of equipment, a few of which are illustrated below, or on fixtures built to your own design or special specifications.

"Twentieth Century" Settee Booths

Something New! A Decided Advance

SEMI-FRAMELESS COUNT

For Pastry, Candies, Cigars and Cigarettes

Semi-frameless Show Cases are made with bulbed edged crystal glass which gives the effect and strength of much higher priced glass. They have no top frames or front frames. The narrow end frames afford almost the same visibility as the more expensive frameless plate glass construction. The special bulbed edge strengthens and protects the edge by preventing chipping.

SEMI-FRAMELESS DISPLAY CASES

30E420F Mahogany finish.
Shipped set up from factory in Southern Ohio.

Made of birch, finished in mahogany. Top is double strength glass with bulbed edge, which strengthens it and gives the effect of heavier glass. Front and ends of clear sheet glass. Wood door, spring hinged at bottom and with knob at top. Bottom covered with silk velour. Width 10 in., ht. 7 1/4 in., length 15 in. Shpg. wt. 12 lbs.

\$4.50
Each

Each, **\$4.50**

SEMI-FRAMELESS PASTRY AND SANDWICH CASES

"ECONOMY" COOLERS

This high grade cooler will reduce your ice bill and will last for years. Made entirely of oakwood. Non-circulating air chambers, making natural and compact insulation, superior in many respects to others. Ice melts very slowly, yet gives continuous supply of good cold water at very low cost. Made of selected quarter-sawn oak with galvanized iron hoops highly finished. Heavy nickel plated faucet.

LITTLE BROWN COOLER

Keeps Liquids Cold

For restaurants, hotels, offices and stores. Liner made of non-vitreous earthenware, heavily insulated, sealed in a steel jacket and seal-packed. Keeps water cooler and fresher than when constructed of glass. Will retain ice 48 hours. Sealing out with hot water will not cause injury or breakage. Has 3 in. opening which allows your hand to pass inside for washing. A valve in the stopper automatically allows air to take the

place of the water when drawn out. The 5 gal. size takes only 12 lbs. of ice a day. About 10 gal. of water may be run through to one filling of ice. The 2 gal. size is provided with a bail handle for carrying. Six pounds of ice placed in water will last about 24 hours. Both sizes equipped with detachable drinking cup. Shipped from factory in Central Illinois.

NOTE—When ordering cooler stands please state diameter of base of cooler for which stand is intended.

ARTIFICIAL DECORATIONS

There are few things which make an establishment more attractive and inviting than artificial trees, palms, vines and flowers when properly placed. The numbers we show on this and the following pages are very natural appearing and realistically colored.

ARTIFICIAL TREES

They are natural in appearance and hold their color for a long period of time. Our Palmetto and Sago Tree reproductions possess all the beauty of the natural plants. They are not affected by heat or cold and require no attention beyond an occasional dusting. For these reasons they are preferable to live trees and cost but a fraction as much. The trunks are made of heavy wood covered with brown palm fibre, in which are concealed the tin tubes which hold the leaves. This trunk is mounted in a green wooden pail, the top of which is covered with moss. The leaves are natural appearing and dark green in color. Can be easily bent to droop naturally. Leaves can be removed for cleaning or replacement. Prices include trunk, pail and leaves, ready to set up.

PALMETTO TREES

MINIATURE

ARTIFICIAL TREES

The uses for these plants are innumerable. They can be used singly or in pairs with excellent results in any decorative scheme, and are also attractive in themselves. For show case, window or back bar decoration, they are hard to beat. The illustrations cannot do justice to these beautiful miniature trees. The full green branches give the effect of evergreens. Made of natural preserved green Lycopodium, full and plump, trimmed with moss. Come round or conical shape, mounted on wire frames and set in square wood boxes. Will last indefinitely and require little attention. Size, round 12 in. diam.; conical, 9 in. diam.; both 24 in. high. Shpg. wt. 5 lbs.

15E9165	Round Shape.....	Each,	\$5.95
15E9166	Conical Shape.....	Each,	\$5.95

NOTE—Above trees are also made to order in larger sizes from 3 to 10 ft. high. The larger sizes are suitable for floor use, for entrances and for inside decoration. Prices on application.

15E442 (Gro. \$5.00) Doz. **50c**

America's FLOOR

View showing an elevator lobby in the Morrison

THE NEW HOTEL MORRISON CHICAGO, ILL.

We supplied approximately 34,000 yards of carpets for the new Morrison, the tallest and one of the largest hotels in the world.

Premier Market Place for COVERINGS

AS MUCH as there is probably no item of furnishings or equipment which receives as severe wear and tear as carpets and other floor coverings, it is doubly important that they be selected from qualities and designs best fitted for the task. And it is equally important that they be sewed and laid in such a manner as to give every chance to give their full life of usefulness. The development of our floor covering department to its present position of absolute leadership both in volume and in quality is the direct result of the years of study and experience in the particular work of carpeting hotels, clubs, restaurants and other public places. It is a significant fact that our products have been selected by thousands of establishments whose problems of severe wear are of the most extreme kind. Do not fail to call upon us when in need of floor coverings of any type no matter how large or small the matter involved as there are innumerable ways we can serve you.

Our line includes every type of Carpets, Rugs, Linoleums, and Matting—only for public service.

View of a section of Carpet Sewing Shop.

Highly Skilled Carpet Sewing and Laying Service

A large part of our good reputation for floor coverings is due to the wonderful sewing and laying organization we have built up. Our carpet sewing plants in the east and west are models of their kind, and equipped with the most advanced type of rapid action machines. Our carpet layers are picked men and have the reputation of being the highest grade workers of their kind in America.

GOOD CARPET LAYING

Is Just as Important as Good Carpets

The matter of floor coverings does not end with just the selection of a good grade of carpet for it is equally important that this carpet should be properly laid in order to receive the maximum in results, long life and appearance. Be sure your carpets are laid by men who know their business for a carpet can be practically ruined by improper laying. One of the most important factors in the laying of carpets is to underlay them with Ozite Carpet Cushion. This high grade cushion of felted hair will actually double the life and softness of your carpets and will soon pay for itself

in this respect. Ozite protects your carpets because it eliminates the destructive friction between the heel above and the floor below. Ozite itself will never wear out and can be used under many carpets. It will never mat down, creep, buckle or lump up, but remains flat on the floor. It is treated to prevent moths. It is easy to lay carpets over Ozite for it is only necessary to fasten the Ozite slightly on the edges and then roll your carpet over it and fasten it in the usual manner. It will pay you well to have your carpets carefully laid and over Ozite, for longer life and better appearance will be the result.

Just roll the carpets over Ozite

Rugs and Carpets With out Ozite are Ground to Pieces by Friction

Ozite Cushions the Tread and Eliminates This Destructive Friction Between Heel and Floor

HOW TO ORDER CARPET

First of all, be sure that your measurements are accurate and allow sufficient yardage. If the room is of irregular shape and you cannot determine the amount of carpet needed, send us a diagram as indicated by the illustration below and we will figure the yardage for you. Be sure to show the location of the entrance and specify whether you want the strips of carpet to run the **long** or the **short** way of the room. (This is so that when the carpet is laid the room can be swept with the nap.) If instructions are not given, we will cut the strips to run the long way. In ordering, allow 1 yard to every 25 yards for waste in matching pattern. Therefore, when actual amount of carpet needed is 25 yards, 26 yards should be ordered.

How to Figure Amount of Carpet Needed

To the left we show the way a carpet is made for a room 12 ft. 9 in. by 27 in. wide and the border is 2 1/2 in. wide. **The amount of border needed is found by measuring the distance around the room, which in this case is 51 feet, or 17 yards.** To this add 3/4 yard for waste in matching the pattern, making 17 3/4 yards. **To find the length of each strip of carpet needed, the two widths of border, or 45 in., are deducted from the length of the room or 12 ft. 9 in., giving 9 ft.** **To find the number of strips, first deduct the two widths of border, or 45 in., from the width of the room, 27 in., or 108 in. The number of times 27 in. — the width of one strip — is contained in 108 in. is the number of strips required — in this case four.** Four strips 9 ft. long make 36 ft., or 12 yards, to which 3/4 of a yard must be added for matching, making 12 3/4 yards. **Therefore, the quantity of carpet and border needed for a room 12 ft. 9 in. by 27 in., allowing for waste, would be 17 3/4 yards plus 12 3/4 yards, or 30 1/2 yards.** **FIGURING AMOUNT OF CARPET WITHOUT BORDER.** The width of the room divided by 27 in. gives the number of strips the same length as the room which will be required. Do not forget to allow 1 yard waste to every 25 yards of carpet needed. If even strips of carpets do not exactly cover the width of the room and the remaining space is less than 13 in. wide, a strip one-half the length of the room can be ordered, and this will be split in two to cover the space. If the space referred to is more than 13 in. wide, however, it will be necessary to order the extra strip the full length of the room. We charge 35c per yard for making room size rugs or carpets with border (this includes cutting, fitting and sizing), and 15c a yard for cutting and sewing carpet without border.

Showing proper method of making diagram of room to be covered.

Information About Sewing Carpets

Modern factory methods prevail in our carpet sewing department—your order is assured careful attention and satisfactory workmanship is guaranteed. A charge of 15c per yard is made for sewing all carpets without border. For cutting and sewing bordered rugs or carpets we charge 35c per yard; **this includes the four processes of cutting, fitting, sewing and sizing.** We bind and tape the miters of all made-up rugs free of charge. To do this, we place them on the floor, face down. **All rugs made from carpet and border should be "sized"** so they will lie flat on the floor and not curl at the edges. Axminsters, however, owing to the peculiar stretch tightly, then wet the back with mixture of glue and water and allow to dry. We then roll them on poles for shipment. Axminsters, however, owing to the peculiar fabric, must be tacked down, otherwise they will quickly get out of shape and give an appearance of being poorly or improperly made. **The Proper Care of Rugs and Carpets.** Axminster, Velvet and Wilton rugs and carpets should be swept lightly when first laid—and always with the nap, not against it. If loose wool or lint is swept off, it is because these rugs are "sheared," and clippings remain in fabric for some time. Brussels rugs and carpet should not be swept for at least two weeks after laying, to give it a chance to flatten down. Instead of pulling loose threads, always cut them off and avoid causing damage. If light and dark pla appear in your Axminster or Velvet, it is because of the unequal crushing of the nap. No way has yet been discovered to prevent this. If you have this trouble, write us.

*Doubles
the Life of Your
Carpets and Rugs*

Carpets wear by friction. Between the constant pounding of hard-shod feet above and the unyielding floor below, they are simply **crushed, twisted and ground** to pieces at every step. OZITE Carpet Cushion is a soft, ever-resilient cushion of felted hair which, when placed under the carpet, softly absorbs the shocks of the tread which tend to destroy it. This not only increases the life of the carpet fully 100%, but also gives it a yielding softness which makes even the most inexpensive carpets "feel like walking on velvet."

Ozite Carpet and Rug Cushion

OZITE is a clean, perfectly sterilized and ozonized cushion of animal hair, felted under tons of pressure and reinforced through the center with a strengthening web of burlap. It is also treated to repel moths. OZITE will never lump, buckle or pack down hard even under the most intense wear. It can be taken up or put down like a rug without danger of tearing.

**The Next Time You Clean Your Carpets—
Relay Them Over OZITE Cushion!**

You can easily place Ozite Carpet Cushion under all your carpets without disrupting your service or business. Keep a roll of Ozite always on hand. The next time that some of the carpets are cleaned, lay the Ozite down and re-lay the carpets over it. Repeat this method in various sections of your establishment and in a short time all of your carpets will be underlaid with Ozite Carpet Cushion. Order a roll of Ozite NOW under our free trial offer plan and convince yourself that it will do all that we claim for it.

"OZITE" CARPET CUSHION

Guaranteed not to mat down hard, and will last a lifetime without losing its resilience. It is supplied up to 9 feet wide, giving a perfectly smooth cushion without seams or ridges. $\frac{1}{4}$ inch or $\frac{3}{8}$ inch thick OZITE is plenty heavy for hotel room use, $\frac{1}{2}$ in. thick should be used in corridors or public rooms; $\frac{3}{4}$ in. thick is particularly adapted to theatre use or rooms that receive considerably more wear than ordinary hotel rooms.

Axminster and Velvet Carpets

The carpets illustrated below have all been carefully selected as to quality and color. We recommend them for hotel rooms and corridors. Many of the designs are suited for rooms where something out of the ordinary is wanted, such as a parlor, dining room or waiting room.

How to Order Carpets, How to Figure Amount Needed and How to Care for It, See Page 254.

Century AXMINSTER CARPET—Designs and colorings made principally for corridors and public places. This is a high pile fabric and unquestionably the best fabric made that can be sold at the price.

17E2966—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$3.35**

17E2967—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$3.35**

17E2968—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$3.35**

17E2969—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$3.35**

CENTURY AXMINSTER CARPET—In Extra Widths—Century Axminster Carpet can be made in the following widths seamless, or any width in between at a proportionate price. Can be furnished from two to four months time from date of order, depending on the quantity ordered; however, not less than 350 running yards can be made of a pattern.

Width	Yard	Width	Yard	Width	Yard	Width	Yard
36 in.	\$4.80	48 in.	\$7.00	60 in.	\$8.90	72 in.	\$10.70
42 in.	6.00	54 in.	7.50	66 in.	9.80	78 in.	11.60

Smith Touraine AXMINSTER CARPETS—This grade of carpet has no doubt been used more than any other in furnishing hotels. The patterns, colors and quality are especially desirable for room and corridor use. We recommend Smith Touraine Axminster carpets for good service.

17E2957—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E2958—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E2959—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E2960—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E2961—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E2963—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E2964—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E2977—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E2974—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E2975—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E2976—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E2977—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E2976—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.65**

17E3353—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.50**

17E3354—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.50**

17E3355—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.50**

Smith 4000 Velvet—Standard hotel carpets in a variety of good colorings and designs as illustrated.

17E3350—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.50**

17E3351—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.50**

17E3352—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.50**

17E3353—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.50**

17E3354—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.50**

17E3355—Carpet. Width 27 in. Wt. yd. (about) 2½ lbs. Yd. **\$2.50**

Discontinued Samples and short ends in better grades of carpet, such as Velvets and Axminsters, can be furnished at times. These are ideal for bathrooms and for throw rugs in places over worn carpets. All samples are finished on ends and in good condition.

Order by No. **17E50**

Size 18x27 in. lengths. Each, **\$0.75** Size 27x36 in. lengths. Each, **\$1.85** Size 27x54 in. lengths. Each, **\$2.50**

Superior Hotel Quality Velvet and Axminster Carpets

How to Order Carpet, How to Figure Amount Needed and How to Care For It, See Page 254.

Card Service **VELVET CARPETS**—The patterns illustrated below are particularly desirable for hall and stair use, the 36 in. and 54 in. widths making them particularly desirable for wide halls. The stairs have borders on the sides. The carpet can be made up any width or length for rooms or for covering corridors entirely. These patterns are copied from high grade worsted Wiltons.

Bozart All Fiber Rugs and Carpet Runners

Waterproof—mothproof—fire resisting—color fast and washable. Especially desirable in Country Clubs, Summer and Winter resorts. Fiber rugs wear almost indefinitely and because of their exceptionally low cost are much sought for hotel use. They are not only desirable for summer hotel purposes because of their cool appearance but save on expensive fabric rugs which may be taken up and stored until ready for use during the winter months. Directions for cleaning on each rug.

Public Service Inlaid Linoleum

Inlaid linoleum will give years of service and retain its original appearance as long as it lasts. Our line comprises the highest qualities, which are the longest wear. We have the desirable designs, colorings and qualities, at the right prices. We guarantee to give you complete satisfaction on your purchase. All inlaid linoleums on this page are straight-line tile. Each block or individual section of pattern set in separately. The patterns extend clear through to the back and cannot wear off. The composition is ground cork and oxidized pure linseed oil, subjected to tremendous pressure. The backing is heavy burlap to which the reverse side of the composition is securely cemented.

IMPORTANT—WRITE FOR SAMPLES—We are glad to send samples on request. The illustrations are true to color and style, but they cannot show the superior weight and quality of the merchandise. If you are not already acquainted with our linoleum, by all means secure samples.

Woods' Marble Floor Effects Superior quality inlaid linoleum in a variety of attractive patterns. Patterns go through to the back.

Our No. 17E5100 shows how borders may be used to show off a pattern and improve the appearance of the room. Borders are set on separately and mitered around fixtures, etc., with little expense, but must be laid carefully by skilled workmen. Borders regulated according to size of room. Estimates for bordered spaces furnished upon request.

Cocoa Matting cut from roll cannot be returned. If shipped as ordered. All matting should be bound with zinc or rubber ends. BE SURE TO STATE IF YOU WISH US TO FURNISH THEM. SEE ANOTHER PAGE FOR PRICES.

HOW TO ORDER AND HOW TO CARE FOR LINOLEUM

How to Order Linoleum

Always give exact size of room, as it often helps to pattern you want comes in more than one width, consider carefully and order the width that will work out to your best advantage with the least waste. For instance, if your space is 6x12 ft., you will require 8 sq. yds. 6 ft. wide. In cutting to size of room we always allow 2 or 3 inches excess in length to allow for possible differences in measurements in case room is not exactly square. This extra length is charged for and should not be considered as waste. We make special concessions when linoleum is ordered in roll rolls, because we do not have to cut, and therefore do not have remnants. If your order calls for more than one roll, full roll price will be charged for the amount ordered. We cannot accept returned linoleum after being taken from roll, if shipped as ordered. **At least one-third of purchase price must be paid from all C. O. D. orders.**

Note: Excessive demand may sometimes cause a temporary shortage of some patterns; therefore it is advisable to mention a second choice.

Square Yards Needed For Rooms of Various Sizes

Size of Room, Feet	Sq. Yds. Needed	Size of Room, Feet	Sq. Yds. Needed	Size of Room, Feet	Sq. Yds. Needed	Size of Room, Feet	Sq. Yds. Needed

10 x 10	12 1/2	12 x 13 1/2	19	15 x 17	29 3/4	20 x 20	48 1/2
10 x 10 1/2	13	12 1/2 x 13 1/2	21 1/4	15 x 19	33	20 x 22	53 1/2
10 x 12	15	12 3/4 x 15	23 3/4	15 x 22	38	21 x 21	50 3/4
10 1/2 x 13 1/2	19	12 x 15	21	16 x 16	30 3/4	22 x 22	57
10 x 14 1/2	17 3/4	12 x 16	22 1/4	16 x 18	34 1/2	24 x 24	66

These estimates are approximate as some patterns require more than others owing to the matching—but these yardages can be depended on as sufficient.

How To Care For Linoleum

CAUTION: Don't unroll linoleum when cold or chilled. If you do, it is apt to crack. Therefore it is very important that linoleum be kept in a heated room at temperature of 70 degrees or over for at least 24 hours before unrolling.

STORING: Don't store linoleum near leaky radiators or pipes, in damp or cold places. Always keep linoleum in a warm dry place.

CLEANING: Don't clean linoleum with soda, lye, potash or strong scouring soap. The acids they contain ruin the surface. The easiest and most satisfactory way to clean linoleum is to use warm (not hot) water and a good grade of soap—free from alkali, such as Ivory. A linseed oil soap is also to be recommended.

VARNISHING AND WAXING: Don't varnish an inlaid or plain linoleum—wax it. It is important that the first waxing be well rubbed in. (Use very little wax.) After that an occasional going over with a weighted polisher will keep the floor looking new and fresh. A mere mopping is all that is required to keep the floor clean. A coat of a good grade of linoleum varnish or shellac applied to printed linoleum every six months will add years to its life.

CASTERS: Don't equip heavy furniture with metal casters—they cut and cleave the linoleum. Use instead either flat shaped glass or metal shoes. These have a wide bearing surface and slide easily without marking the floor.

How To Lay Linoleum

The length of service and the amount of satisfaction derived from a linoleum floor depends a great deal on the way it is laid. If the laying is done by experienced workmen, you will be assured of a better floor, both in appearance and length of service. The small charge involved is quickly forgotten in view of the greater satisfaction.

Do not lay linoleum on unseasoned wood, or on concrete that has not had time to properly set. The surface should be clean and dry. Moisture causes the linoleum to bulge, and has a bad effect on the burlap backing. All cracks in the concrete should be filled; on wooden floors all uneven places should be planed smooth. Otherwise there will be excessive wear at these points. For cementing linoleum to wood or concrete use linoleum paste, 1 pound to every 2 square yards. Apply paste to floor with brush. We recommend the following method for laying linoleum:

ON CEMENT FLOOR

After the linoleum has been thoroughly warmed in 70 degrees or over for 24 hours, unroll and cut to proper lengths. Allow about 1/2 inch extra on the ends for shrinkage. In the case of plain or battleship linoleum all seams should be lapped about 1/2 inch to allow for double cutting. This can also be done in linoleum with a pattern but care must be taken to have the pattern match. Then cement the body down by applying the cement to the floor and laying the linoleum on top. Roll with a 200 lb. roller to make sure that the linoleum sticks to the cement. On the following day trim the edges, double cut the seams, cement and roll. Then the job is complete. No weights are required unless the floor is uneven or bumpy. Where there is a floor moulding, it should be removed and the linoleum cemented right up to the edge and the moulding then replaced. This makes a good job and prevents water from getting underneath the edges. By cementing linoleum to the floor you will keep the edges from curling and make the seams watertight.

ON WOOD FLOOR

Another method for laying: Warm linoleum at least 24 hours before unrolling. Cut to the proper lengths, cutting about 1/4 inch short on the end to allow for stretching. Lay the linoleum and let it remain, unfastened, about two weeks, so that it can stretch. Then trim the edges to make it fit closely; cut the seams and brad them to the floor. The ends and sides should not be fastened to allow the linoleum to stretch still further. For fastening use headless steel brads (No. 18 1/2) spaced about 4 inches apart. Never use carpet tacks or nails. Where there is a moulding, remove and insert linoleum underneath. When replacing moulding, drive nails into base, not into the floor, so that linoleum can stretch.

On Battleship linoleum, plain goods, and cork carpet, seams should be lapped about a half inch and cut through the center with a good sharp knife. This will give a good close seam. Care should be taken that knife is held in a perfectly straight line. If knife is held to one side, it cuts on a bevel, which will cause linoleum to raise. When knife is held straight, seams will cut together. In goods with a pattern care should be taken to see that patterns match.

"SHEDWATER" LINOLEUM VARNISH-WHITE

Will Not Darken Light Patterns

Best waterproof varnish made. Will not darken light patterns. Will not crack, check, peel or blister when properly applied. The film formed from this varnish adds elasticity to the linoleum. Will not stain or turn white. Waterproofs linoleum to prevent tracking and dirt grinding into surface. Dries sufficiently over night to walk on. Allow 48 hours for first coat to harden through, then apply second coat.

17E1637 1/4 gal. Wt. 2 lbs. Covers 175 sq. ft. one coat.....Price, **\$1.05**

INLAID RUBBER TILING

Especially Suitable for Entrances, Stair Landings and Aisles in Billiard Rooms, Soda Parlors, Offices and Kitchens

For club entrances, vestibules of stores, office buildings, hotels, etc., a center panel inlaid with name or street address is very effective. Made in one-piece by vulcanizing high grade rubber, in various colors with border lines and patterns, into a solid black rubber back. 36 inches is the standard width, made up in any length desired. It is noiseless and non-slippery. Can be mopped up easily and absolutely impossible for moisture or dirt to get beneath it. A space covered with this tiling will wear indefinitely. For stair use be sure to give exact size. For marble or wood stairs glue to step with waterproof linoleum-cement.

17E1896 1/4 in. thick, 1/2 in. top and 1/2 in. bottom with indentations forming vacuum which makes tiling stick to floor. Like illustration in green, gray, blue, red, black or any other color desired. Shpg. wt. per sq. ft. 2 3/4 lbs.....Sq. ft.

\$1.10

EXTRAS: Inlaid line border 1/2 in. to 1 1/2 in. wide, add 5c per foot. Inlaid line border 1 1/2 in. to 3 in. wide, add 6c per ft. Areas under 7 sq. ft., 35c per sq. ft. extra. Irregular shapes 45c per sq. ft. extra. Illustration of other patterns and quality sample on request. Can be supplied also in 3/4, 1/2 and 1/4 in. thicknesses. Price on inlaid name or initial on request.

Showing actual 1/4 in. thickness. Samples of different patterns and colors, also other thicknesses, furnished on request.

MATS, MATTING, BINDING AND SUPPLIES

CORRUGATED RUBBER MATTING

FULL 1/2 AND 3/4 IN. THICKNESSES

For use in front of elevators, in soda fountains, around billiard tables, or wherever a secure, elastic, and pleasant tread is wanted. Saves floor covering in places where wear is severe.

We quote here a quality of rubber matting especially suitable for public use. It is much heavier and of better quality than matting generally illustrated and quoted in other catalogs due to the fact that it is made from solid rubber without insertion in center and is moulded over a heavy cloth back, rubberized so it will not slip. Be convinced of this by sending for samples. We can furnish the light weight and less expensive rubber matting, but recommend this quality only.

"KEYSTONE" ALL-STEEL MATTING

This steel matting represents the highest attainment in steel mats. Made of crimped flat, galvanized steel, 3/4 in. high by 1/2 in. thick, reinforced by

pin rods. The best steel enters into the making and because of expert workmanship it can be depended upon to give years of satisfactory service. "Keystone" Flexible Galvanized Steel Matting is durable, light in weight and can be rolled up into a close bundle when not in use. To find number of square feet in mat, multiply length by width. Result will give exact number of square feet. Example: Mat 16 ft. long, by 2 ft. wide contains 32 sq. ft.; computed at 36c per sq. ft., cost will be \$11.52. Order as much or as little as desired. Wt. not pld. sq. ft. 2 lbs.

WOODEN MATTING—Reversible "Rolamat" Reversible Flexible Wooden Matting, For Back of Soda Fountain, Hotel Kitchens, Etc.

A sanitary wooden matting, built for service and satisfaction. Made of selected hard maple slats 1 1/2 in. wide and 3/4 in. thick, thoroughly seasoned and solidly bound together with galvanized steel connections. It is the same on both sides, and is therefore reversible. Slats are removable and can be replaced. Extra slats and connections can be supplied at any time. Rolls up like a carpet and is easily removed for cleaning. Keeps the feet dry and comfortable because it elevates from all moisture on floor. Has resiliency of tread that is restful to the feet. It answers every demand for a tread mat. May be had 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 40 or 42 in. wide, and any length desired. Where long lengths are required, we suggest ordering sections of from 10 to 12 feet, as they are easier to handle. To find cost of mat, multiply width by length, to get total square feet. Then multiply by price of one square foot, and result will be total cost.

CORRUGATED RUBBER STAIR PADS WITH NOSING OF RUBBER

These are made from the highest quality rubber, eliminating the extra cost of nosing which is required with the regulation stair pads. These are made with the corrugation running sideways and easily swept. They prevent slipping and can be used on wood, iron or concrete stairs. Can also be used on stair carpets to protect them from wear or to cover places on stair carpets. Made only in the sizes given here. Furnished with tacks for tacking to wood steps. Necessary to use them on iron or concrete steps they be fastened with waterproof linoleum cement.

LEATHER, COCOA AND RUBBER MATS

LEATHERSTEEL" MATS

STEEL MAT THAT ROLLS UP LIKE A CARPET
in any length,
width or shape

With the
patented
steel
protecting
rod

View shows construction

INDESTRUCTIBLE—SANITARY

Leathersteel" Mats are practically indestructible—dirt cannot sift through meshes to floor—easily brushed. Rolls up like a carpet—no beating, shaking, rolling nor vacuum cleaning. No slipping—shoe grips mat tight to floor. No exposed metal. Reinforcing Rod prevents edges from curling up or buckling. You can't trip. Canes and umbrellas will not scratch. Natural tan leather color, improving with age. Each walnut tone. Made to fit snugly in any space. Lowest expense is the last. Reinforced "Leathersteel" Mats and Runners are made from genuine oak-tanned, single sole leather. It is the same leather you get in the soles of the most expensive shoes. When soles are stamped from hide, there are many remnants. It is the control of this leather remnant output in the United States that makes it possible to manufacture mats of such a high grade material. The uniform pieces cut from these remnants are threaded together on galvanized Bessemer Steel Wire of extra heavy gauge. Feature which distinguishes the "Leathersteel" Mats from runners from all others is the patented Reinforcing Rod which is placed at each end of every mat, and in runners, at intervals of every 3 feet. Made in any width, length or shape. "Leathersteel" Mats are used in hotels, office buildings, railroads, theatres, clubs, banks, apartment houses, factories, hospitals, restaurants, schools, steamships, stores, shops, cafes, automobiles from coast to coast. Shpg. wt. 2½ lbs. per sq. ft.

in corrugated and flat surface. SEND FOR SAMPLES.

SPECIAL SIZE—CARRIED IN STOCK

For immediate delivery from Chicago stock, surface only.

2338 Regular shapes and stock widths, 2, 2½, 4, 5 and 6 ft. in any length up to 50 ft. Specify width and length. Sq. ft. \$1.00

SPECIAL SIZES—MADE TO ORDER

can be made in any width up to 9 ft. All mats 1 in. thick. When ordering specify whether flat or corrugated surface is wanted. All mats should be approached from the steel rod, therefore, when ordering mats advise whether approach will be from end or length of mat so that rods can be regulated.

2334F Special sizes. Regular shapes. Shipped direct from factory. Sq. ft. \$1.00

2335 Special sizes. Irregular shapes. Angles cutouts. Shipped direct from factory. Sq. ft. \$1.10

2336 Letters. Each. \$2.50

REGULAR SIZES—CARRIED IN STOCK

COCOA MATS

In All Popular Sizes

Cocoa mats are furnished in two grades: "Best Standard" and "Extra Brush."

We specialize on quality for public service.

"Best Standard" Cocoa Mat

Closely woven of selected fibre and strictly high class

	Size	Wt. not pkd.	Each
17E1611	14x24 in.	2½ lbs.	\$1.00
17E1612	16x27 in.	3 lbs.	1.15
17E1613	18x30 in.	5 lbs.	1.50
17E1587	22x36 in.	7½ lbs.	2.25

"Extra Brush" Cocoa Mats

Finest quality cocoa fibre. This is the closest weave of all cocoa mats. Extremely high class and durable. Especially built for public service where wear is hard.

	Size	Wt. not pkd.	Each
17E1614	16x27 in.	4 lbs.	\$ 1.75
17E1615	18x30 in.	6 lbs.	2.00
17E1616	22x36 in.	7 lbs.	2.85
17E1617	26x42 in.	12 lbs.	4.15
17E1618	30x48 in.	15 lbs.	5.85
17E1619	36x60 in.	18 lbs.	11.15
17E1620	36x72 in.	21 lbs.	12.15

COCOA CHAIN MATS

This style of mat is often preferred to the cocoa brush style, as the dirt sifts through and can be easily swept up. Very serviceable and can be easily cleaned by washing with hose.

Stock Sizes

	Size	Wt. not pkd.	Each
17E1624	18x30 in.	3½ lbs.	\$2.20
17E1625	22x36 in.	5 lbs.	3.15

17E1627	30x48 in.	9 lbs.	5.70

17E1628F Special Sizes. Two weeks' time required to make special mats. Shipped from factory in New York. Wt. not pkd. per sq. ft. 1 lb. Per sq. ft. .60

RUBBER MATS

SPECIAL MADE-TO-ORDER PLAIN OR LETTERED PERFORATED RUBBER MATS
Pattern "J"

Extra quality rubber for public service. Material is tough, durable and resilient. Made to order. To determine exact cost of mat, multiply length by width, which gives total square feet. For example: Mat 10 ft. long by 2 ft. wide contains 20 sq. ft.; multiply total square feet by cost of sq. ft. and result will be total cost.

Unlettered

17E1946F ¼ in. Thick Wt. sq. ft. 1½ lbs. Sq. ft. .70

17E1947F ½ in. Thick Wt. sq. ft. 2 lbs. Sq. ft. .90

17E1948F ¾ in. Thick Wt. sq. ft. 2½ lbs. Sq. ft. \$1.15

We advise you to specify short lengths, as they are easier to handle and less liable to break than long pieces. Two 6 ft. lengths are preferable to one 12 ft. length, and three 8 ft. lengths to one 24 ft. length. Give exact length, width and thickness.

Special sized mats can be had with beveled edges if requested on order, also can be made with smooth surface or corrugated surface. We recommend smooth surface for neater appearance. All made to order sizes shipped from factory in Ohio. Shipments in about 3 weeks after receipt of order. C. O. D. shipments must be accompanied by one-half the cost of the mat.

Special Lettered Perforated Mats

The above perforated rubber mats can be furnished with molded lettering in red or white, as shown in illustration, at following additional charges. Red letters, each letter 75c. White letters, each letter, 75c. Black letters, each letter, 45c. Size of letters is determined by dimensions of mat ordered. Lettering other than block letters shown above or monograms carry special prices.

PERFORATED RUBBER MATS

Regular Sizes. For Special Sizes for Doors, Halls, Elevators, Etc., See Pattern "J" Above.

Made of extra quality rubber for public service. We can furnish immediately from stock in following sizes, ¾ in. thick only, and with beveled edges.

17E1940 17x27 in. Wt. about 6 lbs. Each, \$2.90

17E1941 20x30 in. Wt. about 8 lbs. Each, 3.75

17E1942 22x36 in. Wt. about 11 lbs. Each, 4.95

17E1943 24x42 in. Wt. about 14 lbs. Each, 6.30

17E1944 30x48 in. Wt. about 20 lbs. Each, 9.00

17E1949 36x60 in. Wt. about 30 lbs. Each, 13.50

17E1951 36x72 in. Wt. about 36 lbs. Each, 16.20

17E1945 36x60 in. ¾ in. thick. Each, 8.50

"DIAMOND" RUBBER DOOR MAT

Good quality rubber. Has beveled edge and stiff diamond shaped tread. The indentations are extra deep and easily cleaned. 17E1939 Size 18x30 in. Wt. 4½ lbs. Each, .85

WOOL BORDERED COCOA BRUSH MATS

Extra
Quality

Extra fine quality. With green, gold, mahogany or blue wool borders.

"ARCO WAND" TRUCK VACUUM SWEEPER

The Most Efficient Cleaner for Hotel, Institutions, Buildings, etc. Lower in Cost and Upkeep and More Convenient than Stationary Plants. Large Working Capacity. Made of Quality Materials. Fine Finish.

The IDEAL machine for Hotels, Clubs, Office Buildings, Restaurants, etc. Combines the strength of the Stationary system with the Utility of the Portable. This machine has a very powerful suction, so necessary to thoroughly clean carpets and rugs subjected to heavy traffic; cleans furniture, bedding, mattresses, curtains and upholstery equally well in a remarkable manner. In successful use in some of America's finest Hotels, Clubs etc. Every user is astonished at the amount of dust and dirt that this machine will take out of a building that they thought was kept fairly clean with small machines. Noiseless in its operation and mounted on rubber tires, it is easily used by an inexperienced man or woman. A perfect working, durable machine requiring almost no attention. Powerful vacuum pump is of the positive type, with two highly machined impellers which do not touch at any point, reducing wear to a minimum. Bearings have bronze sleeves with ring oilers. All dirt is contained in sheet iron bucket with convenient handle, which is easily removed from bottom of large separator chamber. A unique and striking feature is the simple method of cleaning fabric screen inside of separator by merely reversing air current. It is not necessary to take apart or remove screen as in ordinary vacuum cleaners a dirty, annoying and unsanitary task. The dimensions of the Arco Wand Truck Cleaner will allow it to be conveyed from floor to floor in the smallest elevator. The machine can be turned in its own length. Operates from any lamp socket or base receptacle. Sold complete with 25 ft. of rubber hose, 10 in. Renovator for Carpets 4 in. Renovator for Upholstery, etc., Wand Handle, 25 ft. of electric cable with plug attached. Overall dimensions, length (not including handle) 32½ in., height to top of tank 36 in., to extreme top 43 in., width 14 in. Shpg. wt. 375 lbs.

17E1876 ½ H. P. Motor for 110 or 220 Volt A. C. or D. C. Current, **\$275.00**
In ordering specify voltage and frequency of current available.....Each,

PREMIER DUPLEX" ELECTRIC VACUUM SWEEPER

Each
\$60.00
Guaranteed
For
One Year

SAVE TIME AND LABOR IN YOUR CLEANING

No need to retrace your steps several times over to make sure that your carpets are clean. Once over is plenty with a "Premier Duplex." Saves time, labor, cuts electric expense, and cleans thoroughly. The double action of the powerful suction plus the motor driven brush does the work.

The "Premier Duplex," the nationally advertised Electric Carpet Sweeper, is the most efficient, easiest to operate, and most economically operated Electric Sweeper on the market. It is made with all the latest improvements and attachments, and can be used on practically everything that requires cleaning.

For heavy, almost continuous use, such as Hotels, Apartment Houses, Dining Rooms, and Restaurants require, the "Premier Duplex" Sweepers have proven themselves efficient, sturdy and most economical to operate.

"Premier Duplex" Sweepers require little attention. No oiling necessary, for the ball-bearings are packed in lubricant. The motor is the finest, fractional horse-power motor made. The bag is made of special heavy twill designed as illustrated at left. Complete with 20 ft. of cord and plug ready to attach to socket. Wt. not pld. 14 lbs.

For 110 Volt A. C. or D. C. Current.
GUARANTEED FOR 1 YEAR
17E1831 "Premier Duplex" Electric Vacuum Sweeper. Each, **\$60.00**
17E1832 Attachments for "Premier Duplex" Sweeper. Per Set, **\$10.00**

THE "RADIO" NON-ELECTRIC VACUUM CLEANER

A new Improved, non-electric Vacuum Sweeper which is being used with absolute satisfaction, especially where electricity is not available or convenient, and where a quick, thorough clean-up job is desired. The New Improved Non-Electric "Radio" Vacuum Sweeper cleans without electricity and automatically operates itself. A slight downward pressure on the driving wheels starts the ball-bearing fan rotating at a high speed, the high speed producing the suction. Drawing and pushing the sweeper back and forth makes the suction continuous as though it were electrically operated.

The "Radio" Non-Electric Vacuum Sweeper cleans as it sweeps. The bristle brush picks up the dirt, lint, and loose scraps, which are drawn back through the suction into the dust-proof bag that hangs along the handle.

Nothing to get out of order. No wires, no motor, no electric current, no cost to operate. The entire body of the machine is of solid aluminum. Wheels made of open hearth steel, rubber tired. Lightweight, easy to handle, and weighs only 8 lbs.

17E1833 "Radio" Non-Electric Vacuum Sweeper.....Each, **\$16.50**
(In lots of 6, Each, **\$15.65**)

"STERLING" CARPET SWEEPER

Well built, quiet, easy running. High grade bristle and horsehair brush. Full size sweeping surface. Cold rolled steel case has double bead with brad protector between beads to protect furniture. Rubber buffers at corners. Disc wheels enameled to match case, with hard maple bearings. Easy running, never requires oiling. Fiber lined ends deaden sound. Walnut finish. Shpg. wt. about 6 lbs.
17E1827.....Each, **\$3.00**
(Lots of 6, Each, **\$2.75**)

MADE TO ORDER WINDOW SHADES

Made In Our Own Daylight Factory

WINDOW SHADES MADE FROM LUXOR CLOTH—BEST FOR PUBLIC SERVICE

Luxor cloth has special advantages for use in all kinds of public buildings, such as hotels, restaurants, hospitals, schools and offices.

The beautiful soft tints of Luxor shade cloth are obtained only by special preparation of a very fine fabric, and are so made that shades will not wrinkle or pucker and show pin holes like most shade cloths are apt to do. This type of shade softens but does not exclude the light; transparent in nature and positively sun proof. Colors: Linnette, ivy green, ecru and cream. Mounted on improved Hartshorn guaranteed rollers,

with slats, brackets and nails included. Scalloped and fringed trimmings can be furnished at a small additional charge. Styles and prices are shown on opposite page. Same material can be had by the yard under No. 33E8863, as listed on opposite page. Be sure to state size and color wanted. Cannot be exchanged or returned for credit.

33E8859 Order by number, size and price. State color wanted.

HAND-MADE OIL OPAQUE WINDOW SHADES IN SIZES MADE TO ORDER

Shades Made to Order Cannot Be Exchanged or Returned for Credit

These shades are of high grade Hand Made Oil opaque shade cloth and are mounted on Guaranteed Hartshorn Self-Acting Spring Roller with a nickel eyelet in slat for draw cord. It is important that you give exact width and length of shade and state if for inside or outside brackets. Remember, if you do not give size and color wanted, it will be necessary for us to write for this information, thus causing delay in filling order. Can be had in the following colors: Olive green, myrtle green, gray, white, buff and drab. If in doubt as to the color you want, send for a booklet showing the standard colors in hand-made oil opaque shades.

Note carefully the illustration and instructions for measuring. These are given in detail in the lower corner of this page. In the following price list "width inches" is the width of cloth. If exact size wanted is not given in the table the next larger size will be charged for, but the exact size ordered will be made. The fabric of shade cloth 48 in. and wider is heavier and we not always match colors of narrower widths. Each shade is wrapped separately with slats, brackets and nails included. Scalloped and fringed trimmings can be furnished at a small additional charge. Styles and prices quoted on opposite page. Shade material can be had by the yard under No. 33E8862 as listed on opposite page.

33E8850 Price each for special size made-to-order window shades. Order by number. State size, price and color wanted.

HOW TO ORDER WINDOW SHADES

Illustration No. 1

Illustration No. 2

INSIDE BRACKET MEASURE

See Illustration No. 2

If shades are wanted to hang as in Illustration No. 2, give exact measurement in inches from point to point where shade is to go. Make no allowance and specify "inside bracket."

MEASURE EACH WINDOW SEPARATELY

Shades may be made to roll either from top or bottom. We will always make the shade to roll from the top unless otherwise ordered.

In giving measurements for length of shades give the actual height of each window in feet and inches and make no allowance for hems—shade will be finished to length given. If order does not state how your measurements are taken, the cloth will be cut according to measure and outside bracket will be sent. Very accurate measures should be taken, even to the sixteenth of an inch.

BE SURE TO STATE COLOR WANTED

If in doubt as to color, write for booklet showing standard colors. It takes 8 or 10 days to make up shade of standard color. If you want special colors other than standard, same can be had in from 14 days to 3 weeks. Write for quotation, and send us sample of some material indicating color wanted.

Read Carefully and Avoid Mistakes

OUTSIDE BRACKET MEASURE as shown made to order and cannot be exchanged or returned for credit.

See Illustration No. 1

If you want shades to hang as shown in Illustration No. 1, give exact distance in inches from point to point where brackets are to be placed and specify "outside brackets."

DUPLEX TWO-COLOR SHADES

In Special Sizes Made to Order

Duplex Shades have one color on one side and different color on the reverse side, thus permitting one to secure shades to conform both to outside house, and to the decorations of a room. Duplex Shades are mounted on Guaranteed Hartshorn Self-Acting Spring Roller with nickel eyelet in slat for draw cord. Each shade wrapped separately with slats, brackets and nails included. Scalloped and fringed trimmings can be furnished at a small additional charge. Styles and prices are shown in the lower right hand corner of the opposite page.

Numbers of Popular Colors in Duplex Shades

Following numbers represent color combinations most commonly used in Duplex Shades. Use both numbers in ordering color combinations. No. 5 Dark Green No. 28 Dark Olive Green No. 41 Olive Green No. 5 Dark Green No. 11 White No. 11 White No. 46 Ecru No. 46 Ecru Sample booklet showing these and many other colors sent on request.

How to Order Duplex Shades

When ordering Duplex Shades, always mark both color and numbers on your order. If you wish a shade made in a dark green color on one side and white on the other side, mark your order color 5-11 and be sure to state which color desired on inside, otherwise we will put light color on the inside.

If exact size wanted is not given (see special size table) the next larger size will be charged for, but the size ordered will be made. Note carefully the illustrations and instructions for measuring.

Prices on larger size Duplex Shades furnished on request.

33E8854 Order by number. State size, price and color wanted.

WINDOW SHADES, ROLLERS AND MATERIALS

"TONTINE" WASHABLE WINDOW SHADES

Made In Our Own Factory

"TONTINE" WINDOW SHADES are different, as they will resist the action of water. Rain will not injure them, and when necessary they may be cleaned by scrubbing with soap and water without injury to the fabric. After cleaning, their appearance is as good as ever. "TONTINE" WINDOW SHADES are very flexible and therefore, will not easily crack nor break out—they will always look well. Made to order in special sizes to your measurements, mounted on Pick's best self acting spring rollers, rustproof eyelet riveted through slat for a crocheted ring pull with 9 in. cords. **BE SURE** to give exact width of shade and length of finished shade desired—mention whether **INSIDE** or **OUTSIDE** brackets are wanted and state **COLOR** wanted. Complete details will avoid the delay incidental to our writing you for this information. Shades can be had in the following colors: surf, pongee, white, cream, ecru, linen color and olive green. Note carefully the illustration and instructions for measuring shown on page 272. If the exact size is not given in the table, the next larger size will be charged for, but the exact size ordered will be made. Scalloped and fringed trimmings can be furnished at a small additional charge.

33E8865 Prices stated are for each special size made to order shade. **Order by number, state size, price and color wanted.**

33E1452 About 15 in. deep. Shpg. wt. about 4 oz. per ft. Ft. **\$2.00**

LACE WINDOW SCREENS—Made To Order

Decorative lace screens have become very popular and are extensively used in stores, hotels and clubs, to relieve the bareness of upper and lower windows. These are made of strong heavy bobbinet mesh, in white or ecru, with applique design and lettering in cream, gold, brown or blue. Any individual lettering, monogram, trade mark or crest can be reproduced on any of our lace screens. The width of border and size of lettering depend on the height and width of screens. Any of these screens can be had without wording, or any other wording can be had. Special care should be given in taking measurements. These screens are made up to your order, and are not returnable or exchangeable. Be sure to specify width, also height of screen, specifying number of designs and wording. A double set should be ordered, the extra one for use while the other is being laundered. **NOTE**—Prices given below are for lace screens 6 ft. by 2 ft. 6 in., but they can be had wider, narrower or higher, at prices in proportion. Screens with colored borders and wording of sunfast materials will cost about 25% more than the prices given below.

Any of these Lace Window Screens can be made to order in any size desired at prices in proportion to those quoted.

33E650B Screen with ecru sateen applied border only. 6 ft. high by 2 ft. 6 in. wide.... Each, **\$10.75**

33E650BM Screen with ecru sateen applied border and monogram. 6 ft. high by 2 ft. 6 in. wide.... Ea., **\$16.50**

Do not fail to read paragraph at top of page on made to order goods.

33E651B Screen with ecru sateen applied border only. 6 ft. wide by 2 ft. 6 in. high..... Each, **\$16.85**

Do not fail to read paragraph at top of page on made to order goods.

WINDOW VALANCES AND PUFFED WINDOW SHADES Made To Order

Design of 33E648 Valance and 33E0648 Shade.

WINDOW VALANCE. Price of valance 6 ft. wide and 2 ft. high is given as an example of cost. Made of ecru casement cloth, like design above, but can be made wider, narrower or higher, if desired, also of better materials, at prices in proportion. Write us your wants, giving width and height.

33E648 Size 6x2 ft. Made of casement cloth Each, **\$9.50**

PUFFED WINDOW SHADE. Price of shade 6 ft. wide and 8 ft. high is given as an example of cost. Made of same material and in same design as valance described above, but can be made narrower, wider, shorter or longer if desired, also of better fabrics, at prices in proportion. Made to pull up and down and to remain in any position. Write us your wants, giving width and height.

33E0648 Size 6x8 ft. Made of casement cloth Each, **\$21.00**

Combinations that will give your windows an appearance of distinction. Puffed window shades take the place of the old style roller shades and at the same time give that finished artistic touch of good taste. The puffed window shades are operated by small rings and non-stretching cord that draw shades up and down and hold them in any position. The same styles can be made short, as a valance to hang stationary. In ordering valances or shades give us width and depth required. These shades and valances can be made from cream silk, casement cloth, mohairs, sateens or sunfast materials, finished at bottom with a bullion fringe and a tassel between each scallop. If wanted, monograms can be applied in center of these shades. In ordering send us a sketch showing size of glass and measurements of sash, and we will be glad to submit prices and full information.

Design of 33E649 Valance and 33E0649 Shade.

WINDOW VALANCE. Price of valance 6 ft. wide and 2 ft. high is given as an example of cost. Insertion in natural colors, as black and cream, blue and cream and brown and cream. Body made of mercerized casement cloth, like design above, but can be made wider, narrower or deeper, also of better materials, at prices in proportion. Write us your wants, giving width and height; also color of insertion wanted.

33E649 Size 6x2 ft. Made of mercerized casement cloth..... Each, **\$12.50**

PUFFED WINDOW SHADE. Price of shade 6 ft. wide and 8 ft. high is given as an example of cost. Made of same material and in same design as valance described above, but can be made narrower, wider, shorter or longer if desired, also of better materials, at prices in proportion. Made to pull up and down and to remain in any position. Write us your wants, giving width and height; also state color of insertion wanted.

33E0649 Size 6x8 ft. Made of mercerized casement cloth.... Each, **\$38.00**

EXTENSION RODS, POLES, DRAPERY FIXTURES

SINGLE FLAT EXTENSION ROD

Non-tarnishable velvet gold finish flat curtain rod. A curtain that will not sag. Easy to put up.

Length	Wt. not pkd.	Doz.	Each
310 28 to 48 in.	11 oz.	\$2.90	25c

CASEMENT CURTAIN MATERIALS

Casement Curtains are the latest thing for window drapes, taking the place of the old style lace curtains. They can be made either to hang stationary or draw by means of cords, pulleys, rings, etc. See page 277 for special hardware. If you wish we will make them in our shop at a small additional cost above that of the materials. In ordering be sure to specify how you wish them made and finished and also all sizes, as draperies made to order cannot be returned or exchanged.

TUSSAH CASEMENT CLOTH

A new material much used for casement curtains. Very soft and silky, will give long wear. 35 in. wide. Drapery Ecru color. Shpg. wt. yd. about 7 oz.

33E6240..... Yd. **50c**

33E7047 3 in. Silk Bullion Fringe to match..... Yd. **40c**

SHANTUNG CASEMENT CLOTH

Very fine domestic Shantung Casement Cloth, looks very much like imported silk Shantung. A material that both looks and wears well. 35 in. wide. Drapery Ecru color. Shpg. wt. yd. about 9 oz.

33E6241..... Yd. **85c**

33E7047 3 in. Silk Bullion Fringe to match..... Yd. **40c**

IMPORTED CASEMENT CLOTH

A very desirable material for casement curtains, will hang soft and pretty. An exceptionally good wearing material. Drapery Ecru color. 48 in. wide. May be split for narrower windows. Shpg. wt. yd. about 14 oz.

33E6242..... Yd. **\$1.35**

33E7047 3 in. Silk Bullion Fringe to match..... Yd. **40c**

ARTIFICIAL SILK CASEMENT CLOTH

A very silky casement cloth, much used for the better class of work. Looks like the high priced imported silk casement cloth. 48 in. wide. Oyster Gray color. Shpg. wt. yd. about 10 oz.

33E6243..... Yd. **\$1.75**

33E7047 3 in. Silk Bullion Fringe to match..... Yd. **40c**

Fine Drapes and Drapery Materials

These draperies are made to order in our own workrooms by experienced sewers and cutters. They will hang and look well. Draperies can also be made up of any of the materials shown on this page. Prices in proportion.

Sunfast Damask Window Hanging

Heavy reversible silk damask. Unusual combination in stripes of rose, blue, black, and putty. Will blend with any color scheme. Side curtains 2½ yards long and 24 in. wide, finished with 2 in. bullion fringe at bottom. Valance at top is made of same material, scalloped at bottom and trimmed with 2 in. bullion fringe. Made for windows 4 ft. wide and 6 ft. 6 in. high. Larger sizes in proportion. Rods and fixtures not included.

33E7049 Complete, **\$15.00**
33E7050 Material like above 50 in. wide. Yd., **4.00**

Mohair Window Draperies

A splendid combination of colors that will match any decorative style. Made of mohair as above for opening 4 ft. wide and 7 ft. high. Side hangings are 24 in. wide, trimmed at bottom with a neat bullion fringe. Valance at top trimmed with same style fringe. Tie backs of same material. Rods and fixtures not included.

33E7063 Complete, **\$12.00**
33E7065 Material like above, 50 in. wide. Yd., **\$2.00**

Silk Stripe Window Hangings

Very fine silk damask for an opening 4 ft. wide 7 ft. 6 in. high. Each curtain 24 in. wide, finished at bottom with 2 in. bullion fringe. Color combination of blue, mulberry and gold stripe. Painted wood pole matches draperies. Sold complete, or pole and hangings separately.

33E7061 Set complete with pole, **\$19.00**
33E7062 Material as above, 50 in. wide. Yd., **3.75**

Ornamental Wood Pole

An entirely new idea. Takes the place of valance. Comes in blue, rose, mulberry, black or gold. Consists of 1 pr. brackets, 1 pr. ends, 12 rings and a 5 ft. pole with turned center.

33E7046 Size 1½ in. x 60 in., Each, **\$9.00**
 Poles longer than 50 in., Extra per ft., **.50**

FURNITURE

THE EXHIBIT OF ROOMS WE HAVE FURNISHED, SHOWN ON THE FOLLOWING PAGES, WILL ILLUSTRATE THE CHARACTER OF OUR LINES OF FURNITURE, WHICH INCLUDE EVERYTHING FOR BEDROOMS, LIVING ROOMS, DINING ROOMS, AND PUBLIC PLACES. ONLY A VERY SMALL PART OF THIS LINE IS LISTED IN THIS CATALOG. ON FURNITURE NOT LISTED, INFORMATION WILL BE SENT ON REQUEST.

An Exhibit of Fine

IN taking over the furnishing of an establishment, our interior decorators assume full responsibility for every operation from the original planning to the final installation. A complete scheme is prepared for your approval including furniture, floor coverings, draperies, lamps, linens, chinaware, glassware, silverware, food service equipment and other necessary items. Upon your approval of this scheme, we assume the responsibility of its complete execution, turning the establishment over to you ready for operation.

Hotel Furnishings

THE achievement of beautiful and harmoniously furnished interiors such as are found in the Graemere, Wade Park Manor, Mayflower, Book-Cadillac and many other hotels we have executed, is due to the ability of our hotel furnishing specialists to control every detail of designing, planning and installation. Thus, when finished, everything fits perfectly into its place, without a single unharmonious note in color, style or material. Our men are trained and experienced in this particular type of work—our lines of merchandise are specially developed for this one purpose—that is why the results achieved are not only beautiful, but *lastingly beautiful*.

COIL, FABRIC AND FLAT STEEL SPRINGS

"SOLID COMFORT" SPIRAL STEEL SPRINGS

A most excellent spring, affording all the luxury of a box spring, at a very low cost. Mechanically correct, comfortable and entirely dependable in every way. Made to withstand continued hard usage, guaranteed for 20 years, which means that should it sag, break or become unfit for service, with ordinary and proper care within 20 years from purchase date, we will replace it without any expense to you; made of high carbon steel spiral springs 99 in 4 ft. 6 in. size, securely fastened at bottom to steel band slats and connected at top with each other by sensitive helical springs, which adds greatly to the resilience of the entire top; heavy steel rod top edge. Gray enamel finish. Can be supplied to fit beds 4 ft. 6 in., 4 ft., 3 ft. 6 in., 3 ft. 3 in. or 3 ft. wide. Be sure and specify exact flush inside measurements between head and foot ends and side rails and state if to be used with wood or metal rails. Unless otherwise ordered we will ship 4 ft. 6 in. width. Shpg. wt. 4 ft. 6 in. size 80 pounds.

SINGLE COIL SPIRAL SPRING

This spring is an unusual value at a remarkably low price. It combines the best of materials with the most up to date methods of single coil spring construction. Made with 80 Premier wire springs which are securely fastened at bottom to flat steel slats. These slats are twisted so that spring rests on edge of slat giving great strength. Springs are held at top by interwoven wire connection. Angle iron frame, steel wire rod top edge. Can be supplied in 4 ft. 6 in., 4 ft., 3 ft. 6 in., 3 ft. 3 in. and 3 ft. sizes. Gray enamel finish. Unless otherwise specified 4 ft. 6 in. size will be shipped. Shpg. wt. 4 ft. 6 in. size about 60 lbs.

For either wood or metal beds. Unless otherwise specified we will ship 4 ft. 6 in. size. Shpg. wt. 4 ft. 6 in. size about 50 lbs.

6E2062P All widths. State whether for wood or metal beds. Each,

\$4⁷⁵

OUR GUARANTEED FLAT STEEL RIBBON SPRING

GUARANTEED FOR 20 YEARS

This is one of the strongest, most comfortable, durable and sanitary springs on the market. It has the original "Slat-fabric" construction. The ribbon-like steel strips are fastened together only at the outside edges. At other points they are interlaced, thus allowing an even distribution in weight and a resiliency not obtainable in any other make. The flat steel strips have smoothly rounded edges, so that they can't injure the mattress. They form a flat level surface, on which a mattress can be handled much more easily than on any other bed spring made. They are heavily galvanized so that they cannot rust, and are attached to the frame by means of fifty oil tempered helical springs.

The same appearance as a Box Spring, yet costs less than half as much. Stands as high above the bed rail as a box spring, is just as comfortable and far more sanitary. It is a spring that can be relied upon to withstand hotel service in a most satisfactory manner.

Special Features. The rise from the casting to the fabric is 6 in., giving a neater appearance; second, the protected rounded malleable iron box corner castings, which prevent the bed clothing from being torn; third, now equipped with a heavy strap edge, which gives added support at a vital point.

Description. The side pipe rails are $1\frac{1}{2}$ in. in diam. The end angle iron castings are $1\frac{1}{2}$ x 2 in.

Made in all widths: 4 ft. 6 in., 4 ft., 3 ft. 6 in., 3 ft. 3 in. and 3 ft. Each size is the regulation length. In ordering, state width wanted and if for wood or metal bed. Otherwise we will ship the 4 ft. 6 in. width, for a metal bed. Shpg. wt. about 60 lbs. 4 ft. 6 in. width.

6E9767 All widths. State width desired and whether wanted for wood or metal bed.....Each.

HIGH GRADE MATTRESSES AND BOX SPRINGS

SANITARY Spring Center MATTRESSES

The Mattress That Breathes." Full Size, Weighs Only 55 lbs. Unusual Wearing Quality. Lowest in Cost in the Long Run.

Many of the finest hotels in the country have recognized the Spring Center mattress as the most satisfactory from every standpoint and experience has demonstrated that it is far in the lead for comfort—and for remaining permanently comfortable.

The resiliency in Our Spring Center mattress is secured through fine, oil-tempered, high carbon, steel springs—484 springs being used in the 4 ft. 6 in. size.

Each spring is enclosed in a pocket of tough muslin and the pockets are sewed firmly to the inner lining of the mattress, thus holding each spring rigidly and permanently in position.

This closely set spring construction is then covered on both sides with a thick layer of long fibre, cotton felt. The outside ticking is of A. C. A., blue and white stripe.

Sanitary ventilation is secured through air ducts in the ends and sides, through which the mattress "breathes" as the springs are compressed and released.

Made with Imperial roll, 5 in. box edge, rounded corners, tufted top and bottom, inside seams. Equipped with side handles.

E9754P Width 3 ft. Wt. 40 lbs. Each, \$23.75	6E9753P Width 3 ft. 6 in. Wt. 45 lbs. Each, \$26.25

SPECIAL "INSTITUTION" MATTRESS

We guarantee that this mattress will not become "lumpy" or "bunchy" and that with ordinary care it will last longer than any other mattress sold at the same price.

Having equipped a large number of institutions during the years we have catered to this trade, and having made a study of their peculiar needs, we offer here a mattress made expressly to meet those needs, and embodying the best features of the most popular styles heretofore offered. In the institution, mattresses are subjected to more severe and continued wear than in ordinary use. Therefore uniformity in thickness, fine quality materials and expert workmanship are essential. This mattress is made of genuine felt, carefully built layer on layer to a thickness of 4 1/2 in. and is absolutely uniform on both sides. Reinforced or rolled edge. The covering or ticking is the well-known 6 oz. genuine A. C. A. blue and white stripe, which is as high a quality of wearing material as is used on the best mattress made. It is securely biscuit tufted, and seams are inside turned, making the edges vermin-proof.

OUR "QUALITY" MATTRESSES—45 LBS.

Where quality is important, we urge your consideration of our "QUALITY" mattress. This mattress is well made and of lasting quality and carries our iron-clad guarantee. The fine, clean cotton of which this mattress is constructed is made into layer felt, and built up layer upon layer, which method insures a mattress of great comfort, owing to its elastic buoyancy. The filling used is a natural unbleached cotton felt thoroughly clean, and absolutely sanitary. Biscuit-tufted top and bottom; 4½ in. box with 2-row stitched roll edge, which adds strength to the sides and preserves the shape and appearance of the whole mattress; inside seams and rounded corners. The ticking is of either 6 oz. A. C. A. stripe, or Gobelin art pattern. Full regulation length.

GUARANTEED PILLOWS—FEATHER AND HAIR

Take great pride in offering our line of guaranteed feather pillows. They will give satisfactory service. Each and every grade is furnished exactly as represented, with the contents plainly stated, and is guaranteed to contain all new, pure feathers. Our guarantee tag is stitched to each pillow. All pillows are encased in feather-proof floral art or 8 oz. A. C. A. striped ticking. We recommend the A. C. A. ticking for hotel and institution use. Feathers scientifically treated and sterilized, rendering them absolutely odorless and dustless. All of our pillows are made in sizes and are filled with proper weights of filling which insures a plump, comfortable and resilient pillow.

Guarantee We guarantee these pillows to be manufactured of ALL NEW FEATHERS, thoroughly sterilized and to fully comply with all Sanitary Bedding Laws which have been enacted every State of the Union.

PRIDE" GOOSE AND DUCK HOTEL PILLOWS

25% Goose and 75% Duck Feathers

For many years of experience in furnishing hotels and other housing institutions we have adopted this pillow as the most satisfactory grade for hotel use and unhesitatingly state that we believe it to be the best manufactured for the purpose intended. The mixture is so blended and in just the right proportion to produce a very buoyant and comfortable pillow which will retain its resiliency indefinitely and give good service for practically a lifetime. Consists of choice goose and domestic and imported duck feathers, thoroughly cleaned and scientifically sterilized. We guarantee it to be a very downy and exceptionally wearing pillow, and to give entire satisfaction in every respect. Sold in high grade 8 oz. genuine A. C. A. blue and white striped ticking.

CHOICE GOOSE FEATHER PILLOWS

100% Pure Goose Feathers

The goose is the cleanest bird from which feathers are plucked for pillow filling, hence goose feathers differ from others, as they are not put through any washing process whatever, which would destroy a great deal of the oil in the feather, deteriorating from its filling capacity and to some extent impairing its buoyancy. These pillows contain a choice mixture of domestic and imported extra selected choice gray goose feathers, very downy, soft and resilient, absolutely odorless, strictly sanitary, and very high grade in every respect. Encased in best quality of fancy blue Gobelin art, or 8 oz. A. C. A. striped ticking.

CURLED BLACK HAIR PILLOWS

Extra Good Value

Where it is desirable or necessary to use hair in preference to feathers for pillow fillings we recommend this pillow. The filling used is long black drawings well curled and thoroughly sterilized. This is the very best quality and we do not recommend lower grades for this purpose.

DINING ROOM TABLES

FOR HOTELS, RESTAURANTS
AND CAFETERIAS

STRAIGHT LEG SQUARE TOP WOOD BASE TABLES

This sturdy table is of very plain design and because of its simple straight-line pattern is exceptionally strong and easy to keep in first class condition. Constructed of kiln-dried, thoroughly seasoned oak, golden finish, or of birch, mahogany or American walnut finish, lacquer. K. D. bolted construction. Legs measure 2½x2½ in., tapered at the ends and are of solid oak or birch. The apron or part of frame that joins the legs is ¾ in. thick, 4½ in. deep. The sizes listed below are carried in stock for immediate shipment; other sizes will be made to order and require about 3 weeks time. Average shpg. wt. about 125 lbs. We are not responsible for breakage of tops after delivery, except where tops are defective.

NOTE—Round top tables can be had if specified at same prices as square top tables.

BANQUET, DROP LEAF AND DINING ROOM TABLES

FOLDING LEG BANQUET TABLES

A convenient folding table made in various lengths, that is ideal for banquets and hotel sample rooms. Although simple in construction and operation it is extremely rigid and firm. 30 in. high with 2 1/4 in. square legs.

Firmly braced by round iron brace that connects to iron stretchers between legs. Upper end of brace operates in patented fixture that locks firmly in both open and closed position. Under structure made of seasoned, selected hardwood in oak, mahogany or walnut finish. **Whitewood top. Shipped direct from Wisconsin factory.**

6E2031F 30x72 in. Shpg. wt. 85 lbs. Each, **\$15.00**
6E2032F 30x84 in. Shpg. wt. 95 lbs. Each, **16.25**
6E2033F 30x96 in. Shpg. wt. 110 lbs. Each, **17.50**

SCREW LEG BANQUET TABLES

A light, convenient, easily handled, take-down table for banquets and hotel sample rooms.

Made with selected hardwood legs, 2 1/4 in. diam. Legs have screw set into upper end. This screws into nut which is mortised into cleat on under side of top.

May be had with legs finished in oak, mahogany or walnut. **Whitewood top. Shipped direct from Wisconsin factory.**

6E2034F 30x48 in. Shpg. wt. 40 lbs. Each, **\$11.00**
6E2035F 30x60 in. Shpg. wt. 50 lbs. Each, **12.00**
6E2036F 30x72 in. Shpg. wt. 60 lbs. Each, **12.60**

ROUND SCREW LEG TABLES

6E4106F 48 in. diam. Shpg. wt. 85 lbs. Each, **\$12.75**
6E4107F 60 in. diam. Shpg. wt. 95 lbs. Each, **15.50**
6E4108F 72 in. diam. Shpg. wt. 110 lbs. Each, **18.50**

NEW DESIGN FOLDING LEAF DINING TABLES

Showing Table Open

A new design in a folding leaf dining room table. Ideal for restaurants, hotels and public and private dining rooms. It is ordinarily a regular square dining room table but has the advantage of being instantly convertible into a large round size—accommodating two or three more chairs—without disturbing the linen, service or comfort of persons already seated.

When open the leaves are held rigidly open by a patented steel sliding brace operating in a mortised groove. This insures the leaves against looseness and sagging. When closed the leaves fold back and up against under side of top and are held in place by self operating spring clips.

When leaves are folded they are entirely out of the way and cannot possibly interfere with comfort of those seated.

Made with pedestal base of kiln-dried, seasoned hardwood in either oak, mahogany or walnut finish. 5-ply whitewood top. **Shipped Direct from Wisconsin factory.**

6E2037F 30x30 in. opens to 42 in. round. Shpg. wt. about 150 lbs. Each, **\$19.00**

6E2038F 36x36 in. opens to 52 in. round. Shpg. wt. about 200 lbs. Each, **\$24.50**

Showing Table with Ends Folded Under, Making Square Top Table. Small illustration at Left Shows How Ends are Held In Place By Metal Clips When Not In Use and How Ends are Held Up By Steel Sliding Brace When Open.

6E2039F 42x42 in. opens to 60 in. round. Shpg. wt. about 520 lbs. Each, **\$28.50**

LOUIS XVI ROUND TOP DINING ROOM TABLES

A high class table. Louis XVI period design. The fancy cut-out apron and turned and fluted legs make this a very attractive table. Cut-out apron is 4 1/2 in. deep. Made of kiln-dried thoroughly seasoned oak, golden finish, or of birch, mahogany or American walnut lacquer finish. Ht. 30 in. Can be had in sizes and tops as listed below. Shipped k. d., bolted construction. Average shpg. wt. about 150 lbs. We are not responsible for breakage of tops after delivery, except where tops are defective. **Shipped direct from Wisconsin factory in about 4 weeks.**

Note—Square top tables can be had, if specified, at same prices as round top tables.

Be sure to specify design number when ordering tables with Black Decorated Vitrolite Tops. For designs see page 313.

TABLE TOPS for ROUND and SQUARE TABLES

You Can Make Your Old Tables Like New and Bring Them Up to Date by Equipping Them With New Sanitary Tops

TOPS SUPPLIED FOR EITHER WOOD OR METAL BASES.

tops to be used on wood table bases are furnished without dowel holes. Metal bases equipped with strips of corrugated rubber which are glued and bradded on top of apron and supports (the number of corrugated strips depending on size of table). Two strips placed $2\frac{1}{4}$ in. in each corner, the ribs running in opposite directions, so as to give greatest amount of resistance in moving top. The weight of the top itself against the corrugation forms a vacuum or suction which causes

the top to adhere sufficiently for all requirements of ordinary service. No screws or bolts are required with this treatment.

Tops for metal bases are furnished with anchor bolts imbedded in the under side of top at points corresponding with the openings in base. As there are different styles of metal bases it is necessary that a paper pattern showing exact location of anchor bolts be furnished with top order.

If order does not specify otherwise, tops for wood base tables will be shipped.

DECORATED BLACK GLASS TABLE TOPS—RICH AND DISTINCTIVE

These exquisitely etched black glass table tops will bring beauty, individuality and distinctiveness to restaurants, lunchrooms and soda fountains. They are made of heavy $\frac{3}{4}$ in. black glass and are

impervious to liquids, acids and grease. Instantly cleaned with a damp cloth and will retain their attractive surface and original beauty permanently.

SANI-ONYX TOP

Raised Edge Sani-Onyx

$\frac{3}{4}$ in. thick, with raised edge $\frac{7}{8}$ in. thick (see illustration), or $\frac{3}{4}$ in. thick throughout. Has a fire polished, smooth surface which is impervious to liquids, even the strongest acid. Can be supplied white only.

VITROLITE TOP

$\frac{3}{4}$ in. thick, is non-porous, acid proof and will not stain. The surface is as hard as flint, and will withstand hard usage as it does not easily crack or chip. Can be supplied black decorated only.

CARRARA GLASS TOP

$\frac{3}{4}$ in. thick. Acid proof, strictly sanitary, and unaffected by moisture or atmospheric conditions. Tempered to enhance its strength, ground and gauged to a uniform thickness, thus eliminating any and all imperfections, then polished to a crystal-like smoothness. Can be supplied snow white or jet black.

IMPORTED BENTWOOD CHAIRS

FAMOUS FOR STRENGTH AND BEAUTY—NOTE LOW PRICES

The line of Bentwood chairs shown on this page have been made for nearly three-quarters of a century in the Central European countries, where the factories have been located since 1850. These chairs are all made from the beautiful, smooth grained Red Beech that grows in abundance on the mountains and hillsides of Central Europe. This Beech is the finest obtainable for bentwood furniture and it takes an exquisite semi-transparent finish that shows the fine-grained, smooth wood formation. The wood, after being thoroughly seasoned, is bent by an exclusive process that retains all the life and strength of the green bough and is specially treated so that it does not become brittle. Graceful appearance and correct general proportions are characteristic of all designs.

A high grade chair for the restaurant, cafeteria, etc. This is a chair that will give excellent service. Made throughout of superior materials. Has back brace that has proved to be one of the strongest. Finished in dark mahogany or golden oak, hand polished, with oblong shape hand cane seat. Shpg. wt. doz. about 100 lbs. **Shipped direct from New York factory.** **6E478F** Dark mahogany hand polished finish, cane seat (removable.) Each, **\$7.35** (Doz. **\$87.00**)

CAFE OR DINING CHAIR

A Very Special Value

This chair is one of the best values we offer. It is heavy and massive, being made of all square stock. A splendid cafe or dining chair in every detail, perfect in design. In appearance, in solid strength, in durability it would be exceedingly difficult to duplicate, and considering our price, it is the best investment you could make anywhere. Seasoned and selected quartered oak, golden finish, or gum, mahogany or walnut finish, is used in its manufacture. Heavy full box seat, 17x17 in., saddle-shaped and roomy. The back is 38 in. in height from the floor, and strongly braced by 3 broad slats, which are all securely mortised. The back post at its widest point measures 1x1½ in. Shpg. wt. about 150 lbs. per doz.

- 6E9865** Golden oak. (Doz. \$43.75) Each, **\$3.75**

FOLDING CHAIRS AND TABLES—STOOLS

NON-TIPPING FOLDING CHAIR

A strongly-built folding chair that has proved very useful in all kinds of establishments. The low price at which they are sold makes it good business to keep them in reserve for emergencies, when extra chairs are required. When not in use they may be folded up and stored away in small space.

Safely Holds \$16.95
1,200 lbs. Doz.

This folding chair will safely hold 1,200 lbs. It will not tip forward when occupant sits to front. Simply raising the seat causes the chair to fold perfectly flat. The small illustration at left shows how the chair appears when folded. Made of hard maple throughout in a natural varnish finish. Slatted seat and back. Well constructed throughout. Two stretchers in front legs. All metal trimmings and fastenings are of galvanized steel, making them rust-proof. Seat 13½x12¼ in. Ht. of seat from floor 18 in. Ht. over all 31¼ in. Shpg. wt. per doz. about 120 lbs.

6E6336.....Doz. **\$16.95**

"STACKMORE" FOLDING CHAIRS

Attractive Appearance—Noiseless—Stable—and Comfortable

Positively rigid and stable, will not collapse in use and cannot rattle, clatter, creak or wobble. Oval seat eliminates danger of pinched fingers and has no exposed nails to tear clothing.

Maximum seating capacity is gained by the elimination of rails on back legs. "Stackmore" chairs can be stored in less space than any other chair on the market—6 "Stackmores" occupy a depth of only 7½ in.

Made of selected, straight-grain ash or bentwood. Metal parts treated to prevent rust and creaking. Seat 13¼ in. wide, 17 in. from floor, back 32 in. high. Comes with seat upholstered in black imitation leather and with wood veneer seat. Shpg. wt. 100 lbs. per doz. Shipped from factory in N.Y. in lots of 6 or more.

A SUPERIOR FOLDING TABLE

SUPERIOR FEATURES ARE: (1) Metal corner braces and Automatic leg fasteners—impossible for table to collapse; (2) Attractive mahogany finish frame and legs; (3) Imitation leather covered top; (4) Nickel plated corner ornaments and leg tips.

This folding table is unusual value; it is light in weight, especially well made and of extra strength. Frame made of selected hardwood, in attractive mahogany finish. Top is 29½x29½ in. square, covered with dark green imitation leather. Ht. of table set up is 26½ in. The four corners are firmly held together by a combination metal brace and bracket screw fastened, into which fits the tops of the metal protected folding legs. The legs are firmly held

in place by an automatic metal catch. Table cannot collapse while in use, yet it can be folded up quickly by simply releasing the automatic catches. Neat nickel plated ornaments at corners and metal tips on bottom of legs.
6E5759 Shpg. wt. about 18 lbs.....Each, **\$3.85**

ALL-STEEL STOOLS

An angle steel stool constructed to stand the hardest kind of usage and give the maximum amount of comfort to the occupant. Dome shaped feet which will prevent the cutting and marring of floors and also reduce the strain at all joints when stool is being moved about. Seat of 16 gauge pressed steel 13 in. diam. slightly dished and perforated has no sharp edges. Legs of ¾x¾x½ in. angle steel. Legs braced by ¾x½ in. steel bars. Finished in oven-baked olive green enamel. Average shpg. wt. about 12 lbs. each.

SAFETY STEP-STOOL

A handy, small folding ladder, especially adapted for use in pantries or places where large ladders are not needed. Has extra wide step on top, so it can be used as a stool. Made from seasoned hardwood, designed to insure strength and rigidity and still retain that good feature—light weight. All connections under strain strongly riveted. Legs held firmly by strong steel braces—cannot collapse. Ht. from floor 25 in. Finish—standard varnish. Packed 1/2 doz. to crate, wrapped. Shpg. wt. doz. 100 lbs.

15E3680 Doz. **\$18.00** Each, **\$1.75**

"WHITE" DOOR BEDS AND

The Most Highly
Perfected Disap-
pearing Bed on the
Market — A Real
Bed for Comfort
that Occupies Less
Space at Night

"White" Door Beds operate on center pivot doors—a single effortless motion brings them into position for use. The powerful convolute spring (shown at the left) holds the bed at any angle when released. The convolute spring is used exclusively on "White" Door Beds, instead of the old-fashioned tension coil springs.

The Famous "WHITE" DOOR BED

OFFERS all the comfort of the finest bed—and is out of the way when not actually in use. The "White" Door Bed has been used and recommended by leading architects. Users claim it is superior to any other type. Has many exclusive advantages of design and installation.

"White" Door Beds provide for many convenient installations. Our catalog gives full details, together with plans and photographs.

Ideal for Hotel Sample Rooms

In hotels like the Hotel Gibson, Cincinnati, the Book-Cadillac, Detroit, and many others, "White" Door Beds are solving one important problem of hotel operation. Traveling men like them because they are out of sight—out of the way—in the daytime. Hotel operators like them because they conserve space. If interested, write for full information. Our catalog will be sent free of charge.

Ten Reasons Why the "White" Door Bed Is Superior

Perfectly balanced—The Convolute Spring Balance, an exclusive feature, balances any weight from 24 to 200 lbs. Bed can be released at any position and it will not close up or drop.

Easy to operate—It can be raised or lowered with a single effortless motion. No pulling or adjusting of legs or headboard. Legs lock automatically when bed is lowered.

Simple—It is built with fewer parts than has been possible before. No complicated mechanisms—no exposed springs to catch dirt and dust—no movable parts to tear the bedding.

Affords perfect concealment—When bed is in use in the room the opening is completely closed, preventing drafts and concealing the dressing room from view at all times. Easy access may be had to the dressing room whether the bed is folded up or down in the room.

Reduces building costs—"White" Door Bed installations afford better room arrangements and allow the straightening out of partitions. Bed requires less room space as well as less closet space when folded up.

Easy to install—It requires only two small bed plates to be screwed onto the door, upon which it is secured by its own weight and from which it may be instantly removed, if desired. Either a full size or a twin size bed may be hung on the same door without any adjustment.

Comfortable—It is regularly equipped with a fabric spring or can be had with coil or box spring if desired. Made for restful sleep.

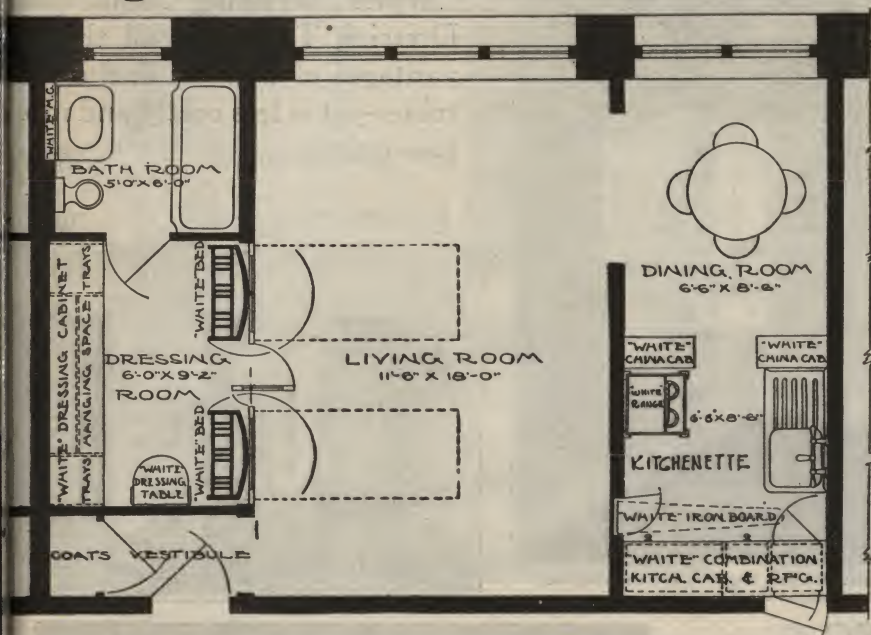

Attractive—It may be had in two distinctive designs, finished in American walnut, mahogany, or any enamel color to match any decorative scheme.

Light—It is constructed of square steel tubing, so light that a woman can handle it with very little effort.

Durable—Rigid construction. Substantially built for lasting service. Guaranteed for twenty years.

SPACE-SAVING DEVICES

The "White" Efficiency Apartment Idea Brings Lower Building Costs and Greater Rentals

You can add as much as 30% to rentals with the "White" Efficiency Apartment. This has been proved in actual buildings. If interested, write for full information.

Below, living room in Park Lane Villa, Cleveland, O., with "White" Door Bed lowered for use.

Provide Four-Room Comfort in Two-Room Space with the "White" Efficiency Apartment

All the comforts of four rooms are contained in this apartment, yet the space of two rooms is all that is required. The living room is equipped with "White" Door Beds and is transformed into a bed room at night. The kitchen is reduced in size with "White" Conveniences—possessing all the advantage of a larger kitchen, yet occupying greatly reduced space.

The "White" Efficiency Apartment can be adapted to almost any plan. It has been used and endorsed by Architects, Builders, Apartment Hotel Operators, etc. Write for full information before you build.

Our Engineering and Planning Service

A free service of experts! We will show you how "White" Space-Saving Conveniences can be adapted to your plans—decreasing space, lowering building costs and increasing revenue. No obligation involved. Write us fully about your projected building. We will reply promptly.

"WHITE" DOOR BEDS AND

"WHITE" Built-In Dressing Room Conveniences

Above, "White" Dressing Cabinet and Dressing Table in a typical installation. Right, a view showing the Dressing Cabinet and Dressing Table in the dressing room behind the Door Beds.

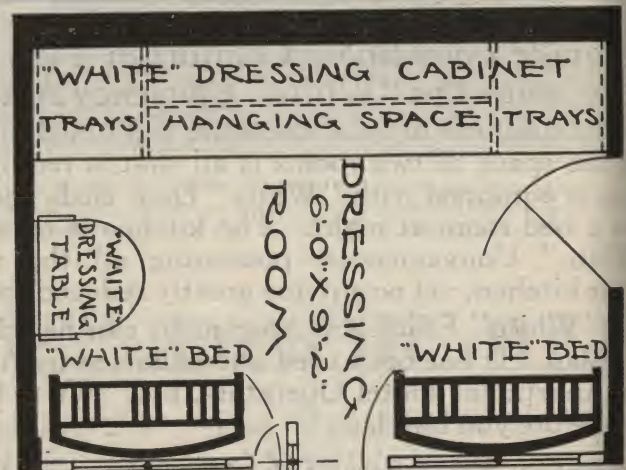

A Dressing Room equipped with "White" Dressing Cabinet and Dressing Table has all the advantages of a closet and chiffonier—yet is less costly and more convenient.

The "WHITE" SPACE-SAVING DRESSING CABINET

Combines all the advantages of a closet and chiffonier. Wardrobe space 5 ft. 6 in. long accommodates thirty or more suits and dresses—larger capacity than the average closet! Nine trays, with hat compartment, are at each end of cabinet, affording ample drawer space. Sliding doors on ball bearing rollers close entire cabinet. Overall size 9 ft. long, 5 ft. 6 in. high and 22½ in. deep. Construction throughout is of highest grade.

The "White" Dressing Table. Combines beauty and utility in small space. Two wing mirrors and two drawers. Attaches to wall. Height 3 ft. 11 in., width overall 3 ft. 4 in., depth 1 ft. 8 in.

Typical Dressing-Room Plan, showing Cabinet and Dressing Table. Twin "White" Door Beds are shown.

The "WHITE" ROLLER TYPE DISAPPEARING BED

During the day the bed is concealed in a closet. At night it is brought into any desired position.

The "White" Roller Bed can be moved easily and swiftly to any place desired. No special installation is required.

Fine for Sample Rooms in Hotels Already Built

"White" Built-In Ironing Boards

*Popular and Convenient Space-Savers
For Hotels, Apartment Hotels, etc.*

THE "White" Built-In Ironing Board is one of the most popular of modern space-savers. The board is 5 ft. 5 in. long, and operates on two arms which travel in a grooved steel track, supporting the board securely and rigidly when in use. When closed it is concealed by a 1 ft. 4 in. by 7 ft. $13\frac{1}{16}$ in. door in a cabinet built into the wall $4\frac{1}{2}$ in. deep. Compact and convenient, the "White" Built-In Ironing Board is instantly ready to use and it well deserves the popularity it enjoys. Broom and sweeper may be kept in the same cabinet. It is finished with a coat of lacquer primer. Can be built between studdings 20 in. center to center and 7 ft. 2 in. from finished floor to center of header.

"White" Ironing Board folded in closet. Broom and sweeper may be kept in same cabinet.

"SNO-WITE" BATHROOM FIXTURES

The "Sno-Wite" Bathroom Fixtures shown on this page are recognized to be the most up to date fixtures for the modern bathroom. "Sno-Wite" Fixtures are finished in a glistening vitreous porcelain enamel. The porcelain enamel is united to the steel base under 1800 degrees of heat, thus giving an unusually pleasing appearance to the porcelain enamel.

All screws for fixtures are of brass and with a special celluloid finished cap which conceals all screw heads. These fixtures are guaranteed by the manufacturers for ten years not to chip, turn color, rust, break or deteriorate with ordinary use. A guarantee tag is shipped with each fixture.

All shipments made from factory in Northern Illinois.

"PIX-BRITE" WRITING FLUID

A non-corrosive ink, guaranteed to give satisfaction or money refunded.

In selecting the manufacturer for "Pix-Brite" Writing Fluid, we looked for quality first, since poor ink is an expensive proposition, no matter what the price. After testing various inks we found this to be the most satisfactory and economical. "Pix-Brite" Writing Fluid flows freely and will not corrode on pen. Excellent for hotels, offices, factories or any place ink is used. Put up in a variety of containers to meet popular demand.

"PIX-BRITE" BLUE-BLACK WRITING FLUID

15E3101 1 qt. Bottle (32 oz.). Shpg. wt. per doz. 55 lbs. (Doz. \$8.50) (Each, 80c)

50 LB. PARCEL POST SCALE

Instantly Computes Weight and Postal Rates

Handy and reliable. Saves time and trouble for anyone who handles postal matter. Figures on the dial show the latest revised postal rates for all classes of mail by zones. Find the zone in which the shipping point is located to which the package is addressed; upon placing the parcel on the scale the indicator instantly gives rate, weight and classification. All rates are printed in red ink and can be told at a glance.

This scale is unusually useful in connection with box trade to be supplied by parcel post.

This scale is constructed of the best materials throughout, and is guaranteed absolutely accurate. Weighs by ounces up to 50 pounds. Made entirely of metal, finished in black japan with gold decorations. White enameled dial is 8 in. in diam., and can be read quickly and easily. Ht. 10 in., width 8 in., depth 6 1/2 in.

15E4267 Shpg. wt. 5 lbs. Each, **\$4.25**

CHANGEABLE SIGNS AND BULLETIN BOARDS

CHANGEABLE ANNOUNCEMENT

OR MENU BOARDS

A Quality Sign for
Those Wanting the
Best

Made of absolutely the best materials obtainable. The grooved board is made from kiln-dried, clear white pine lumber, has grooves $\frac{1}{4}$ in. apart, so as to permit the perfect alignment of letters used in words or sentences. The board is covered with best quality all-wool, black felt. Board illustrated has a glass door over the lettering, and is fitted with lock and key. Can also be had without the glass door if desired. By the use of these bulletin boards you are able to set up announcements in a very attractive manner. Recognized as part of the necessary equipment of the modern Hotel, Club, Restaurant, Theater or Office Building. Boards can be had in either oak or mahogany finish. Specify when ordering what finish is desired, otherwise mahogany will be sent.

Numbers listed below are for signs with grooves running width of board. If you wish grooves to run the long way, advise us accordingly.

BULLETIN BOARDS

Mounted on Wood Standard Supports

If you have no space available on the wall or if you desire to move your announcement bulletin from one place to another as the occasion requires, you will be well pleased with one of the Announcement Bulletins mounted on a pair of wood standards as illustrated here. Standards are made with 2 in. square uprights and have a fancy scroll base. They add greatly to the appearance of the Announcement Bulletin. Standards are finished to match the frame of the Bulletin, and either oak, mahogany or walnut finish can be supplied. However, we always ship mahogany finish unless otherwise ordered.

15E3000F Bulletin Board, 27 1/2 x39 1/2 in., in oak finish with glass door. Mounted on 5 ft. 6 in. wood standards. Shpg. wt. 100 lbs. Each, \$75.00

15E3001F As 15E3000F, but mahogany finish. Shpg. wt. 100 lbs. Each, \$75.00

15E3002F Bulletin Board, 33 1/2 x47 1/2 in., in oak finish with glass door. Mounted on 5 ft. 6 in. wood standards. Shpg. wt. 90 lbs. Each, \$97.50

15E3003F As 15E3002F, only mahogany finish. Shpg. wt. 100 lbs. Each, \$97.50

Weather-Proof Signs with Metal Frames.
15E3046 Sign only. Overall size 27 1/2 x39 1/2 in. Shpg. wt. 95 lbs. Each, \$70.00

15E3047 4-Leg Metal Easel to match 15E3046. Shpg. wt. 35 lbs. Each, 30.00

NOTE—Above prices do not include letters. Order from list below, stating size and number of letters wanted.

FOR THE WINDOW OR COUNTER

Place one of these swing easel models in your window and change the letters often. People will get the habit of watching your sign and it will bring in many new customers. The frame is made of birch, finished in dark mahogany and the background is grooved and covered with the best quality of all wool black felt.

15E3026F (As illustrated). Lettering space 13x19 in. Shpg. wt. 25 lbs.... Each, \$17.25

15E3035F With straight top. Lettering space 20 1/2 x26 1/2 in. Shpg. wt. 30 lbs. Each, \$28.00

NOTE—Letters and figures are not included with sign. Order letters and figures desired from list on page 3.

"DATAOID" DOUBLE-WING LETTERS

For Signs Shown On This Page

Made of Celluloid

These letters are formed from a single piece of sheet celluloid and are die cut to shape. Each character has two extension wings on the back one at the top and one at the bottom which fit into grooves in the sign board, holding the letter firmly in place. Made extra strong to withstand plenty of handling and are washable. When ordered in quantities of 300 or more they are packed in alphabetically arranged compartment box. Specify which letters or figures are desired in ordering. We can furnish either red or white letters. We always ship white unless otherwise specified.

15E3006F 3/4 in. celluloid letters or figures. Ea. 3c
15E3007F 1/2 in. celluloid letters or figures. Ea. 3c
15E3008F 3/4 in. celluloid letters or figures. Ea. 3c
15E3009F 1 in. celluloid letters or figures. Ea. 3c
15E3010F 1 1/2 in. celluloid letters or figures. Ea. 5c
15E3011F 2 in. celluloid letters or figures. Ea. 7c

If desired, we will send 500 or 1,000 of any of the above sized letters assorted according to best general usage. NOTE—Gold letters furnished in any size at 2c extra.

We Make any style or size of changeable letter board or sign for Hotels, Restaurants, Theaters, Clubs or Banks. Also Office Building Directory Boards.

If you do not find the style or size of changeable letter sign desired listed on this page, send us a description or drawing of what you wish and we will submit price and specifications.

"EDGE-LIGHT" ELECTRIC INDICATOR SIGNS

For Interior Use Only

They are unsurpassed as indicators for various departments in Hotels, Banks, Theaters and other Public Buildings. The fixtures are drawn bronce, or steel in black finish. The lettering is deeply cut in the reverse side of plate glass. The illumination is diffused directly through the edge of the glass by means of tubular Mazda lamps which are concealed in the frame and light up the letters in a very effective manner. Special illustrated circular and prices will be sent to you upon receipt of your requirements.

CHANGEABLE SIGNS

For Desk Use

Made of the same high grade materials as the other signs shown on this page. Made with solid wood back, interchangeable letters on velvet background. Covered with glass frame. Prices include either one or two lines of letters. Specify which is wanted. Furnished in mahogany unless oak is specified.

STAINED GLASS PAPER For Glass Doors, Transoms, Windows, Etc.

Admits light and shuts off vision. Persons or objects cannot be distinguished through windows or transoms where Stained Glass Paper is used—yet the light comes in. It is quite decorative and costs less than frosted glass. This Stained Glass Paper is also the most durable, artistic and transparent glass decoration, and when properly applied is not affected by water or washing. Guaranteed not to fade or blister, and will last many years. Full directions sent with each roll for applying and removing. No additional expense necessary, as the roll is already prepared for attaching. Rolls 18½ in. wide by 8½ yards long. Shpg. wt. 20 oz. All these patterns are lithographed on a white background.

15E4174 White Net effect. A true lace copy. Rich in appearance. Rolls 18½ in. wide by 8½ yds. long. Wt. 20 oz., Roll, **\$1.10**

15E4171 Square pattern. Black lines with alternating green and red solid squares. Attractive and neat. Rolls 18½ in. wide by 8½ yds. long. Wt. 20 oz., Roll, **\$1.10**

15E4168 Diamond pattern in fancy crossbar frame of rich dark blue color. An artistic design and always pleasing. Rolls 18½ in. wide by 8½ yds. long. Wt. 20 oz., Roll, **\$1.10**

15E4169 Octagonal design. Diamonds of solid red connecting each octagon and bordered by heavy black lines. Rolls 18½ in. wide by 8½ yds. long. Wt. 20 oz., Roll, **\$1.10**

15E4176 A neat combination of blank lines, red and green coloring. Pattern is sort of church window art glass design. Rolls 18½ in. wide by 8½ yds. long. Wt. 20 oz., Roll, **\$1.10**

INFORMATION and ROOM RACKS, HOTEL REGISTERS KEY AND LETTER RACKS

"DE SAUSSURE" HOTEL FRONT OFFICE EQUIPMENT

Illustrating "De Saussure" Mail and Information Racks Used in HOTEL PENNSYLVANIA New York, N. Y.

"De Saussure" Information and Room Racks cannot be excelled for speed and correct operation. Complete visibility, small space and rapid operation are the outstanding features of the "De Saussure" Racks. Used in the leading hotels of America—such as the Pennsylvania, Commodore and McAlpin hotels of New York City; New Palmer House, Sherman and La Salle hotels of Chicago; Webster Hall and Book-Cadillac hotels of Detroit; Hotel Ft. Hayes of Columbus and many others.

Submit your front office problems to us—we will explain how "De Saussure" equipment will improve your service. Catalog AR170 describes this equipment—write for it.

SPECIAL BUILT WOOD KEY AND LETTER RACK

This handsome wood key and letter rack can be made to fit your available space and to match your front office woodwork. The lower section has two shelves, the bottom forming one and two or three easy-running sliding doors which give easy access to any part of shelves. Comes complete with white Fiberloid numbers. When ordering be sure to advise number of rooms, number of floors and space available.

Upon request, we will submit a sketch and the cost of a rack for your requirements.

A SELECT LINE OF HOTEL KEY TAGS

These key tags are made of heavy gauge brass, highly polished and finished, as well as of black, red and grey fibre. The letters are deep cut and filled in with black enamel. Tags may be had with any desired lettering, but on one side only. Each tag has metal link for attaching to key. Be sure to state plainly lettering and numbering desired. Key tags are made to order in every case, and about ten days' time is required. We can supply any style of key tag on the market. Send sample and we will quote price. In ordering write the lot numbers and lettering desired plainly. Also state plainly the numbering desired. Tags will not be sent C. O. D. unless enough cash accompanies order to guarantee acceptance, because after goods are made up to your order they are worthless to us. By remitting full amount with order you will save the return C. O. D. charges. All prices quoted include key links, except where mentioned otherwise.

This register is a perfect working "Detail Adding" machine, priced amazingly low. It is especially adapted for use in soda fountains, billiard parlors, cigar stores and places where space is limited; being 9 in. wide it occupies very little room.

Made of heavy steel, oak or mahogany finish. All working parts are made of steel, machined and milled, nickel plated finish. The numbers are plainly lithographed on the metal indicators, adding wheels and keys. Has 9 registering keys, nickel plated and polished. The detail adding feature enables you to tell at a glance, at any time, number and amount of sales registered on each key. A polished marble slab is placed over the cash drawer for testing coins. Full French plate glass top. Cash drawer is made of well seasoned stock, nicely finished. Divided into 5 compartments—4 for coins and 1 for paper. Equipped with lock on lid. Size 16 in. high, 9 in. wide, and 16 in. deep. Shpg. wt. 50 lbs. Choice of two keyboard arrangements.

THERE IS MONEY IN OPERATING VENDING MACHINES
See Page 344

MONEY CAN BE SAVED by ordering enough merchandise to make up a 100 lb. freight shipment thus receiving the benefit of the full 100 lb. rate.

RESTAURANT CHECKS at LOW PRICES

Because we have these checks made to our own specifications, we can guarantee them to be absolutely uniform in quality. By printing them in tremendous quantities we effect a large saving which we automatically pass on to you in the form of lower prices. Thus by ordering your requirements from us you are assured of the best quality checks at the lowest possible prices.

FINE QUALITY COUPON CHECKS

Made In Two Sizes

These checks are printed on manila paper in multiples of 5c, perforated between amounts so each can be torn quickly and evenly. Put up in pads of 100 checks, numbered consecutively and tabbed at one end. Hole is punched at lower end, so that pad may be attached to holder if desired. Do not confuse these checks with the ordinary coupon checks. They are made of extra quality heavy manila paper; the printing is well done, and the perforations are excellent. These coupon checks are well adapted to soda fountains, lunch rooms, restaurants, tea rooms, etc. Made in 2 sizes, denominations 5 cents to \$1.00 and 5 cents to 60 cents.

The "2-in-1" CHECKS & PUNCHES

Neat--Convenient--Efficient

WE especially recommend the "2-in-1" checks for first-class restaurants and soda parlors. They are very neat and make a good impression wherever used. The "2-in-1" Restaurant and Soda Parlor Check is now made with red backs. This new feature is heralded as a decided improvement over the old style check. With the red back the "2-in-1" check is absolutely cheat-proof. The cashier can see at a glance the highest amount punched. Also check will never be lost among the dishes because it can always be seen. Printed in either red and white or blue and white, as shown on this page. All "2-in-1" checks have red backs. Checks are shown actual size. Put up in tabs of 50 checks each, perforated at the end. 200 pads in a box. We do not break boxes. Shipping weight, 200 pads, 10½ lbs.

THE "2-in-1" CHECK PUNCH

And Check Holder

The "2-in-1" Check Punch forms a holder for the "2-in-1" Checks and is used as a punch at the same time. With the flexible belt hook listed on the right this punch can be hooked onto the belt or apron. Other-

**FLEXIBLE
BELT HOOK**

For use with the "2-in-1" Junior Punch, where it is desired to attach the punch to the belt or coat pocket.

This is the "2-in-1" Senior Check Punch. Like the Junior it punches a small triangle out of edge of check. Snips are held in holder until ready to empty. Belt hook is already attached. Works easy, accurately and efficiently. It holds two pads of "2-in-1" checks. Best for the busy restaurant or soda parlor. Made of steel, highly nickel plated. Shpg. wt. 6 oz.

wise, it may be used as a pocket punch. The punched snips are held in the holder until ready to empty. Will hold one pad of "2-in-1" checks. Made of steel, highly nickel plated. Shpg. wt. 6 oz.

RESTAURANT CHECKS AND PUNCHES

STANDARD PUNCHLESS CHECKING SYSTEM

A Perfect Checking System For Use in Soda Fountains, Restaurants and Lunch Rooms.

The metal holder is a combined check holder and punch and weighs less than 3 oz. together with a pad of checks. Can be carried in pocket or attached to apron band. Operation is very simple. Place check at amount wanted underneath the raised V shape metal point. (see illustration above), pull check towards you and the sharp point perforates check at denomination. The complete operation is almost instantaneous; no lever to press. Checks are 1 1/4 x 3 1/4 in., put up in pads of 50, printed with waiter's numbers in red and serial numbers in blue. Packed in cardboard boxes, containing 5,000 checks of one waiter number, consecutively numbered. Checks may be had ready to use, or specially printed with your name, as listed below. The Cashier Report Sheets will give you an accurate record of business as well as a complete check on each waiter. **Holders will be replaced free of charge if defective upon return of damaged holder.**

Checks Carried in Stock

No less than 5,000 or exact multiple of 5,000 sold for each waiter number wanted. Be sure and specify waiter numbers desired. Shpg. wts.: 10,000, 15 lbs.; 25,000, 35 lbs.; 50,000, 70 lbs.; 100,000, 150 lbs.

The Cheapest and Most Effective Form of Advertising Is Using **BOOK MATCHES**

**WITH YOUR AD ON
THE FRONT COVER**

For As **\$3.65** Per
Low As **1000**

In Lots of 25,000 Books

Book Matches are used in nearly every Hotel, Club and Restaurant, because they are of convenient size and an excellent advertising medium. Perhaps you thought of using them as an advertisement for your business, but figured it would require too great an investment. We now offer book matches at such a low price that the cost is negligible. Book matches as an advertising medium are hard to beat, as they are accepted by everybody and never thrown away until used.

**Book Match Advertising
Builds Up Your Business At
Practically No Cost To You**

Many of our individual restaurant, lunch room, confectionery, and drug store customers are doing successful and satisfactory advertising at a very small cost or no cost at all, by using our "Book Matches" with their "Ads" printed on the front cover. It's the cheapest and best advertising they can use for their local trade. Try it yourself! The cost is slight and the results more than satisfactory.

If you do as a number of our customers do—sell these book matches—you make a profit and your advertising costs you nothing. If you hand them out with cigar or cigarette purchases, you put your advertising where you know it will do you the most good, and at the cost of only a fraction of a penny per customer.

Entire book is printed in three attractive colors, and contains 20 matches made of specially compressed paper. Your "Ad" appears on the front cover in plain type and in one color. No illustration or fancy type will be used. In ordering, specify "Ad" desired on front cover. Be brief, as a few words properly displayed are better than a crowded "Ad." Bear in mind that your "Ad" is on the front cover only. Our Trademark "Ad" appears on the back cover. Send in your order now! It requires three to four weeks to fill orders. Goods shipped F.O.B. Factory, New York City. No less than 2,500 of one imprint sold. Packed 50 books to a paper box. 2,500 books in a wood case.

PRICE
\$7⁵⁰
EACH

New Match Vender is a very handsome, mechanically perfect safety match vending machine of the latest type. Placed on the counter it becomes an automatic salesman for safety matches and requires no attention. It makes it possible to sell matches without having to ask customers for a penny, which many storekeepers dislike doing. As a special new feature, this vender has a double magazine for holding the matches, with a separate slot and delivery for each, so that two customers can be taken care of at the same time. The vender is very simple in construction with no springs or complicated parts to get out of order. It is made of sheet metal finished in attractive orange porcelain enamel. Lettered "1c MATCHES" in colors. Attractive mirror front. Will hold 30 regulation size boxes of safety matches. Ht. 16 in., width 6 in., depth 3 in. Shpg. wt. 14 lbs.

METAL CUSPIDORS AND RUBBER MATS

12 IN. HEAVY BRASS CUSPIDOR

We have sold thousands of these cuspidors and know they give extraordinary service—Used in hotel offices, lobbies, club rooms, etc. Made of heavy gauge brass, stamped and then spun to harden the metal. Reinforced bands and edges. Self-righting, base heavily weighted with cast iron (not sand). Brilliant polish finish—easy to polish and stays bright. Sanitary and simple to clean. Each cuspidor pkd. in a corrugated shipping carton. Shpg. wt. 6½ lbs.

15E2075 Ht. 12 in., diam. 6 in. (Doz. \$32.50) Each, **\$2.85**

12 IN. BRASS LOBBY CUSPIDOR

A handsomely designed cuspidor, particularly adapted to use in lobbies of hotels, clubs and theatres. Made of heavy gauge brass, highly polished; bottom is weighted, making it difficult to tip. The top is 10½ in. in diam., and this extra large opening is another valuable feature. It is easy to clean. If desired you can fill the cuspidor with sand and take out top layer of sand daily. Total ht. of cuspidor 13 in., width of bottom 9 in., diam. of body 7½ in. Each cuspidor packed in a corrugated shipping carton. Shpg. wt. 6½ lbs.

15E2080 (Doz. \$45.00) Each, **\$3.95**

HALF URN BRASS CUSPIDOR

Extra fine brass, highly finished. Reinforced top. Weighted bottom. Ht. 8 in., diam. 8 in. Each cuspidor pkd. in a dustproof carton. Shpg. wt. 5½ lbs.

"NO-WASTE" TISSUE TOILET PAPER

Will Save 25% to 35% On Your Toilet Paper Expense

Buy "No-Waste" and save because—

Only two sheets can be taken at one time. The paper is folded so that immediately after the double sheet is withdrawn from the cabinet, the edges of the next double sheet appear ready to be dispensed, and so on until the entire package is consumed. The paper is highly absorbent and less is used. The paper is soft Manila tissue (not machine glazed), size 4½ by 5 in. Cabinet prevents pilferage. The paper cannot be withdrawn except through opening at bottom. Actual comparative tests against roll, oval or other single sheet services have proven "NO-WASTE" cheaper by 25 to 50%. No waste from careless use. Full size 4½ by 5 in. sheets—**guaranteed 100,000 single sheets to case**—Shpg. wt. 65 lbs.

LIQUID SOAP, DISPENSERS AND BROOMS

LIQUID SOAP For the Office and Factory

“SOP-O-ZON”—For the Office

SOP-O-ZON is composed of the purest vegetable oils blended in such proportion that the action on the skin is not only delightful but very beneficial.

It gives the hands a velvety softness that seldom comes from soap in any form. Sop-O-Zon offers a very definite saving over any other form of soap. Being a liquid, the amount used is only what you actually need. It cannot shrink in size from absorption by lying exposed in a germ-infected soap dish. It cannot be wasted in the slightest degree, as can powdered soap, or soap in dispensers of the “scraping” type. By actually lasting longer than other soaps, “Sop-O-Zon” positively cuts down soap cost while increasing soap quality.

PER GALLON		PER GALLON	
15E5780 1gal. can. Wt. about 12 lbs.	\$2.00	15E5783 30 gal. steel drum. Wt. about 300 lbs.	\$1.35
15E5781 5gal. can. Wt. about 50 lbs.	1.60	15E5784 55 gal. steel drum. Wt. about 500 lbs.	1.25

“ARROW” BRAND—For the Factory

“ARROW” Brand is an economical and satisfactory Liquid Soap offered at a low price.

“Arrow” Liquid Soap contains qualities similar to our “Sop-O-Zon” brand and is especially recommended for Public Service, factories and establishments where both price and quality must be considered. Lathers freely in hot or cold water and will not irritate the skin.

PER GALLON		PER GALLON	
15E5786 5 gal. can. Wt. about 50 lbs.	\$1.10	15E5788 30 gal. steel drum. Wt. about 500 lbs.	90c
15E5787 Case of two 5 gal. cans. Wt. about 100 lbs.	1.05	15E5789 55 gal. steel drum. Wt. about 300 lbs.	80c

NOTE — We will make an extra charge of \$6.00 for all 30 gallon steel drums, and a charge of \$7.50 for all 55 gallon steel drums. These drums will be returnable to us when empty for full credit.

“SOP-O-ZON” LIQUID SOAP DISPENSER

For “Sop-O-Zon” and “Arrow” Liquid Soaps

Cannot possibly leak, drip or get out of order. Glass container holds about 12 oz. (sufficient for 600 washings). Cover of white metal with removable cap screw that cannot be removed readily without using a spanner wrench. This prevents fixture from being tampered with. A light push of valve allows only 20 drops of liquid to be discharged at one time. Ht. 6 in. Shpg. wt. 5 lbs.

15E5476 With Wall Bracket. Each, \$3.50 (Doz. \$39.00)

WALL SOAP DISPENSER

For “Sop-O-Zon” and “Arrow” Liquid Soaps

To attach to wall. Consists of a nickel plated bracket which supports a flint glass bowl for holding liquid soap. The metal base is screwed to the glass bowl with a valve at bottom which governs the supply of soap. Operated by pressing hand against small nozzle under bowl. Size 6x6½ in. Wt. not pkd. 1½ lbs.

15E139. Each, \$1.95 (Doz. \$22.50)

We can furnish Gravity Liquid Soap Systems. Send in sketch of your wash basins and we will gladly quote prices.

"UTILITY" ELECTRIC FLOOR MACHINE

Will Refinish, Scrub or Wax Floors.

Does all kinds of work on floors. Used extensively by the United States Government and by numerous State and city institutions, hospitals, hotels, office buildings, factories, theaters and schools. Will scrub or wax 2,000 square feet of floor space per hour, where only 700 square feet can be done by hand. Polishes linoleum and hardwood floors, giving them a brilliant hard and lasting finish. The "Utility" will refinish floors, making the employment of outside labor unnecessary. Paint, shellac, varnish and stains can be removed easily and quickly with the use of various attachments listed below. It can also be used for surfacing off desks and tables. It is self-propelling and mechanically perfect. It is operated with rapidity and ease by the average help. Economy in the use of cleaning and polishing materials and brushes results from the use of this machine. It makes your cleaning force more efficient and is a guarantee that a

specified amount of floor space may be covered in a given length of time. The stock machines listed below are

ows "Utility" Floor machine in Operating position. With the Impico and Wire Brushes Detached and Palmetto Brush attached to Machine.

OUR IMPROVED 2-COMPARTMENT MOPPING TRUCKS

A Complete 30 or 60 Gal. Tank, With Separate Sections for Clean and Soapy Water. Mounted on Wheels and Has Mop Wringer Attached.

Showing 15E5001. 15E5000 has 3 wheels.

This mopping tank enables more than one person to work speedily and efficiently from one tank, whereas use of the old style mop pail and wringer means the constant changing of water and using the same water for both mopping and cleaning. The 30 gal. tank has 2 compartments of 15 gal. each; the 60 gal. tank has 2 compartments of 30 gal. each; one compartment for clean water and the other for soapy water. Tank made of steel. All seams acetylene welded. Seams are not affected by the strongest soap solution. Perforated steel wringer operates easily and quickly by use of a foot lever. A faucet is connected to each compartment so that tank can easily be emptied. Trucks fitted with metal wheels with solid rubber tires.

PIX GUARANTEED ROACH KILLER

Pix Guaranteed Roach Killer exterminates Cockroaches and water bugs wherever it is used according to directions. It is harmless to human beings, therefore perfectly safe to use around the kitchen, etc. It is a preparation that cockroaches and water bugs like to eat. It poisons them. Then they go to their nests where they die. The dead bodies are often eaten by the other cockroaches or water bugs, in the nests or in their haunts. They actually exterminate themselves without work on the part of anyone, after the powder has been carefully distributed. This Roach Killer is entirely different from anything else ever invented for the purpose. It kills them in the walls, under floors and destroys the bugs completely where other preparations cannot be made to reach them. Put up in 1 lb. sifter top cans, pkd. 1 doz. in a carton. Shpg. wt. 15 lbs. Directions on each can.

15E211 Wt. not pkd. about 1 1/4 lbs. Doz. **\$7.35**

17 lbs. Case, **\$10.00**)

\$1,000 GUARANTEED

ROACH KILLER

\$1,000 is offered by the manufacturers to any one who can prove that this powder cannot rid any building of roaches and water bugs when it is properly used. It does not contaminate food stuffs, is tasteless to the human tongue yet the roaches are attracted to it and greedily devour it. The live roaches in the walls, especially the young ones, feed on the bodies of the roaches that have died, and this in turn kills the little ones. No hotel or institution should be without it. 1 lb. can with sifter top. Weight not packed about 1 1/4 lbs.

15E4316 (Doz. \$10.00) Each, **\$1.25**

AUTOMATIC RAT AND MOUSE TRAPS

Constructed of high grade metal and wood, rigid construction. The bait is placed in the entrance of the trap; as soon as the animal goes inside, the door automatically closes, compelling the rodent to climb a chute, the end of which it drowns in a small tank of water located in the rear of the trap and automatically sets the trap for the next victim. Extremely simple in operation; nothing to get out of order. Trap is ready for use by simply emptying the tank and refilling it.

4625 Rat Trap. Ht. 25 1/2 in. Width 7 in. Shpg. wt. 12 lbs. Each, **\$8.50**

4626 Mouse Trap. Ht. 10 1/4 in. Width 4 in. Shpg. wt. 1 1/2 lbs. Each, **\$3.00**

HOOKE'S HIGH TEST LYE

Pure Granulated Lye—Unequaled for Cleaning or Disinfecting. Strictly a quality product. It is a high test, pure granulated lye, used as a soap maker. Extensively used by hotels, restaurants, factories, and institutions to clean sinks and drains, soften water and reduce labor in cleaning greasy pots, pans, etc. Put up in friction top cans, containing 13 oz. No better package on the market. 48 cans to the case. Shpg. wt. per case 45 lbs.

15E1418 Case, **\$5.25**

5 case lots Case, **\$10.00**

"PIX DOUBLE D" FLUID A COAL TAR FLUID THAT DISINFECTS AND DEODORIZES

For General Cleaning and Disinfecting, Washing, Disinfecting Clothes, Cleaning Refrigerators, Etc.

Destroys germs, purifies air, protects from contagion and infection. **Non-Poisonous.** Will not injure hands. Soluble in water, and mixes immediately. This type of disinfectant has been a great factor in combating "Spanish Influenza."

Formula: For general cleaning, dilute one-half cupful in 5 gals. water. For disinfecting refrigerators, add 6 drops to 9 cupfuls of water. For washing and disinfecting clothes, mix 1 tablespoonful in a pint of water.

15E4359 Cap'y 1 gal. can. Shpg. wt. 8 lbs. Each **\$1.65**

15E4360 5 gal. can. Shpg. wt. 38 lbs. Each **7.50**

15E4361 10 gal. can. Shpg. wt. 75 lbs. Each **12.00**

15E4362 1/2 bbl. 25 gal. Shpg. wt. 150 lbs. Gal. **1.00**

15E4363 1 bbl. 50 gal. Shpg. wt. 250 lbs. Gal. **.95**

Don't Burn Good Money! = BALE IT!

Millions of dollars go up in smoke annually through the thoughtless burning of waste paper. Bale the waste paper you now burn and turn it into dollars. Balers will pay for themselves many times over and will reduce the fire hazard. Easy to operate and take up but little space.

WOOD BALERS

With the Tilt-Top Feature
15% greater capacity than similar balers. Top tips back so Baler can be filled easily. Patented self-setting screw eliminates half labor ordinarily required. After each filling of paper you "tip the top" or turn the beam one-half round and the screw is in position for the next filling. Strongly nailed or bolted together and steel reinforced wherever necessary.

- Order by Numbers Below
Shipped promptly from Illinois Factory
- 15E3289F Office Size.** Ht. 48 in., width 22 in., depth 21 in. Makes bale 90 to 100 lbs., size 17x18x31 in. Complete with bale ties for 500 to 1,000 lbs. of paper. Wt. 125 lbs. Each, **\$15.50**
 - 15E3290F Small Hotel Size.** Ht. 48 in., width 25 in., depth 21 in. Makes bale 120 to 130 lbs., size 7x22x31 in. Complete with bale ties for 500 to 1,000 lbs. of paper. Wt. 135 lbs. Each, **\$17.50**
 - 15E3291F Large Hotel or Factory Size.** Ht. 50 in., width 29 in., depth 21 in. Makes bale 40 to 180 lbs., size 18x25x34 in. Complete with bale ties for 500 to 1,000 lbs. of paper. Wt. 150 lbs. Each, **\$20.50**

PIX STEEL BALERS

Used in United States Post Offices. Strictly fireproof and sanitary—the simplest on the market. All steel construction. Makes a full weight bale that is clean and will stand up well under shipment. Full opening side swing door makes the complete bale easy to remove. Built from heavy sheets of steel, and strongly reinforced with angle steel bars. All working parts are cast from crucible steel, case hardened. Made in three sizes to produce bales weighing from 125 to 375 lbs. Prices include small bundle of wire and iron hook for handling bales. **Shipped promptly from factory in Iowa.**

- 15E3271F** Ht. 39 in., width 19 in., depth 20 1/4 in. Size of bale 17x18x35 in. Wt. of bale 125 to 150 lbs. Shpg. wt. of baler 250 lbs. Each, **\$60.00**
- 15E3272F** Ht. 45 in., width 22 in., depth 23 in. Size of bale 18x20x38 in. Wt. of bale 150 to 200 lbs. Shpg. wt. of baler 325 lbs. Each, **\$75.00**
- 15E3273F** Ht. 56 in., width 25 1/4 in., depth 27 1/4 in. Size of bale 22x24x42 in. Wt. of bale 250 to 350 lbs. Shpg. wt. of baler 400 lbs. Each, **\$115.00**

Baling Wire—**15E3278** Extra wire. 250 bale ties in bundle, 8 1/2 ft. lengths, for 15E3271F, 15E3272F, 15E3289 and 15E3290 balers. Bundle, **\$2.65**
15E3269 Extra wire. 250 bale ties in bundle for 15E3273F and 15E3291 baler. 10 ft. lengths. Bundle, **\$3.15**

"GUARDENE" FIRE EXTINGUISHER

Approved and Labeled by the Underwriters' Laboratories, Inc.

\$13.95
EACH

Will throw a stream more than 50 feet. As effective as 50 gal. of water. Will extinguish gasoline, naphtha, kerosene or oil fires. Always ready for use. Guaranteed to work safely and effectively if kept properly and recharged once a year. Each "Guardene" Extinguisher is shipped with one charge. Recharges consist of 1 1/2 lbs. bicarbonate of soda, 4 liquid oz. sulphuric acid commercial, balance water. Full directions for filling appear on metal name plate. Made of highly polished copper and cast brass. Can easily be carried about.

Save 5% on Building Insurance

In many states approval of Underwriters' Laboratories carries with it a 5% discount on the building rate when this extinguisher is installed.

- 15E5885** Complete with brackets, screws and one charge of chemical. Each, **\$13.95**
- 15E4284** Extra charges for "Guardene" Fire Extinguisher. Each, **50c**

"PYRENE" FIRE EXTINGUISHERS

"Pyrene" liquid is a chemical combination of purely organic materials slightly aromatic and of a high specific gravity. A few shots of "Pyrene" will put out the most stubborn fire. Non-damaging and non-corrosive. Will not freeze at 60° F. below zero. Size of container 14x3 in. Brass finish.

\$8.00
EACH

As illustrated at left.

15E5882 Container filled with 1 qt. of "Pyrene" liquid and with enameled wall bracket for attaching to wall. Shpg. wt. about 15 lbs. Complete, **\$8.00**

15E5886 Container in case, filled with 1 qt. of "Pyrene" liquid. Case is of metal, finished in red enamel with glass front. Ready to attach to wall. Wt. 16 lbs. Complete. **\$10.00**

EXTRA "PYRENE" LIQUID

- 15E5883** 1 qt. can. Shpg. wt. 5 lbs. Can, **\$1.80**
(Case of 20 cans. Per can, \$1.20)
- 15E5884** 1 gal. can. Shpg. wt. 20 lbs. Can, **7.20**
(Case of 4 cans. Per can, \$4.80)

"GUARDENE" PUMP TANK

Consists of a galvanized iron cylinder 16 1/2 in. high, 9 3/4 in. in diam., with double action force pump. Cylinder lined with asphaltum. Machine can be easily and quickly refilled. Pump made of heavy brass barrel fitted with brass plunger rod with D-shaped handle at top. Metallic ball valve guaranteed not to corrode or stick. Strainer bottom of pump prevents solid matter getting into hose and clogging nozzle. Pump throws continuous stream 50 ft. Cap'y 5 gal.

15E180 Galvanized iron body. Wt. not pkd. 17 lbs. Each, **\$15.00**

FIRE AXE

15E171 A regulation 6 lb. axe with pick-head, made of best crucible steel, hardwood handle. Complete with brass wall clamps. Wt. 7 1/2 lbs. Each, **\$3.25**

GALVANIZED FIRE PAIL

Heavy galvanized sheet steel, reinforced. Heavy ball handle, securely fastened. Round bottom, making it impossible to stand on floor. Should be filled with water and hung from hook. "FIRE" lettered in plain, bright red. **15E189** Cap'y 12 qts. Shpg. wt. each 3 lbs. Each, **45c** (Doz. \$4.75)

"SUPERIOR" WATER HOSE

Made of seamless rubber tubing, seven plies of closely woven light duck, preventing kinking and twisting, and a rubber cover. Diam. inside 3/4 in. Wt. not pkd. 18 lbs.

15E1405 Length of 50 ft. Ft. **14c**

NOTE—The above hose can be furnished in lengths of 25 ft. at the above prices plus a charge of 50c for cutting and coupling.

"JUSTRITE" SPRAY NOZZLE

Spray is formed by a brass point coming down into the stream. A popular style that fully meets the demand for a nozzle of this character. Gives a full stream and an absolute shut-off. Guaranteed to be perfect working. Made of heavy highly polished brass. Shpg. wt. 8 oz.

15E3335 For 3/4 in. hose. Each, **75c**

FREIGHT CLASSIFICATION AND GENERAL INFORMATION

WESTERN CLASSIFICATION APPLIES TO: Conn., Del., D. of C., Ind., Me., Md., N. H., N. J., N. Y., O., Penn., R. I., Vt., Va. W. Va.

WESTERN CLASSIFICATION APPLIES TO: Ariz., Ark., Cal., Col., Ida., Ill., Kan., La. (west of Miss. River), Minn., Mo., Mont., Neb., Nev., N. Mex., N. D., Ore., S. D., Tex., Utah, Wash., Wis., Wyo.

SOUTHERN CLASSIFICATION APPLIES TO: Ala., Fla., Ga., Ky., La. (east of Miss. River), Miss., N. C., S. C., Tenn.

TO FIGURE FREIGHT CHARGES: First ascertain classification applying to town on desired articles; then multiply the corresponding class rate to your town (nearest town shown) by the weight, allowing a reasonable extra weight for packing material.

EXAMPLE: You live in Omaha, Neb., and want to know the freight charges on 50 lbs. of linens, 100 lbs. of glassware and 80 lbs. of iron cuspidors. Turning to classification, under the heading West (Omaha takes Western Classification), you find linens are first, glassware second, and iron cuspidors third class, and referring to the scale of freight rates as shown on following page, the first-class rate is shown as \$1.20, second-class \$1.02, and third-class \$4c per 100 lbs. Multiplying the weight by the rates you have:

50 lbs. linens.....at \$1.20 per cwt.....\$0.60
100 lbs. glassware.....at 1.02 per cwt..... 1.02
80 lbs. iron cuspidors.....at 84c per cwt..... .67

Total.....\$2.29

If Your Town Is Not Shown in This List Refer to the One Nearest to It

WE ADVISE YOU to make your orders total 100 lbs., as this will save you considerable in freight expense.

Effective April 15, 1925, the Postoffice Department will add a service charge of 2 cents per parcel to be added to the regular parcel post charges. If shipment comprises 1 or more parcels, the Service Charge will be 2 cents for each parcel, in addition to the regular parcel post charges.

SAFE DELIVERY
Merchandise shipped by Parcel Post may be guaranteed against loss while in transit for any amount up to \$100; the cost of this guarantee is 5c for each order up to \$5; 8c for each order between \$5 and \$25; 10c for each order between \$25 and \$50 and 25c for each order between \$50 and \$100.

Post Office. Parcel Post shipments up to 70 lbs. weight can only be made to points within the first zone, and the weight limit for the further distant zones is 50 lbs. From time to time the Government, profiting by its experience, is making changes in the Parcel Post system, and all statements made by us herein are subject to revision.

Parcels must not be greater in size than 84 inches in length and girth combined, nor in form of a cylinder. They must not be so constructed as to crush, break, or damage the mail equipment or other kind likely to injure the person in any postal office, or to require special handling or other special treatment required for transportation and delivery.

For Added Profits Install a Soda Fountain!

A soda fountain is not hard to operate and it can be made the source of a very handsome profit when added to your regular business. You can start first as modestly as you wish, adding more elaborate fixtures as your business warrants. Our easy partial payment plan will enable you to pay as you earn. Let us help you make more money. *Write us and we will be glad to send you Our new Catalog AR49 and complete information as to what we can do for you.*

Our "Challenge" line of Soda Fountains represents the absolutely biggest buy on the market today. Completely described and illustrated in our Catalog AR49

HOW WE DO BUSINESS

OUR TERMS

Cash With Order

This is the most satisfactory method, because it does away with bookkeeping, clerical work and other unnecessary red tape and expense—not only to us but to yourself. When goods are ordered to be shipped C. O. D., then the express company or bank must be paid by you for handling the invoice or draft. Where bills are contracted to be paid for in 30 days, and not remitted at maturity, a draft is drawn and the bank must be paid for its trouble. Cash with order insures the quickest delivery of goods to you—there is no chance of delay in the credit department, incurred by looking up past dealings, commercial ratings, and the investigation of references.

A great many customers object to their packages being marked "C. O. D.", or the making of drafts through their local bankers. This can be easily overcome by sending the amount of your purchase in advance. You can then secure every advantage when dealing with a responsible house. We are responsible, and you assume not the slightest possibility of loss or disadvantage.

Part Cash—Balance C. O. D.

A considerable saving can be effected by sending full payment with your order. However, if you prefer, we will gladly send you any goods amounting to \$5.00 or more, collect on delivery, if you send one-third of the amount with your order as evidence of good faith, the balance, together with transportation charges, to be paid when the goods arrive. These C. O. D. orders can be shipped by freight, express or parcel post.

Balances due on C. O. D. freight shipments are collected by draft through your local bank or express company.

Balances due on C. O. D. express shipments are collected by your express agent.

Balances due on C. O. D. parcel post shipments are collected by your Postmaster.

The charges made for the collection and return of the money due to us are paid by the purchaser. **Orders under \$5.00 will not be sent C. O. D.**

GOODS MADE UP SPECIALLY TO YOUR ORDER CANNOT BE SHIPPED C. O. D.

Thirty Days' Time

We will open an account with you on our regular terms of net thirty days from date of invoice, upon receipt of satisfactory references. When opening a credit account, it is customary and necessary to submit references with your first order—that is, the names of your bank and other houses with which you have already established credit relations. Should you fail to send the desired information with your order, we will hold shipment and write you for such additional information as we deem necessary. **To avoid delay in shipment, we suggest that you send cash with your first order and make application at that time for an open account. ALL INVOICES ARE SUBJECT TO SIGHT DRAFT WITH EXCHANGE AT END OF THIRTY DAYS WITHOUT NOTICE.**

Making Out Your Order

Every article in our catalog is described in simple language, and in most cases an illustration of the article will be found. Each article has a separate lot number and it is advisable that both the name of the article and its size, color, finish, etc., be given, in addition to the lot number.

How To Send Money

In making remittances to us we suggest the use of the Bank Draft or Check, Express Order, or Post Office Money Order. Private checks will be accepted, but checks from customers not known to us are sent to the bank on which they are drawn for collection before shipment is made. This delay may be avoided by having your bank cashier certify your check before sending it.

Substitutions, Omissions and Deferred Shipments

When you find that an item ordered was not included in your shipment, an explanation will appear on the bill. We carry an immense stock and handle thousands of different articles. At times the sale of an article will be greater than we anticipate and, notwithstanding our watchfulness, we occasionally find it impossible to get goods in fast enough to replenish our stock. When entirely out of an item ordered, we use our best judgment in your favor, especially when you indicate anxiety for immediate shipment. At such times we do one of three things—substitute, defer shipment, or cancel the item from your order.

If temporarily out of an item ordered and we have no good substitute, and article weighs enough to make a shipment by itself, we will ship as soon as we receive it, advising you accordingly. If permanently out of an item wanted and we have no substitute to offer, we will write you promptly.

IN EVERY INSTANCE WE HAVE YOUR BEST INTEREST IN MIND. We assume the responsibility of substituting and we stand ready to take back such goods if unsatisfactory, pay transportation charges both ways and refund amount charged.

We Guarantee

To Deliver Merchandise Conforming Exactly To Our Illustrations and Descriptions.

Special Terms on Complete Equipment

We Can Help You Get Into Business or Help You Extend Your Present Business. Many of our customers have promoted their prosperity by availing themselves of our ability to help them finance their propositions. The installation of a complete equipment for a Soda Parlor, Hotel, Restaurant, Lunch Room, or Cafeteria, runs well into money—hence our offer to help our customers finance the deal when necessary. Write us and tell us your plans. We will then give you full details of our offer, either by mail or through the medium of a personal representative. Not only are our terms especially favorable, but the assurance of merchandise of absolutely dependable quality and the economy of time and money through centralized purchases make it advisable to come to Albert Pick & Company for **everything** you require.

PRICES in this Catalog **NET—NO DISCOUNTS** and are quoted **F. O. B. Chicago, (or in some instances, where specified, F. O. B. factory) unless otherwise stated. Prices quoted herein are based on the present market and are subject to change without notice.**

Your Money Back If You Are Not Pleased

Every article listed in our catalog is covered by our liberal guarantee.

If you receive goods from us that are not entirely as represented, we will gladly refund your money, including amount of transportation charges you have paid, or exchange same for other merchandise, provided you notify us within five days after receipt of the goods.

Where goods ordered by mail are shipped exactly as represented, but do not prove satisfactory through no fault of ours, we will refund the full amount paid for the goods, deducting only the transportation charges which we may have paid, provided you notify us in advance of your reasons for wishing to return the goods.

In No Case Should Goods Be Returned to Us Without Our Instructions.

Goods made to order; goods bearing customer's advertising; or goods that are advertised or sold as not returnable, cannot be accepted for refund or exchange. This applies, however, **ONLY** where the order is filled correctly. Under **ALL** circumstances we take back goods and make refund if the error is ours.

Returned Goods Before returning any merchandise to us, be sure to write for shipping instructions, explaining fully why you desire to return the merchandise, so we can give you shipping directions. **This must be done within 5 days of the date the goods were delivered.** Be sure to mark all returned goods plainly and to write your own name and address on each package. All goods returned must be properly packed and shipped back the cheapest way. If in doubt as to the cheapest method of shipment, ask your railroad agent. If necessary to enclose a sample with returned goods mark it "Sample" and write your name and address on the article, to insure the matter receiving prompt attention. Do not enclose any letters in packages you send us.

Errors Should we make an error in the filling of your order, kindly notify us immediately and we will promptly adjust the matter to your entire satisfaction, without any expense to you.

We Reserve the right to restrict quantities, withdraw prices or eliminate from sale any item listed in our catalogs or circulars.

GREEN HAT SAFETY MATCHES

With Attractive Emerald Green Heads

Finest Quality—Full Size Box—Average 55 Matches

A new attractive Safety Match with a **green head**, put up in an attractive labeled box. Strictly a quality match. None better made. Each match is impregnated with paraffin, which allows flame to burn to end of stick. "Green Hat" Safety Matches will fit all standard match stands, holders and vending machines.

Order your supply now! Be the first to adopt this new distinctive labeled "Green Hat" safety match in your locality. Make your store known as the place to buy "Green Hat" Safety Matches.

"Green Hat" Safety Matches light with the slightest scratch on the box, and burn with a bright even glow. You will be more than pleased with their quality.

1. Made of strong uniform white aspen wood.
2. Emerald green sure-strike heads.
3. Average 55 matches in a strong all-wood box.
4. Will fit all standard match stands and holders.
5. Will fit all match vending machines.

"King of Coffee Makers"

Do you brew your coffee the "Petersen" way? If you do, you have a delicious beverage, fragrant and smooth, without bitterness and free from disagreeable or injurious elements—made with the utmost speed and efficiency to its full strength without repouring and with a substantial saving of coffee. For that is the way coffee is made by the famous "Petersen" Combination Coffee and Water Urn! And what is more, that is the way it makes coffee time after time, day in and day out, and operated by ordinary help—because the "Petersen" Urn is simple, automatic, fool proof and positive in its operation, overcoming to the greatest possible degree the human elements of carelessness, guesswork and inaccuracy, and substituting mechanical accuracy, safety and precision. Yet in spite of this performance and in spite of the fact that it is a shining example of fine urn construction, the "Petersen" Urn may be purchased at surprisingly low prices.

*There is no urn more
finely made and finished
than the
"Petersen" Urn!*

The performance of the "Petersen" Urn is its best advertisement. Ask any of its many users how well they are satisfied,—and see how quickly they will bear out all of our claims for it!

The "Petersen" Urn is made in 4, 6 and 8 gallon sizes, for use with gas, steam or electricity. For complete description, together with prices and other information, see page 140 of this catalog
